HOW TO USE THIS CALENDAR

The following provides an overview of the structure of this Calendar to guide users.

General Information

This section provides the contact information for the Faculty and University.

Degrees and Diplomas conferred in the Faculty

This section provides information on each of the qualifications conferred in the Faculty.

Explanation of the National Qualifications Framework (NQF)

This is a brief section on the NQF levels and qualification types.

Faculty Board and Faculty Office Staff

This section lists staff members who constitute the Faculty Board and Faculty Office staff members.

Lecturing and Technical Staff

A comprehensive Faculty staff listing per Department, Centre, Institute, School or Unit is provided.

Rules for Programmes

This section provides information on the rules for each academic programme at undergraduate and postgraduate Level offered by the faculty. In each year level, and depending on the programme for which a student is registered, they are required to complete and pass a certain number of credits in order to promote to the next level of study. Promotion requirements per programme can be found in this section. These rules should be read in conjunction with the academic rules (Section 3) of the General Calendar (Part 1). Students should acquaint themselves with the rules in both Calendars and annually check for rule and curriculum changes.

Module Descriptors

This section provides information on all the modules offered by the faculty at undergraduate and postgraduate Level. Module descriptors contain information which relate to the main outcomes and content for each module, including the credit value and NQF Level of the module and pre-requisite and co-requisite modules. It is set forth in alphanumeric order per Undergraduate and Postgraduate offering. An alphabetical listing of all modules can be found in the module descriptor index.

Pre-requisite and Co-requisite Modules

A pre-requisite module is a module that must be passed prior to a student being admitted to a higher module or the following year of study as determined in the faculty yearbook.

A co-requisite module is a module that must be passed prior to or simultaneously with another associated module before credit can be granted for the latter module. Requirements are provided in each module descriptor.

Explanation of Symbols and Remarks on Academic Transcript

This section provides an explanation of the symbols used and the remarks on the academic transcript.

GENERAL INFORMATION

CORRESPONDENCE WITH THE UNIVERSITY

All postal correspondence should be addressed to the relevant person or department at:

Main Campus
The University of the Western Cape
Private Bag X17
Bellville
7535

Should you not know the person or department, please direct all correspondence to the Registrar.

Faculty related enquiries can be directly forwarded to:

The Faculty Manager
Faculty of Community and Health Sciences

CALENDAR

The calendar is obtainable in the following separate parts:

- Part 1 General Information
- Part 2 Faculty of Natural Sciences
- Part 3 Faculty of Arts and Humanities
- Part 4 Faculty of Economic and Management Sciences
- Part 5 Faculty of Education
- Part 6 Faculty of Dentistry
- Part 7 Faculty of Law
- Part 8 Faculty of Community and Health Sciences
- Part 9 Schedule of Fees (Refer to the Schedule of Fees available on the University website)

MISSION STATEMENT

The University of the Western Cape has an explicit commitment to the development of historically disadvantaged communities in South Africa from which it draws most its students. It aims to play a particular role in this development by making its education accessible to students from these communities.

The Faculty of Community and Health Sciences is a multi-disciplinary team committed to the promotion of a new vision of Health and Welfare Services. Both in the training and education it offers and in the professionals it produces it aims to advance the transformation of existing Health and Welfare Services in South Africa.

The Faculty is committed to:

1. a proactive approach to managing its own affairs as well as to the professional issues which it must address;
2. the pursuit of excellence in education, research and community service;
3. the generation of knowledge which amongst other things, addresses the realities, problems and needs of the community;
4. student education which promotes:
 - a progressive primary health care approach to health and welfare services which is firmly rooted in the community
 - inter-disciplinary teamwork
 - competency in problem-solving, leadership and advocacy
 - critical analysis
 - an attitude of creativity and adaptability
5. student academic development, generating appropriate teaching strategies to address educational inadequacies and ensure the acquisition of competencies;
6. the development of dynamic, accessible and responsive models of training and intervention;
7. contributing to the formulation and implementation of policy which will ensure an equitable, efficient and effective Health and Welfare System in South Africa;
8. developing a collaborative relationship with the broader community;
9. staff development, both as an important function of departments, and as requiring vigorous and structured attention from the Faculty.

DEGREES AND DIPLOMAS CONFERRED BY THE FACULTY

DEGREES

Qualification	Abbreviation	Minimum period of Study
Dietetics:		
Bachelor of Science in Dietetics	BSc (Dietetics)	4
Master of Science in Nutrition	MSc (Nutrition)	1
Master of Public Health in Nutrition	MPH (Nutrition)	1
Child and Family Studies:		
Master of Arts in Child and Family Studies	MA (Child and Family Studies)	1
Doctor of Philosophy	PhD	2
Interprofessional Education Unit:		
Master of Health Data Analytics	M (Health Data Analytics)	1
Natural Medicine:		
Bachelor of Science in Complementary Health Sciences	BSc (Complementary Health Sciences)	3
Bachelor of Science in Complementary Health Sciences in Chinese Medicine and Acupuncture	BSc (Complementary Health Sciences) (Chinese Medicine and Acupuncture)	3
Bachelor of Complementary Medicine in Unani- Tibb Medicine	B (Complementary Medicine) (Unani- Tibb Medicine)	2
Bachelor of Complementary Medicine in Naturopathy	B (Complementary Medicine) (Naturopathy)	2
Bachelor of Complementary Medicine in Phytotherapy	B (Complementary Medicine) (Phytotherapy)	2
Bachelor of Complementary Medicine in Chinese Medicine and Acupuncture	B (Complementary Medicine) (Chinese Medicine and Acupuncture)	2
Nursing:		
Bachelor of Nursing	BNurs	4
Master of Nursing*	MNurs	1
Doctor of Philosophy	PhD	2
Occupational Therapy:		
Bachelor of Science in Occupational Therapy	BSc (Occupational Therapy)	4
Master of Science in Occupational Therapy	MSc (Occupational Therapy)	1
Doctor of Philosophy	PhD	2
Physiotherapy:		
Bachelor of Science in Physiotherapy	BSc (Physiotherapy)	4
Bachelor of Science Honours in Physiotherapy	BSc Hons (Physiotherapy)	1
Master of Science in Physiotherapy	MSc (Physiotherapy)	1
Doctor of Philosophy	PhD	2

Psychology:		
Bachelor of Arts Honours in Psychology	BAHons (Psychology)	1
Master of Arts in Psychology	MA (Psychology)	1
Master of Psychology	M (Psychology)	1
Doctor of Philosophy	PhD	2
Public Health:		
Master of Public Health	M (Public Health)	1
Master of Public Health in Nutrition	MPH (Nutrition)	1
Doctor of Philosophy *	PhD	2
Social Work:		
Bachelor of Social Work	B (Social Work)	4
Bachelor of Community Development	B (Community Development)	4
Master of Social Work	M (Social Work)	1
Doctor of Philosophy	PhD	2
Sports, Recreation and Exercise Science:		
Bachelor of Arts in Sport, Recreation and Exercise Science	BA (Sport, Recreation and Exercise Science)	3
Bachelor of Science in Sport and Exercise Science	BSc (Sport and Exercise Science)	3
Bachelor of Arts Honours in Sport, Recreation and Exercise Science	BAHons (Sport, Recreation and Exercise Science)	1
Bachelor of Arts Honours in Biokinetics	BAHons (Biokinetics)	1
Bachelor of Science Honours in Biokinetics	BScHons (Biokinetics)	1
Master of Arts in Biokinetics	MA (Biokinetics)	1
Master of Science in Biokinetics	MSc (Biokinetics)	1
Master of Arts in Sport, Recreation and Exercise Science	MA (Sport, Recreation and Exercise Science)	1
Master of Philosophy in Sport for Development	MPhil (Sport for Development)	1
Doctor of Philosophy	PhD	2

DIPLOMAS AND CERTIFICATES

Postgraduate Diploma in Child and Family Studies	PGDip (Child and Family Studies)	1
Postgraduate Diploma in Health Services Management	PGDip (Health Services Management)	1
Postgraduate Diploma in Interprofessional Education in Health	PGDip (Interprofessional Education in Health)	1
Postgraduate Diploma in Midwifery	PGDip (Midwifery)	1
Postgraduate Diploma in Nursing Education	PGDip (Nursing Education)	1
Postgraduate Diploma in Primary Care Nursing	PGDip (Primary Care Nursing)	1
Postgraduate Diploma in Public Health	PGDip (Public Health)	1
Postgraduate Diploma in Sport for Development	PGDip (Sport for Development)	1

*Please refer to the programme information for specialisations.

EXPLANATION OF THE NATIONAL QUALIFICATIONS FRAMEWORK

The National Qualifications Framework (NQF) is “a single integrated system for the classification, registration, publication and articulation of quality - assured national qualifications” as stipulated in Section 4 of the NQF Act, 2008 (Act No 67 of 2008).

The National Qualifications Framework (NQF) has ten levels of which Higher Education qualifications occupy 6 levels of the NQF, namely levels 5 to 10.

Levels 5 to 7 comprise the undergraduate qualifications (with the exception of the Professional Bachelor's degree at Level 8) and levels 8 to 10 comprise the postgraduate qualifications.

NQF LEVELS	QUALIFICATION TYPES
5	Higher Certificate
6	Advanced Certificate Diploma
7	Advanced Diploma Bachelor's Degree
8	Honours Degree Postgraduate Diploma Professional Bachelor's Degree
9	Master's Degree Professional Master's Degree
10	Doctoral Degree Professional Doctoral Degree

As cited in the Higher Education Qualifications Sub-Framework (CHE, 2013)

FACULTY BOARD AND FACULTY OFFICE STAFF

FACULTY BOARD

Ex Officio Members: The Rector, Vice Rector/s, the Registrar and the Dean

Prof: O Akintola, M Andipatin, B Andrews, M Bimerew, S Carelse, R Coetzee, T Crowley, FM Daniels, G Dykes, L Ennion, G Filies, M Florence, A George, L Hess-April, S Isaacs, M Jardim-Fourie, F Karachi, D Kaura, M Keim, E Kunneke, L Leach, K Leisegang, P Martin, K Minnie, N Mlenzana, H Moss, T Mthembu, E Munnik, A Padmanabhanunni, E Rich, N Roman, M Sithole, M Smith, M Soeker, N Somhlaba, T Steyl, R Swart, H Tabana, M Van der Westhuizen, B Van Wyk, M Young

Drs: T Adonis, L Africa, F Akimanimpaye, W Amde, B Boggenpoel, J Campbell, O Casale, W Cassiem, R Davids, M De Jongh, C Erasmus, T Frank, J Hoffman, MA Hoosen, A Human-Hendricks, C Johannes, M Lembani, N Luleleko, X Ma, M Malema, V Matthews, JJ Musafiri, A Mwanda, L Nyati, A Nyembezi, J Ras, U September, N Solomons, V Ticha, L Tsolekile, L Tucker, T Williams, H Witten, L Van Der Berg, Z Yassin-Burns

Messrs: G Achmat, B Arries, B Boggenpoel, A Delpont, B Faroo, S Gawulayo, S Hendricks, K Jackson, A Mandlana, L Maphumulo, L Mlangeni, T Noncungu, G Nyirenda, A Petersen, M Safodien, N Sayed, R Schippers, M Smith, G Smithdorf

Mmes: J Abubu, R Adams, V Adonis, M Alexander, T Bell, F Brey, J Cornelissen, T Du Toit, S Ellis, F Firfirey, R Fisher, C Fortune, L Fürst, S Gamiet, M Goba, M Gqada, J Hendricks, Z Herandien, M Hoffman, F Jaffer, C Jaganath, V Johnson, A Kalam, H Karriem, A Khan, R Krynauw, L Le Roux, V Madasa, H Mokone, M Naidoo, I Noordien, Z Noordien, C Raats, A Robertson, K Rutgers, M Salo, D Sih, I Sonn, S Stirrup, A Swart, L Tengeh, J Van der Berg, B Westberg, M Willemse, R Zyster

One representative each from the Faculties of Natural Sciences, Economic and Management Sciences, Education, Law, Arts and Humanities, Dentistry and the Student Faculty Council.

FACULTY OFFICE STAFF

Dean:	Prof A Padmanabhanunni, MA Counselling Psychology (Rhodes University) PhD (Rhodes University) Registered Counselling Psychologist

RULES FOR PROGRAMMES

BACHELOR OF ARTS IN SPORT, RECREATION AND EXERCISE SCIENCE (8061)

J.1 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Arts in Sport, Recreation and Exercise Science Degree - BA (Sport, Recreation and Exercise Science)**:

J.1.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 30 points calculated according to the University's approved points system, as well as the following specific subject requirements:

- Level 4 (50-59%) in English (Home or First Additional Language), and
- Level 3 (40-49%) in another Language (Home or First Additional Language), and
- Level 3 (40-49%) in Mathematics or Level 4 (50-59%) in Mathematical Literacy

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.1.2 Minimum admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:

- HG (40%, E symbol) Mathematics or SG (50%, D symbol) Mathematics, and
- HG (40%, E symbol) Biology or SG (50%, D symbol) Biology, or
- HG (40%, E symbol) Physical Science or SG (50%, D symbol) Physical Science

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.1.3 Alternative admission

Alternative admission requirements for applicants in terms of Recognition of Prior Learning (RPL)

An applicant who completed the NSC in 2008 or thereafter, but has not obtained an endorsement, shall be considered for alternative admission after the age of 23. Such an applicant shall be required to complete an RPL portfolio development course and submit to a process where relevant learning and/or experience shall be assessed.

An applicant who is 23 years or older and does not have a matriculation certificate or NSC, but who may have obtained other qualifications or experience that may be deemed to be equivalent to admission criteria for the particular study programmes shall also be required to complete an RPL portfolio development course or an RPL portfolio process as agreed upon, and to submit to a process where such learning, qualification, and/or experience shall be assessed.

J.2 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty. Only a limited number of students can be admitted to the programme.

J.3 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over three years full-time.

J.4 CURRICULUM

J.4.1 Level 1

Module Name	Module Code	Credits

J.5 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.6 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.6.1 Level 1

A student shall be promoted to Level 2 of study on obtaining 90 credits at Level 1, provided they have passed at least 45 credits from Group 1, which must include one theory module (15 credits) and two practical modules (30 credits), obtain at least 15 credits from Group 2 and must pass all modules from Group 3 (electives).

J.6.2 Level 2

A student shall be promoted to Level 3 of study on obtaining 210 credits at Level 2, provided they have passed all Level 1 modules and passed at least 60 credits from Group 1.

J.6.3 Level 3

A student shall complete the degree once a total of 360-365 credits are obtained (depending on the major chosen) and all requirements for the degree are met.

J.7 ADVANCE REGISTRATION

J.7.1 Level 1

A student may only anticipate modules at the next level if they do not have more than 45 credits to make up at the current or lower level, provided that the student does not take more than 90 credits in total, consisting of repeating credits plus anticipated credits provided that the pre-requisites are met and there are no timetable clashes.

J.7.2 Level 2

A student may only register for Level 3 modules if all Level 1 modules have been passed, if they do not have more than 45 credits to make up at the current or lower level, provided that the student does not take more than 90 credits in total, consisting of repeating credits plus anticipated credits provided that the pre-requisites are met and there are no timetable clashes.

J.8 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.9 SPECIAL REQUIREMENTS FOR THE PROGRAMME

No re-evaluation shall be allowed for practical modules that are assessed continuously.

BACHELOR OF COMMUNITY DEVELOPMENT (8415)

J.10 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Community Development Degree – B (Community Development)**:

J.10.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 30 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home Language) or Level 5 (60-69%) in English (First Additional Language),
 - Level 4 (50-59%) in another Language (Home or First Additional Language), and
 - Level 3 (40-49%) in Mathematics or Level 4 (50-59%) in Mathematical Literacy

OR

- (b) Occupational Certificate: Community Development Practitioner (NQF L5 – SAQA ID 97691)

OR

- (c) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) and (b) above.

J.10.2 Alternate admission requirements for applicants who passed Grade 12 before 2008

Students without Matriculation Exemption may be allowed into the programme if:

- a) they have the National Certificate: Community Development (NQF level 5), SAQA ID:80946 and may be required to write The National Benchmark Test (NBT)

OR

- b) as Senate Discretionary students and may be required to write The National Benchmark Test (NBT)

OR

- c) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above

J.10.3 Alternative admission requirements for applicants in terms of Recognition of Prior Learning (RPL)

An applicant who completed the NSC in 2008 or thereafter, but has not obtained an endorsement, shall be considered for alternative admission after the age of 23. Such an applicant shall be required to complete an RPL portfolio development course and submit to a process where relevant learning and/or experience shall be assessed.

An applicant who is 23 years or older and does not have a matriculation certificate or NSC, but who may have obtained other qualifications or experience that may be deemed to be equivalent to admission criteria for the particular study programmes shall also be required to complete an RPL portfolio development course or an RPL portfolio process as agreed upon, and to submit to a process where such learning, qualification, and/or experience shall be assessed.

J.11 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty. Only a limited number of students can be admitted to the programme.

J.12 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over four years full-time.

J.13 CURRICULUM

J.14 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.15 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.15.1 Level 1

A student shall be promoted to Level 2 of study on obtaining at least 95 credits out of 120 credits at Level 1, which must include Community Development in Context 111 (CDE111), Introduction to Sustainable Community Development 112 (CDE112), Local Governance (FSH127), Organisational Development (FSH123), South African Politics and Government (GOV132), Introduction to Public and Local Government Administration and Management (PUA131), Introduction to Sociology (SOC151) and Contemporary Sociology Worlds (SOC152).

J.15.2 Level 2

A student shall be promoted to Level 3 of study on obtaining at least 130 credits at Level 2, provided they have passed all prescribed modules at year Level 1, and provided that a student has passed all the outstanding Level 1 modules, including Introduction to Ethical Theory and Practice 111 (ETH111) (15 credits) and English for Educational Development 111 (EED111) (10 credits).

J.15.3 Level 3

A student shall be promoted to Level 4 of study on obtaining at least 385 credits (including Levels 1 - 3 credits), provided that all prescribed modules at Level 3 have been passed, and provided that the credits for the elective streams (Level 2 and Level 3) have been obtained.

J.15.4 Level 4

A student shall complete the degree on obtaining 510 credits and all requirements for the degree are met.

J.16 ADVANCE REGISTRATION

J.16.1 A student may only register for modules in advance at the next level if they do not have more than 45 credits outstanding to promote, excluding Community Development modules.

J.16.2 A repeating student (who have not promoted) should not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, excluding Community Development modules and provided the pre-requisites are met and there are no timetable clashes.

J.17 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.18 SPECIAL REQUIREMENTS FOR THE PROGRAMME

No re-evaluation shall be allowed for practical modules that are assessed continuously.

BACHELOR OF SCIENCE IN DIETETICS (8231)

J.19 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Science in Dietetics Degree - BSc (Dietetics)**:

J.19.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 33 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home or First Additional Language), and
 - Level 3 (40-49%) in another Language (Home or First Additional Language), and
 - Level 4 (50-59%) in Life Sciences, and
 - Level 4 (50-59%) in Mathematics or Level 6 (70-79%) in Mathematical Literacy

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.19.2 Minimum admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:
- HG (40%, E symbol) Mathematics or SG (50%, D symbol) Mathematics, and
 - HG (40%, E symbol) Biology or SG (50%, D symbol) Biology, or
 - HG (40%, E symbol) Physical Sciences or SG (50%, D symbol) Physical Sciences

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.19.3 Alternative admission

Alternative admission does not apply to this programme.

J.20 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty. Only a limited number of students can be admitted to the programme.

J.21 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over four years full-time.

J.23 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.24 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.24.1 Level 1

A student shall complete all Level 1 modules (120 credits) in order to promote to Level 2 of study.

J.24.2 Level 2

A student shall complete all Level 2 modules (255 credits) in order to promote to Level 3 of study.

J.24.3 Level 3

A student shall complete all Level 3 modules (375 credits) in order to promote to Level 4 of study.

J.24.4 Level 4

A student shall complete the degree once 510 credits are obtained and all the requirements for the degree are met.

J.25 ADVANCE REGISTRATION

J.25.1 Level 1

- J.25.1.1** If a student does not promote to Level 2 of study, the student may be allowed to register for Level 2 modules to the value of 50 credits, provided that they have obtained at least 90 credits at Level 1 and that the pre-requisites listed in J.28 are met and there are no timetable clashes.

- J.25.1.2** If a student does not promote to Level 2 of study as a result of failing only one module at Level 1, and if the student qualifies to register for the failed module as an associate student, the student shall not be promoted to the next level, but may be allowed to register for all Level 2 modules together with the failed module.

J.25.2 Level 2

- J.25.2.1** If a student does not promote to Level 3 of study, the student may be allowed to register for DIE317 and NUT344 at Level 3 provided that they have completed all Level 1 modules and obtained at least 90 credits at Level 2 and there are no timetable clashes.

- J.25.2.2** If a student does not promote to Level 3 of study as a result of failing only one module at Level 2, and if the student qualifies to register for the failed module as an associate student, the student shall not be promoted to the next level, but may be allowed to register for all Level 3 modules together with the failed module.

J.25.3 Level 3

If a student does not promote to Level 4 of study, the student may be allowed to register for STA501, DIE414 and DIE425 at Level 4, provided that they have completed all Level 2 modules and obtained at least 90 credits at Level 3 and there are no timetable clashes.

J.26 RENEWAL OF REGISTRATION

- J.26.1** Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

- J.26.2** The following conditions shall also apply to the renewal of registration in this programme:

- J.26.2.1** Where a student interrupted their studies for more than one academic year, and where the curriculum or module content has changed, the student shall be expected to register for the additional module(s) or attend classes and write additional tests/ assignments on work not covered during their time of study.

- J.26.2.2** Where a student interrupted their studies between Levels 3 and 4 of study for more than one academic year, such a student shall be evaluated in order to assess their existing competency Level.

- J.26.2.3** Where the student does not meet Level 4 competence, additional module(s) or assignments may be prescribed and their internship may be extended.

J.27 SPECIAL REQUIREMENTS FOR THE PROGRAMME

- J.27.1** A student must, in accordance with the requirements of the Health Professions Council of South Africa (HPCSA), register as a dietetics student within two months after admission to the programme. Full particulars are available from the Department of Dietetics.

- J.27.2** Skills practice is included from Level 1. Level 4 consists of a full-time internship in therapeutic nutrition, community nutrition and food service management.
- J.27.3** Persons, who possess sufficient skills to meet the entry requirements at the appropriate NQF level, must apply to the Department of Dietetics and Nutrition for recognition of these qualifications.
- J.27.4** Except where otherwise indicated, modules in which a practical examination is taken require a sub-minimum of 40% in the practical part.
- J.27.5** Except where otherwise indicated a student shall obtain a sub-minimum of 40% in final examinations in order to pass a module.
- J.27.6** A student has to obtain a sub-minimum of 50% in the continuous assessment component of the professional practice modules on the fourth year Level i.e. DIE401; DIE402 and DIE403.
- J.27.7** If a student does not promote to the following year of study, they may be allowed to register for elective module(s) of their choice outside of the Dietetics curriculum to the value of 40 credits, provided that there are no timetable clashes with the compulsory modules from the Dietetics curriculum, and provided that the pre-requisites for the elective modules are met.

J.28 RESTRICTION ON CHOICE OF MODULES

- J.28.1** Restriction on registration for senior modules is governed by the statement of skills required for modules identified in Column B below i.e. either the module or the competency it gives is recommended before doing the senior modules specified in the corresponding column A below.

A
BTN216
BTN214
MBS231 & MBS232
PSE319 & PSE329

B
CHE116, CHM126 & LSC141
CHE116 & CHM126
LSC141 & MBS121
MBS231 & MBS232

A
DIE316 & DIE326
DIE312 & DIE322
DIE313 & DIE323

B
NUT211 & NUT221
NUT211 & NUT221
NUT211 & NUT221

A

DIE402
DIE403
DIE404

B
DIE316 & DIE326
DIE312 & DIE322
DIE313 & DIE323
DIE317 & NUT344

- J.28.2** NUT211, NUT221 can only be taken with BTN216 and MBS231, MBS232 or if these modules have been completed in advance.
- J.28.3** PCL315 and PSE319, PSE329 shall only be taken simultaneously with DIE316 and DIE326 because they are coordinated modules.

J.28.4 Dietetics Skills Practice at each year level shall only be taken simultaneously with the Dietetics modules at that particular year Level, because they are coordinated modules.

J.28.5 All BSc Dietetics students will be placed in internship (clinical placement) settings as from Monday, 12 January 2026 as well as during ALL the UWC vacation periods until Friday, 18 December 2026.

Clinical placement dates as per 2026 UWC Calendar are indicated below:

January Vacation	Monday, 12 January 2026: Clinical Placement Commences and Residences Open for Dietetics students on Friday, 09 January 2026
Mid-year vacation	Vacation: Monday, 06 July 2026 - Friday 17 July 2026 Clinical Placements Commences on Monday, 20 July 2026 and Residence open for Dietetics students on Friday, 17 July 2026
December vacation	Friday, 18 December 2026: Clinical Placement closes and Residences close for Dietetics students

BACHELOR OF SCIENCE IN OCCUPATIONAL THERAPY (8111)

J.29 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Science in Occupational Therapy Degree - BSc (Occupational Therapy)**:

J.29.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 33 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home or First Additional Language), and
 - Level 3 (40-49%) in another Language (Home or First Additional Language), and
 - Level 4 (50-59%) in Life Sciences, and
 - Level 3 (40-49%) in Mathematics or Level 5 (60-69%) in Mathematical Literacy

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.29.2 Minimum admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:
- HG (40%, E symbol) Biology or SG (50%, D symbol) Biology, or
 - HG (40%, E symbol) Life Sciences or SG (50%, D symbol) Life Sciences, and
 - HG (40%, E symbol) Mathematics or SG (50%, D symbol) Mathematics

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.29.3 Alternative admission

J.29.3.1 Alternative admission requirements for applicants who passed Grade 12 from 2008

- (a) The National Senior Certificate for Diploma Study with a score of no fewer than 23 points calculated according to the University's approved points system.
- (b) An applicant may be required to write the National Benchmark Test (NBT).

OR

- (c) A qualification or level of competence that the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) and (b) above.

J.29.3.2 Alternative admission requirements for applicants who passed Grade 12 before 2008

- (a) An applicant without a Matriculation Exemption may be allowed into the programme at Senate's discretion.

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.29.3.3 Alternative admission requirements for applicants in terms of Recognition of Prior Learning (RPL)

An applicant who completed the NSC in 2008 or thereafter, but has not obtained an endorsement, shall be considered for alternative admission after the age of 23. Such an applicant shall be required to complete an RPL portfolio development course and submit to a process where relevant learning and/or experience shall be assessed.

An applicant who is 23 years or older and does not have a matriculation certificate or NSC, but who may have obtained other qualifications or experience that may be deemed to be equivalent to admission criteria for the particular study programmes shall also be required to complete an RPL portfolio development course or an RPL portfolio process as agreed upon, and to submit to a process where such learning, qualification, and/or experience shall be assessed.

J.30 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty. Only a limited number of students can be admitted to the programme .

J.31 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over four years of full-time study.

J.33 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.34 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.34.1 Level 1

In order to promote to Level 2 of study, a student must obtain at least 90 credits and pass all modules in Group 1 and Group 3.

J.34.2 Level 2

In order to promote to Level 3 of study, a student must obtain at least 260 credits.

J.34.3 Level 3

In order to promote to Level 4 of study, a student must obtain at least 380 credits.

J.34.4 Level 4

A student shall complete the degree once 500 credits are obtained and all the requirements for the degree are met.

J.35 ADVANCE REGISTRATION

J.35.1 Level 1

A student may only anticipate modules at the next level if they do not have more than 45 credits to make up at the current or lower level, provided that the student does not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, and provided that the pre-requisites are met and there are no timetable clashes.

J.35.2 Level 2

A student may only anticipate modules at the next level if they do not have more than 45 credits to make up at the current or lower level, provided that the student does not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, and provided that the pre-requisites are met and there are no timetable clashes.

J.35.3 Level 3

A student may only anticipate modules at the next level if they do not have more than 45 credits to make up at the current or lower level, provided that the student does not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, and provided that the pre-requisites are met and there are no timetable clashes.

J.36 RENEWAL OF REGISTRATION

J.36.1 Renewal of registration shall be governed by Rule A.3.2.3 as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.36.2 The following alternative conditions shall also apply for the renewal of registration in this programme:

J.36.2.1 A student, who has failed a year of study twice in the professional subjects, shall be refused readmission to the programme.

J.36.2.2 A level 4 student who obtains less than 50% as a final mark after the re-evaluation and thus obtains 95 or more credit points, must complete a further six months of study to obtain the degree.

J.36.2.3 A level 4 student who obtains 94 credit points or below, must complete a further full year of study to obtain the degree.

J.37 SPECIAL REQUIREMENTS FOR THE PROGRAMME

J.37.1 A student shall not be admitted to the Level 4 final examination unless a minimum of one thousand hours of prescribed fieldwork in the professional subjects has been completed over the four years of the programme.

J.37.2 Due to an integrated and group teaching approach the attendance of all lectures and practicals of the professional modules and fieldwork are compulsory.

J.37.3 All BSc Occupational Therapy students will be placed in clinical settings as from Monday, 5 January 2026 as well as during ALL the UWC vacation periods until Friday, 18 December 2026.

J.37.4 Due to the integrated nature of the fieldwork modules and exams, there are no Supplementary or Senate Discretionary Assessments for fieldwork modules.

J.37.5 A student must in accordance with the requirements of the Health Professions Council of South Africa (HPCSA), register as an occupational therapy student within two months after admission to the programme. Full particulars are available from the

J.37.6 It is compulsory for all Level three students to provide clearance certificates from both the National Sexual Offenders' Register using Form 8 and National Child Protection Register using Form 30 in order to attend the clinical platform.

J.37.7 In accordance with the Health Professions Council of South Africa (HPCSA), all Level four students must have a First Aid (Level 1) certification (or equivalent).

Clinical placement dates as per 2026 UWC Calendar are indicated below:

January Vacation	Monday, 5 January 2026: Clinical Placement Commences and Residences Open for OT students (on the same date as the UWC offices open annually)
April recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
Mid-year vacation	As per dates in the 2026 UWC General Calendar Terms and Almanac
September recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
December vacation	Friday, 18 December 2026: Clinical Placement closes and Residences close for OT students

BACHELOR OF SCIENCE IN PHYSIOTHERAPY (8211)

J.38 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Science in Physiotherapy Degree - BSc (Physiotherapy)**:

J.38.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 39 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home or First Additional Language), and
 - Level 3 (40-49%) in another Language (Home or First Additional Language), and
 - Level 4 (50-59%) in Mathematics or Level 6 (70-79%) in Mathematical Literacy, and
 - Level 4 (50-59%) in Life Sciences, and
 - Level 4 (50-59%) in Physical Sciences

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.38.2 Minimum admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:
- HG (40%, E symbol) Mathematics or SG (50%, D symbol) Mathematics, and
 - HG (40%, E symbol) Biology or SG (50%, D symbol) Biology, or
 - HG (40%, E symbol) Physical Sciences or SG (50%, D symbol) Physical Sciences

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.38.3 Alternative admission

J.38.3.1 Alternative admission requirements for applicants who passed Grade 12 from 2008

- (a) The National Senior Certificate for Diploma Study with a score of no fewer than 23 points calculated according to the University's approved points system.

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.38.3.2 Alternative admission requirements for applicants who passed Grade 12 before 2008

- (a) An applicant without a matriculation exemption may be allowed into the programme at Senate's discretion and may be required to write the National Benchmark Test (NBT).

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above

J.38.3.3 Alternative admission requirements for applicants in terms of Recognition of Prior Learning (RPL)

An applicant who completed the NSC in 2008 or thereafter, but has not obtained an endorsement, shall be considered for alternative admission after the age of 23. Such an applicant shall be required to complete an RPL portfolio development course and submit to a process where relevant learning and/or experience shall be assessed.

An applicant who is 23 years or older and does not have a matriculation certificate or NSC, but who may have obtained other qualifications or experience that may be deemed to be equivalent to admission criteria for the particular study programmes shall also be required to complete an RPL portfolio development course or an RPL portfolio process as agreed upon, and to submit to a process where such learning, qualification, and/or experience shall be assessed.

J.39 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty. Only a limited number of students can be admitted to the programme.

J.40 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over four years full-time.

J.41 CURRICULUM

J.41.1 Level 1

Module Name	Module Code	Credits
Group 1		
Physiotherapy Techniques I 100	PHT100	10
Analysis of Posture and Movement and Kinetic Handling 111	PHT111	15
Exercise to Promote Health 200	PHT200	10
Group 2		
Human Biology 117	HUB117	15
Human Biology 127	HUB127	15

Group 3

Computer Literacy 111	CCL111	5
Primary Health Care 122	HDP122	10
Physics for Physiotherapy 106	PHY106	15
Introduction to Psychology 111	PSY111	7.5
Brain and Behaviour 112	PSY112	7.5
English for Education Development 121 (CHS)	EED121	10
Total		120

J.41.2 Level 2

Module Name	Module Code	Credits
Group 1		
Physiotherapy Clinical Practice 110	PHT110	15
Applied Physiotherapy A 212	PHT212	10
Applied Physiotherapy B 221	PHT221	10
Movement Science 245	PHT245	15

Study of Human Development 211	PSY211	10
Community Psychology 223	PSY223	5
Health Psychology 224	PSY224	5
Total		135

J.41.3 Level 3

Module Name	Module Code	Credits
Applied Physiotherapy 318	PHT318	30
Community Based Rehabilitation 310	PHT310	10
Physiotherapy Techniques 311	PHT311	20
Movement Science 319	PHT319	10
Physiotherapy Clinical Practice 316	PHT316	40
Introduction to Research Methodology 317	PHT317	10
Total		120

J.41.4 Level 4

Module Name	Module Code	Credits
Management (PT) 401	PHT401	10
Ethics (PT) 402	PHT402	10
Applied Physiotherapy 403	PHT403	30
Research Project (PT) 404	PHT404	10
Physiotherapy Clinical Practice 405	PHT405	60
Total		120
FINAL TOTAL		495

* A student who has obtained an A or B symbol in English at Grade 12 Level is required to do either Xhosa or Afrikaans.

J.42 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.43 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.43.1 Level 1

In order to promote to Level 2 of study a student must obtain at least 100 credits, and pass all modules in Group 1 and Group 2.

J.43.2 Level 2

In order to promote to Level 3 of study a student must obtain 255 credits.

J.43.3 Level 3

In order to promote to Level 4 of study a student must obtain 375 credits.

J.43.4 Level 4

A student shall complete the degree once 495 credits are obtained and all the requirements for the degree are met.

J.44 ADVANCE REGISTRATION

J.44.1 Level 1

A student who does not promote to Level 2 of study may, in consultation with the department be allowed to register for certain Level 2 modules (no more than 45 credits) as long as the total number of credits registered for do not exceed 90 credits, provided that the co-requisites and pre-requisites are met and there are no timetable clashes.

J.44.2 Level 2

A student who does not promote to Level 3 of study may, in consultation with the department be allowed to register for certain Level 3 modules (no more than 45 credits) as long as the total number of credits registered for do not exceed 90 credits, provided that the co-requisites and pre-requisites are met and there are no timetable clashes.

J.45 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.46 SPECIAL REQUIREMENTS FOR THE PROGRAMME

- J.46.1** A student must, in accordance with the requirements of the Health Professions Council of South Africa (HPCSA), register as a physiotherapy student within two months after admission to the programme. Full particulars are available from the Faculty or the Registrar of the University.
- J.46.2** A student shall be required to complete Clinical Practice as prescribed by the department. In Clinical Practice, a student must obtain a final mark of 50% as well as a 50% coursework mark.
- J.46.3 To enter clinical examinations**
- J.46.3.1** A student needs 50% in clinical examination.
- J.46.3.2** A Level 3 student needs to pass 2 of the 3 end of clinical block examination.
- J.46.3.3** A Level 4 student needs to pass 3 of the 4 end of clinical block examination.
- J.46.3.4** All BSc (Physiotherapy) students will be placed in clinical settings as from Monday, 12 January 2026 as well as during ALL the UWC vacation periods until Friday, 18 December 2026.

Clinical placement dates as per 2026 UWC Calendar are indicated below:

January Vacation	Monday, 12 January 2026: Teaching and Clinical Placement Commences and Residences Open for Physio students (on the same date as the UWC offices open annually)
April recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
Mid-year vacation	As per dates in the 2026 UWC General Calendar Terms and Almanac
September recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
December vacation	Friday, 18 December 2026: Clinical Placement closes and Residences close for Physio students

BACHELOR OF SCIENCE IN SPORT AND EXERCISE SCIENCE (8051)

J.47 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Science in Sport and Exercise Science Degree - BSc (Sport and Exercise Science)**:

J.47.1 Admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 33 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home or First Additional Language), and
 - Level 3 (40-49%) in another Language (Home or First Additional Language), and
 - Level 4 (50-59%) in Mathematics or Level 6 (70-79%) in Mathematical Literacy, and
 - Level 4 (50-59%) in Life Sciences

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.47.2 Admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:
- HG (40%, E symbol) Mathematics or SG (50%, D symbol) Mathematics, and
 - HG (40%, E symbol) Biology or SG (50%, D symbol) Biology, or
 - HG (40%, E symbol) Physical Science or SG (50%, D symbol) Physical Science

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above

J.47.3 Alternative admission

Alternative admission requirements for applicants in terms of Recognition of Prior Learning (RPL)

An applicant who completed the NSC in 2008 or thereafter, but has not obtained an endorsement, shall be considered for alternative admission after the age of 23. Such an applicant shall be required to complete an RPL portfolio development course and submit to a process where relevant learning and/or experience shall be assessed.

An applicant who is 23 years or older and does not have a matriculation certificate or NSC, but who may have obtained other qualifications or experience that may be deemed to be equivalent

to admission criteria for the particular study programmes shall also be required to complete an RPL portfolio development course or an RPL portfolio process as agreed upon, and to submit to a process where such learning, qualification, and/or experience shall be assessed.

J.48 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty. Only a limited number of students can be admitted to the programme.

J.49 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over three years full-time.

J.51 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.52 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.52.1 Level 1

A student shall be promoted to Level 2 of study on obtaining 125 credits and passing all the prescribed Level 1 modules.

J.52.2 Level 2

A student shall be promoted to Level 3 of study on obtaining 245 credits and passing all the prescribed Level 2 (or lower) modules.

J.52.3 Level 3

A student shall complete the degree once 365 credits are obtained and all the requirements for the degree are met.

J.53 ADVANCE REGISTRATION

A student may only anticipate modules at the next level if they do not have more than 45 credits to make up at the current or lower level, provided that the student does not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, and provided that the pre-requisites are met and there are no timetable clashes.

J.54 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.55 SPECIAL REQUIREMENTS FOR THE PROGRAMME

No re-evaluation shall be allowed for practical modules that are assessed continuously.

BACHELOR OF NURSING (8312)

J.56 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Nursing Degree – BNurs**:

J.56.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 30 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home or First Additional Language), and
 - Level 3 (40-49%) in another Language (Home or First Additional Language), and
 - Level 4 (50-59%) in Life Sciences, and
 - Level 4 (50-59%) in Mathematics or Level 6 (70-79%) in Mathematical Literacy

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.56.2 Admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:
- HG (40%, E symbol) English or SG (50%, D symbol) English, and
 - HG (50%, D symbol) Mathematics or SG (60%, C symbol) Mathematics, and
 - HG (40%, E symbol) Biology or SG (50%, D symbol) Biology or
 - HG (40%, E symbol) Physical Sciences or SG (50%, D symbol) Physical Sciences

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.56.3 Recognition of Prior Learning:

South African Nursing Council Policy statement on RPL

According to the South African Nursing Council Circular No. 9/2013, "The SANC commits itself to ensure that all its accredited providers of nursing education implement RPL and that applicants gain access to nursing education through a credible RPL system." According to SANC a maximum of 10% of applicants may enter the programme through RPL.

J.57 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.58 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over four years full-time. Only a limited number of students can be admitted to the programme.

J.59 CURRICULUM

J.59.1 Level 1

Module Name	Module Code	Credits
Chemistry 119	CHM119	10
Primary Health Care 122	HDP122	10

	FINAL TOTAL	505

J.60 ASSESSMENT

J.60.1 Assessment is governed by Rule A.5.2 in the General Calendar Part 1,

J.60.1.1 For Level 1, a student shall not be admitted to the first semester final assessment unless 80% of the specified clinical hours for semester one is completed.

J.60.1.2 For Levels 2, 3 and 4 a student shall not be admitted to the first semester final assessment unless 80% of the specified clinical hours for semester one as well as the outstanding 20% clinical hours of semester two of the preceding year is completed.

J.60.1.3 For all levels, a student shall not be admitted to the second semester final assessment unless 80% of the specified clinical hours for semester two is completed and as well as the outstanding 20% clinical hours of semester one.

J.60.2. Assessment Types

J.60.2.1 Theory

Theory shall be assessed on a continuous basis in the form of tests, individual and group assignments, tutorials, presentations and projects amongst other.

J.60.2.2 Clinical

The clinical component of modules, where applicable, shall be assessed continuously in the form of individual clinical skills competency tests and Objective Structured Clinical Examinations (OSCEs).

J.60.2.3 Final assessment

The summative assessment in this instance refers to the final assessment for a module which is in the form of a formal written and / or a clinical examination.

J.60.2.4 Integrated assessment

Integrated assessments are conducted for modules with a substantial clinical component. In such instances, a student shall be required to pass both the theoretical and clinical parts of the assessment independently.

J.61 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.61.1 Level 1

In order to promote to Level 2 of study a student must obtain 90 credits at Level 1. Notwithstanding the above, a student may only carry 30 credits from the modules listed below:

Chemistry (CHM119) (10), Physics (PHY118) (15), Primary Health Care 122 (HDP122) (10), and Introduction to Mental Health (NRS122) (10).

J.61.2 Level 2

In order to promote to Level 3 of study a student must obtain a total of 100 credits at Level 2. No Level 1 modules may be carried to Level 3. Notwithstanding this, a student may only carry the modules listed below:

Introduction to Research (NRS202) (10) and Child Health (NRS216) (15)

J.61.3 Level 3

No Levels 1 and 2 modules may be carried to Level 4. A student shall be promoted to Level 4 of study only if the student has successfully completed all the relevant modules for Level 3. The exception is in the case of a student obtaining associate status for the module listed below: Mental Health Nursing (NRS322) (20)

J.61.4 Level 4

A student shall complete the degree when all modules has been passed and 505 credits have been obtained and all the requirements for the degree are met. In addition, a total of 2500 clinical hours must be completed.

J.62 ADVANCE REGISTRATION

The following advance registration applies depending on completion of work integrated learning:

J.62.1 Level 1

A student who repeats Level 1 with no more than 50 credits outstanding, may register in advance for: Introduction to Research (NRS202) (10)

J.62.2 Level 2

A student who repeats Level 2 with no more than 60 credits outstanding, may register in advance for: Mental Health Nursing (NRS322) (20) provided that the co-requisites and pre-requisites are met and there are no timetable clashes.

J.62.3 Level 3

A student who repeats Level 3 with no more than 70 credits outstanding, may register in advance for: Comprehensive Primary Health Care (NRS413) (30) provided that the corequisites and pre-requisites are met and there are no timetable clashes.

J.63 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3 as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.64 SPECIAL REQUIREMENTS FOR THE PROGRAMME

- J.64.1** A student must be registered with the South African Nursing Council (SANC), in accordance with its requirements as a nursing student within 30 days of the date of commencement of study.

The following documents must be submitted on registration:

(NB. Certification date of documents may not be older than three months on the date of registration)

South African students:

- Certified copy of ID
- Certified copy of matriculation certificate
- Marriage certificate (if applicable)
- In case of Extended Curriculum Programme (ECP) students, certified copy of academic record of first-year ECP
- SANC Learner Registration application fee must be paid at the UWC cashiers (main campus) into entity BD0200011 (NB. Use your student number as reference)
- Receipt of payment for SANC Learner Registration must be submitted to the year level Administrator within the first two weeks of commencement of the programme in order for the School of Nursing to process and submit the Learner Registration application to SANC within the stipulated time.

International students:

- Certified copy of identification documents (Passport/ refugee status/ asylum seeker permit)
- Valid study permit for those with passports
- Certified copy of high school results (English translation)
- SAQA Certificate
- USAf exemption Certificate
- SANC Learner Registration application fee must be paid at the UWC cashiers (main campus) into entity BD0200011 (NB. Use your student number as reference)
- Receipt of payment for SANC Learner Registration must be submitted to the year level Administrator within the first two weeks of commencements of the programme in order for the School of Nursing to process and submit the Learner Registration application to SANC within the stipulated time.

- J.64.2** A student must secure professional indemnity before they can practice as a student nurse in specified clinical settings.
- J.64.3** It is compulsory for all first-year students to submit proof that they have had the Hepatitis B vaccine before the commencement of the second term of the academic year.
- J.64.4** It is compulsory for all first-year students to provide clearance certificates from both the National Sexual Offenders' Register using Form 8 and National Child Protection Register using Form 30 - **before registration with UWC**. Thereafter these clearance certificates must be **renewed annually before registration for each subsequent year of study with UWC**.
- J.64.5** No student shall be admitted to the final assessment of any level unless 80% of the specified clinical practice hours have been completed by the deadline for the announcement of continuous assessment marks for the semester/year.
- At Level 4 no student shall be admitted to the final assessment unless specified clinical learning hours of prior Levels 1, 2, and 3 are completed.
- J.64.6** Except where otherwise indicated, modules in which a practical examination is taken require a sub-minimum of 40% in the practical component.
- J.64.7** A student shall be required to complete all clinical practice hours as prescribed by the School of Nursing.
- J.64.8** All BNurs students will be placed in clinical settings as from Monday, 12 January 2026 as well as during ALL the UWC vacation periods until Friday, 18 December 2026. This is part of students' clinical placement to achieve the requisite Work Integrated Learning (WIL) hours for SANC.

Clinical placement dates as per 2026 UWC Calendar are indicated below:

January Vacation	Sunday, 11 January 2026: Clinical Placement commences and Residences open for BNurs students
April recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
Mid-year vacation	Saturday, 05 July to Sunday, 19 July 2026: Mid-year clinical placement
September recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
December vacation	Wednesday, 02 December 2026: Clinical Placement closes and Residences close for BNurs students

BACHELOR OF NURSING (EXTENDED CURRICULUM PROGRAMME - 8313)

J.65 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Nursing Degree – BNurs**:

J.65.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree Study with a score of no fewer than 30 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home or First Additional Language), and
 - Level 3 (40-49%) in another Language (Home or First Additional Language), and
 - Level 4 (50-59%) in Life Sciences, and
 - Level 4 (50-59%) in Mathematics or Level 6 (70-79%) in Mathematical Literacy

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.65.2 Minimum admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:
- HG (40%, E symbol) English or SG (50%, D symbol) English, and
 - HG (50%, D symbol) Mathematics or SG (60%, C symbol) Mathematics, and
 - HG (40%, E symbol) Biology or SG (50%, D symbol) Biology, or
 - HG (40%, E symbol) Physical Sciences or SG (50%, D symbol) Physical Sciences

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.65.3 Recognition of Prior Learning:

South African Nursing Council Policy statement on RPL

According to the South African Nursing Council Circular No. 9/2013, "The SANC commits itself to ensure that all its accredited providers of nursing education implement RPL and that applicants gain access to nursing education through a credible RPL system." According to SANC a maximum of 10% of applicants may enter the programme through RPL.

J.66 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty. Only a limited number of students can be admitted to the programme.

J.67 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over five years full-time.

J.69 ASSESSMENT

J.69.1 Assessment is governed by Rule A.5.2 in the General Calendar, Part 1.

J.69.1.1 For Level 1, a student shall not be admitted to the first semester final assessment unless 80% of the specified clinical hours for semester one is completed.

J.69.1.2 For Levels 2, 3, 4 and 5 a student shall not be admitted to the first semester final assessment unless 80% of the specified clinical hours for semester one as well as the outstanding 20% clinical hours of semester two of the preceding year is completed.

J.69.1.3 For all levels, a student shall not be admitted to the second semester final assessment unless 80% of the specified clinical hours for semester two is completed and as well as the outstanding 20% clinical hours of semester one.

J.69.2 Assessment types

J.69.2.1 Theory

Theory shall be assessed on a continuous basis in the form of tests, individual and group assignments, tutorials, presentations and projects amongst other.

J.69.2.2 Clinical

The clinical component of modules, where applicable, shall be assessed continuously in the form of individual clinical skills competency tests and Objective Structured Clinical Examinations (OSCEs).

J.69.2.3 Final assessment

The summative assessment in this instance refers to the final assessment for a module which is in the form of a formal written and / or a clinical examination.

J.69.2.4 Integrated assessment

Integrated assessments are conducted for modules with a substantial clinical component. In such instances, a student shall be required to pass both the theoretical and clinical parts of the assessment independently.

J.70 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.70.1 Level 1

In order to promote to Level 2 of study a student must obtain 40 credits at Level 1. Notwithstanding the above, a student may only carry 20 credits from the modules listed below:

Public Health Care (HDP122) (10), Introduction to Mental Health (NRS122) (10)

J.70.2 Level 2

No Level 1 modules may be carried to Level 3. In order to promote to Level 3 of study a student must obtain 42.5 credits at Level 2. Notwithstanding the above, a student may only carry 22.5 credits from the modules listed below:

Chemistry (CHM114) (15), Brain and Behavior (PSY112) (7.5) or Psychology of Child Development (PSY121) (7.5)

J.70.3 Level 3

No Level 2 modules may be carried to Level 4. In order to promote to Level 4 of study a student must obtain a total of 100 credits at Level 3. Notwithstanding this, a student may only carry the modules listed below:

Introduction to Research (NRS202) (10), Child Health (NRS216) (15)

J.70.4 Level 4

No Level 3 modules may be carried to Level 5. A student shall be promoted to Level 5 of study only if the student has successfully completed all the relevant modules for Level 4. The exception is in the case of a student obtaining associate status for the module listed below: Mental Health Nursing (NRS322) (20)

J.70.5 Level 5

A student shall complete the degree once 510 credits are obtained and all the requirements for the degree are met. In addition, a total of 2500 clinical practical hours must be completed.

J.71 ADVANCE REGISTRATION

The following advance registration applies depending on timetabling and completion of work integrated learning:

J.71.1 Level 1

No advance registration shall be permitted in Level 1.

J.71.2 Level 2

A student who repeats Level 2 with no more than 45 credits outstanding, may register in advance for: Introduction to Research (NRS202) (10)

J.71.3 Level 3

A student who repeats Level 3 with no more than 60 credits outstanding, may register in advance for: Mental Health Nursing (NRS322) (20) provided that the co-requisites and prerequisites are met and there are no timetable clashes.

J.71.4 Level 4

A student who repeats Level 4 with no more than 70 credits outstanding, may register in advance for: Comprehensive Primary Health Care (NRS413) (30) provided that the co-requisites and pre-requisites are met and there are no timetable clashes.

J.72 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3 as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.73 SPECIAL REQUIREMENTS FOR THE PROGRAMME

- J.73.1** A student must be registered with the South African Nursing Council (SANC), in accordance with its requirements as a nursing student within 30 days of the date of commencement of study.

The following documents must be submitted on registration:

(NB. Certification date of documents may not be older than three months on the date of registration)

South African students:

- Certified copy of ID
- Certified copy of matriculation certificate
- Marriage certificate (if applicable)
- In case of Extended Curriculum Programme (ECP) students, certified copy of academic record of first-year ECP
- SANC Learner Registration application fee must be paid at the UWC cashiers (main campus) into entity BD0200011 (NB. Use your student number as reference)
- Receipt of payment for SANC Learner Registration must be submitted to the year level Administrator within the first two weeks of commencement of the programme in order for the School of Nursing to process and submit the Learner Registration application to SANC within the stipulated time.

International students:

- Certified copy of identification documents (Passport/ refugee status/ asylum seeker permit)
- Valid study permit for those with passports
- Certified copy of high school results (English translation)
- SAQA Certificate
- USAf exemption Certificate
- SANC Learner Registration application fee must be paid at the UWC cashiers (main campus) into entity BD0200011 (NB. Use your student number as reference)
- Receipt of payment for SANC Learner Registration must be submitted to the year level Administrator within the first two weeks of commencement of the programme in order for the School of Nursing to process and submit the Learner Registration application to SANC within the stipulated time.

J.73.2 A student must secure professional indemnity before they can practice as a student nurse in specified clinical settings.

J.73.3 It is compulsory for all first-year students to submit proof that they have had the Hepatitis B vaccine before the commencement of the second term of the academic year.

J.73.4 It is compulsory for all first-year students to provide clearance certificates from both the National Sexual Offenders' Register using Form 8 and National Child Protection Register using Form 30 - **before registration with UWC**. Thereafter these clearance certificates must be **renewed annually before registration for each subsequent year of study with UWC**.

J.73.5 No student shall be admitted to the final assessment of any level unless 80% of the specified clinical practice hours have been completed by the deadline for the announcement of continuous assessment marks for the semester/year.

At Level 5 no student shall be admitted to the final assessment unless specified clinical learning hours for prior Levels 1, 2, 3 and 4 are completed.

J.73.6 Except where otherwise indicated, modules in which a practical examination is taken require a sub-minimum of 40% in the practical component.

J.73.7 A student shall be required to complete all clinical practice hours as prescribed by the School of Nursing.

J.73.8 All BNurs students will be placed in clinical settings as from Monday, 12 January 2026 as well as during ALL the UWC vacation periods until Friday, 18 December 2026. This is part of students' clinical placement to achieve the requisite Work Integrated Learning (WIL) hours for SANC.

Clinical placement dates as per 2026 UWC Calendar are indicated below:

January Vacation	Sunday, 11 January 2026: Clinical Placement commences and Residences open for BNurs students
April recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
Mid-year vacation	Saturday, 04 July to Sunday, 19 July 2026: Mid-year clinical placement
September recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
December vacation	Wednesday, 02 December 2026: Clinical Placement closes and Residences close for BNurs students

BACHELOR OF NURSING (8311)

(not offered to new students)

J.74 ADMISSION

Unless Senate decides otherwise, candidates will be required to meet the following criteria to be enrolled for the degree: **Bachelor of Nursing Degree – BNurs:**

J.74.1 Admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study plus a score of no less than 30 points calculated according to the university's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (home or first additional language) and
 - Level 3 (40-49%) in another Language (home or first additional language) and
 - Level 4 (50-59%) in Life Sciences and
 - Level 4 (50-59%) in Mathematics or Level 6 (70-79%) in Mathematical Literacy

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.74.2 Admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:
- HG (40%, E symbol) English or SG (50%, D symbol) English, and
 - HG (40%, E symbol) Mathematics or SG (50%, D symbol) Mathematics, and
 - HG (40%, E symbol) Biology or SG (50%, D symbol) Biology or
 - HG (40%, E symbol) Physical Sciences or SG (50%, D symbol) Physical Sciences

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.75 SELECTION

As only a limited number of students can be admitted to the programme, applicants will be subject to a selection procedure.

J.76 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over four years full-time.

J.77 CURRICULUM

J.77.1 Level 1

	FINAL TOTAL	480

J.78 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.79 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3:

J.79.1 Level 1

In order to promote to Level 2:

J.79.1.1 The student must pass all modules in Group 1 and is not allowed to carry more than 30 credits from Group 2.

J.79.1.2 The student should provide proof of clinical hours as calculated per year level.

J.79.2 Level 2

In order to promote to Level 3:

J.79.2.1 The student must pass all modules from group 1. No Level 1 modules may be carried into the 3rd Level. Brain and Behaviour 112 (PSY112) or Introduction to

Psychology (PSY111) may be carried to Level 3 provided that the credits carried do not exceed 30 credits.

- J.79.2.2** The student should provide proof of clinical learning hours as calculated per semester for Level 2 by the School of Nursing in accordance with the stipulations of the South African Nursing Council (SANC), Regulation R425. In addition, proof of completion of all clinical hours of the first-year must be provided.

J.79.3 Level 3

In order to promote to Level 4:

- J.79.3.1** The student must pass all modules except Unit Management (CUR334/CUR336) at 15 credits which may be carried to the 4th Level.

- J.79.3.2** The student should provide proof of clinical learning hours as calculated per semester for Level 3 by the School of Nursing in accordance with the stipulations of the South African Nursing Council (SANC), Regulation R425. In addition, proof of completion of all clinical hours of the second year must be provided.

J.79.4 Level 4

- J.79.4.1** Students will complete the degree when all modules have been passed and 480 credit points have been obtained.

- J.79.4.2** In addition a total of 4 000 clinical learning hours over the four years of study as stipulated by the South African Nursing Council (SANC), Regulation R425 must be completed.

J.80 ADVANCE REGISTRATION

J.80.1 Level 1

A student who repeats Level 1 with no more than 45 credits outstanding, may register in advance for not more than 40 credits at Level 2 from the modules listed below, subject to timetable clashes and modules being repeated. Advanced registration for Human Biology 218 and 228 are subject to the student passing both Human Biology 118 and 128.

Module Name	Module Code	Credits
Human Biology 218	HUB218	20
Human Biology 228	HUB228	20
Brain and Behaviour 112	PSY112	7.5
Introduction to Psychology 111	PSY111	7.5

J.80.2 Level 2

Students who repeat Level 2 with no more than 45 credits outstanding at this Level, may register in advance for Child Health 313 (NRS313) or equivalent Child Health 324 (NRS324) provided that they have passed both General Nursing Science 211 and 212.

J.80.3 Level 3

Students who repeat Level 3 with no more than 45 credits outstanding, may register in advance for not more than 40 credits in the following modules:

Module Name	Module Code	Credits
Research Methods	NRS421	20
Regional Priority Gender-Based Violence	NRS401	20

J.81 RENEWAL OF REGISTRATION

The renewal of registration will be governed by the Rule A.3.2.3 registration for first degrees, as stipulated in the University Calendar: General Information Part 1.

J.82 SPECIAL REQUIREMENTS FOR THE PROGRAMME

- J.82.1** Every nursing student must be registered, in accordance with the requirements of the South African Nursing Council, as a nursing student within 30 days of the date of commencement of study.

The following documents must be submitted on registration:

South African students:

- Certified copy of ID
- Valid study permit for those with passports
- Certified copy of matriculation certificate
- Marriage certificate (if applicable)
- In case of Extended Curriculum Programme students, certified copy of academic record of first-year ECP
- SANC Learner Registration application fee must be paid at the UWC cashiers (main campus) into entity BD0200011 (NB. Use your student number as reference)
- Receipt of payment for SANC Learner Registration must be submitted to the year level Administrator within the first two weeks of commencement of the programme in order for the School of Nursing to process and submit the Learner Registration application to SANC within the stipulated time.

International students:

- Certified copy of identification documents (Passport/refugee status/asylum seeker permit)
- Valid study permit for those with passports
- Certified copy of high school results (English translation)
- SAQA Certificate
- HESA exemption Certificate
- SANC Learner Registration application fee must be paid at the UWC cashiers (main campus) into entity BD0200011 (NB. Use your student number as reference)
- Receipt of payment for SANC Learner Registration must be submitted to the year level Administrator within the first two weeks of commencement of the

programme in order for the School of Nursing to process and submit the Learner Registration application to SANC within the stipulated time.

- J.82.2** Students must secure professional indemnity before they can practice as student nurses in specified clinical settings.
- J.82.3** It is compulsory for all first-year students to submit proof that they have had the Hepatitis B vaccine before the commencement of the second term of the academic year.
- J.82.4** It is compulsory for all first-year students to provide clearance certificates from both the National Sexual Offenders' Register using Form 8 and National Child Protection Register using Form 30 - **before registration with UWC**. Thereafter these clearance certificates must be **renewed annually before registration for each subsequent year of study with UWC**.
- J.82.5** No students will be admitted to the final assessment of any year-level unless 80% of the specified clinical hours have been completed by the deadline for the announcement of continuous assessment marks for the semester/year.
- At Level 4 no student will be admitted to final assessment unless specified clinical learning hours prior Levels 1, 2, and 3 are completed.
- J.82.6** Except where otherwise indicated, modules in which a practical examination is taken require a sub-minimum of 40% in the practical component.
- J.82.7** A student will be required to complete all clinical practice hours as prescribed by the School of Nursing.
- J.82.8** All BNurs students will be placed in clinical settings as from Monday, 12 January 2026 as well as during ALL the UWC vacation periods until Friday, 18 December 2026. This is part of students' clinical placement to achieve the requisite Work Integrated Learning (WIL) hours for SANC.

Clinical placement dates as per 2026 UWC Calendar are indicated below:

January Vacation	Sunday, 11 January 2026: Clinical Placement commences and Residences open for BNurs students
April recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
Mid-year vacation	Saturday, 04 July to Sunday, 19 July 2026: Mid-year clinical placement
September recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
December vacation	Wednesday, 02 December 2026: Clinical Placement closes and Residences close for BNurs students

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM).

ASSESSMENT TYPE:

BACHELOR OF NURSING (EXTENDED CURRICULUM PROGRAMME - 8310)

(not offered to new students)

J.83 ADMISSION

Unless Senate decides otherwise, candidates will be required to meet the following criteria to be enrolled for the degree: **Bachelor of Nursing Degree – BNurs:**

J.83.1 Admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree Study plus a score of no less than 30 points calculated according to the University's approved points system.
- Level 4 (50-59%) in English (home or first additional language) and
 - Level 3 (40-49%) in another Language (home or first additional language) and
 - Level 4 (50-59%) in Life Sciences and
 - Level 4 (50-59%) in Mathematics or Level 6 (70-79%) in Mathematical Literacy

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.83.2 Admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:

- HG (40%, E symbol) English or
- SG (50%, D symbol) English and
- HG (40%, E symbol) Mathematics or
- SG (50%, D symbol) Mathematics and
- HG (40%, E symbol) Biology or
- SG (50%, D symbol) Biology or
- HG (40%, E symbol) Physical Sciences or
- SG (50%, D symbol) Physical Sciences

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.84 SELECTION

As only a limited number of students can be admitted to the programme, applicants will be subject to a selection procedure.

J.85 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over five years full-time.

J.87 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.88 PROMOTION RULES

Unless Senate decides otherwise:

J.88.1 Level 1

J.88.1.1 In order to promote to Level 2, the student must pass all Level 1 modules.

J.88.1.2 A student who does not pass all the required modules at Level 1 will not be permitted to renew their registration in the following year. Appeals for readmission will be considered.

J.88.1.3 The student should provide proof of clinical learning hours as calculated per semester for Level 1 by the School of Nursing in accordance with the stipulations of the South African Nursing Council (SANC), Regulation R425.

J.88.2 Level 2

In order to promote to Level 3:

J.88.2.1 The student must pass all modules in Level 2.

J.88.2.2 The student should provide proof of clinical learning hours as calculated per semester for Level 2 by the School of Nursing in accordance with the stipulations of the South African Nursing Council (SANC), Regulation R425. In addition, proof of completion of all clinical hours of Level 1 must be provided.

J.88.2.3 Notwithstanding Rule A.3.2.3 (a), a student who does not pass all the required modules at Level 2 will not be permitted to renew their registration in the following year.

J.88.3 Level 3

In order to promote to Level 4:

J.88.3.1 The student must pass all modules from group 1. No Level 1 or Level 2 modules may be carried into Level 4. Brain and Behaviour 112 (PSY112) or Introduction to Psychology (PSY111) may be carried to Level 4 provided that the total credits carried do not exceed 30 credits.

J.88.3.2 The student should provide proof of clinical learning hours as calculated per semester for Level 3 by the School of Nursing in accordance with the stipulations of the South African Nursing Council (SANC), Regulation R425. In addition, proof of completion of all clinical hours of Level 2 must be provided.

J.88.4 Level 4

In order to promote to Level 5:

J.88.4.1 The student must pass all modules except Unit Management (CUR334) at 15 credits which may be carried to Level 5.

J.88.4.2 The student should provide proof of clinical learning hours as calculated per semester for Level 4 by the School of Nursing in accordance with the stipulations of the South

African Nursing Council (SANC), Regulation R425. In addition, proof of completion of all clinical hours of Level 3 must be provided.

J.88.5 Level 5

J.88.5.1 Students will complete the degree when all modules have been passed and 490 credit points have been obtained.

J.88.5.2 In addition a total of 4 000 clinical learning hours over the five years of study as stipulated by the South African Nursing Council (SANC), Regulation R425 must be completed.

J.89 ADVANCE REGISTRATION

J.89.1 Level 1

No advance registration will be permitted in Level 1.

J.89.2 Level 2

Students who repeat Level 2 and have passed all the modules in group one and have no more than 20 credits outstanding, may register in advance for no more than 20 credits at the third Level from the modules listed below, subject to timetable clashes:

Module Name	Module Code	Credits
Introduction to Mental Health 214	CUR214	10
Introduction to Psychology 111	PSY111	7.5

J.89.3 Level 3

Students who repeat Level 3 with no more than 45 credits outstanding at this Level, may register in advance for Child Health 313 (NRS313) or equivalent Child Health 324 (NRS324) provided that they have passed both General Nursing Science 211 and 212.

J.89.4 Level 4

Students who repeat Level 4 with no more than 45 credits outstanding, may register in advance for not more than 40 credits from the following modules:

Module Name	Module Code	Credits
Research Methods	NRS421	20
Regional Priority Gender-Based Violence	NRS401	20

J.90 RENEWAL OF REGISTRATION

The renewal of registration will be governed by the Rule A.3.2.3 registration for first degrees, as stipulated in the University Calendar: General Information Part 1 but excludes Level 1.

J.91 SPECIAL REQUIREMENTS FOR THE PROGRAMME

J.91.1 Every nursing student must be registered, in accordance with the requirements of the South African Nursing Council, as a nursing student within 30 days of the date of commencement of study.

The following documents must be submitted on registration:

South African students:

- Certified copy of ID
- Valid study permit for those with passports
- Certified copy of matriculation certificate
- Marriage certificate (if applicable)
- In case of Extended Curriculum Programme students, certified copy of academic record of first-year ECP
- SANC Learner Registration application fee must be paid at the UWC cashiers (main campus) into entity BD0200011 (NB. Use your student number as reference)
- Receipt of payment for SANC Learner Registration must be submitted to the year level Administrator within the first two weeks of commencement of the programme in order for the School of Nursing to process and submit the Learner Registration application to SANC within the stipulated time.

International students:

- Certified copy of identification documents (Passport/refugee status/asylum seeker permit)
- Valid study permit for those with passports
- Certified copy of high school results (English translation)
- SAQA Certificate
- HESA exemption Certificate
- SANC Learner Registration application fee must be paid at the UWC cashiers (main campus) into entity BD0200011 (NB. Use your student number as reference)
- Receipt of payment for SANC Learner Registration must be submitted to the year level Administrator within the first two weeks of commencement of the programme in order for the School of Nursing to process and submit the Learner Registration application to SANC within the stipulated time.

J.91.2 Students must secure professional indemnity before they can practice as student nurses in specified clinical settings.

J.91.3 It is compulsory for all first-year students to submit proof that they have had the Hepatitis B vaccine before the commencement of the second term of the academic year.

J.91.4 It is compulsory for all first-year students to provide clearance certificates from both the National Sexual Offenders' Register using Form 8 and National Child Protection Register using Form 30 - **before registration with UWC**. Thereafter these clearance certificates must be **renewed annually before registration for each subsequent year of study with UWC**.

- J.91.5** No students will be admitted to the final assessment of any year-level unless 80% of the specified clinical hours have been completed by the deadline for the announcement of continuous assessment marks for the semester/year.

At Level 5 no student will be admitted to the final assessment unless specified clinical learning hours for prior Levels 1, 2, 3 and 4 are completed.

- J.91.6** Except where otherwise indicated, modules in which a practical examination is taken require a sub-minimum of 40% in the practical component.
- J.91.7** A student will be required to complete all clinical practice hours as prescribed by the School of Nursing.
- J.91.8** All BNur students will be placed in clinical settings as from Monday, 12 January 2026 as well as during ALL the UWC vacation periods until Friday, 18 December 2026. This is part of students' clinical placement to achieve the requisite Work Integrated Learning (WIL) hours for SANC.

Clinical placement dates as per 2026 UWC Calendar are indicated below:

January Vacation	Sunday, 11 January 2026: Clinical Placement commences and Residences open for BNur students (on the same date as the UWC offices open annually)
April recess	As per dates in the 2026: UWC General Calendar Terms and Almanac
Mid-year vacation	Saturday, 05 July to Sunday, 20 July 2026: Mid-year clinical placement
September recess	As per dates in the 2026 UWC General Calendar Terms and Almanac
December vacation	Wednesday, 02 December 2026: Clinical Placement closes and Residences close for BNur students

BACHELOR OF SCIENCE IN COMPLEMENTARY HEALTH SCIENCES **(8104)**

(not offered to new students)

General Stream

J.92 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Science in Complementary Health Sciences Degree - BSc (Complementary Health Sciences)**:

J.92.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 30 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home or First Additional Language), and
 - Level 3 (40-49%) in another Language (Home or First Additional Language), and
 - Level 4 (50-59%) in Mathematics or Level 6 (70-79%) in Mathematical Literacy, and
 - Level 4 (50-59%) in Life Sciences, and
 - Level 3 (40-49%) in Physical Sciences

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.92.2 Minimum admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:
- HG (40%, E symbol) English or SG (50%, D symbol) English, and
 - HG (40%, E symbol) Mathematics or SG (50%, D symbol) Mathematics, and
 - HG (40%, E symbol) Biology or SG (50%, D symbol) Biology, and
 - HG (40%, E symbol) Physical Science or SG (50%, D symbol) Physical Science

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.92.3 Alternative admission

J.92.3.1 Alternative admission requirements for applicants who passed Grade 12 from 2008

- (a) The National Senior Certificate for Diploma Study with a score of no fewer than 23 points calculated according to the University's approved points system.

- (b) A qualification or level of competence that the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) and (b) above.

J.92.3.2 Alternative admission requirements for applicants who passed Grade 12 before 2008

- (a) An applicant without a matriculation exemption may be allowed into the programme at Senate's discretion.

OR

- (c) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.92.3.3 Alternative admission requirements for applicants in terms of Recognition of Prior Learning (RPL)

An applicant who completed the NSC in 2008 or thereafter, but has not obtained an endorsement, shall be considered for alternative admission after the age of 23. Such an applicant shall be required to complete an RPL portfolio development course and submit to a process where relevant learning and/or experience shall be assessed.

An applicant who is 23 years or older and does not have a matriculation certificate or NSC, but who may have obtained other qualifications or experience that may be deemed to be equivalent to admission criteria for the particular study programmes shall also be required to complete an RPL portfolio development course or an RPL portfolio process as agreed upon, and to submit to a process where such learning, qualification, and/or experience shall be assessed.

J.93 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.94 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over three years full-time.

J.95 CURRICULUM

J.95.1 Level 1

Module Name	Module Code	Credits
Compulsory		
Group 1 (select all modules)		
Chemistry 116 (N)	CHE116	15
Chemistry 126 (N)	CHM126	15
Life Sciences 141	LSC141	15
Medical Bioscience 111	MBS111	15
Medical Bioscience 121	MBS121	15
Principles of Natural Healing 111	NAT111	5
Physics for CHS 118	PHY118	15

Group 2 (select all modules)

Computer Literacy 121	CCL121	5
Primary Health Care 122	HDP122	10

Electives (select one module)

Introduction to Afrikaans 001 (CHS) (alternative if exempted from EED)	AFR001	10
English for Education Development 111	EED111	10
Introduction to Xhosa 001 (CHS) (alternative if exempted from EED) (not offered in 2026)	XHO001	10
	Sub-total	120

J.95.2 Level 2

Module Name	Module Code	Credits
Group 1 (select all modules)		
Biotechnology 216	BTN216	20
Medical Bioscience 231	MBS231	20
Medical Bioscience 232	MBS232	20
Medical Microbiology 251	MIC251	20
Medical Microbiology 252	MIC252	20
Nutrition 211	NUT211	10
Nutrition 221	NUT221	10
Group 2 (select both modules)		
Interdisciplinary Health Promotion 211	IHP211	10
Complementary Healing Systems 201	NAT201	10
	Sub-total	140

J.95.3 Level 3

Module Name	Module Code	Credits
General Medicine 301	BCM301	30
Pathology 311	NAT311	15
Pathology 321	NAT321	10
Herbal Pharmacognosy 323	NAT323	20
Nutritional Medicine 315	NUT315	10
Pharmacology 204	PHA204	20
Study of Human Development 211	PSY211	10
Health Psychology 224	PSY224	5
	Sub-total	120
	FINAL TOTAL	380

J.96 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.97 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.97.1 Level 1

A student shall be promoted to Level 2 of study on obtaining 95 credits of the Level 1 modules including all modules in Group 1, and provided that the pre-requisites are met and there are no timetable clashes.

J.97.2 Level 2

A student shall be promoted to Level 3 of study on obtaining 230 credits (including 120 Level 2 credits) including all modules in Group 1, and provided that the pre-requisites are met and there are no timetable clashes.

J.97.3 Level 3

A student shall complete the degree once 380 credits are obtained and all the requirements for the degree are met.

J.98 ADVANCE REGISTRATION

J.98.1 Level 1

If a student does not promote to Level 2 of study, the student may be allowed to register for Level 2 modules, provided that they have completed at least 75 credits and should not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, and provided that the pre-requisites are met and there are no timetable clashes.

J.98.2 Level 2

If a student does not promote to Level 3 of study, the student may be allowed to register for Level 3 modules, provided that they have completed at least 215 credits and should not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, and provided that the pre-requisites are met and there are no timetable clashes.

J.99 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.100 SPECIAL REQUIREMENTS FOR THE PROGRAMME

J.100.1 A student must, in accordance with the requirements of the Allied Health Professions Council of South Africa (AHPCSA), register as a School of Natural Medicine student within two months after admission to the programme.

J.100.2 Thereafter the student must ensure that they register for each year while within the programme.

J.100.3 Where a student has interrupted their studies for more than one academic year, and where the curriculum or module content has changed, they shall be expected to register for the additional module(s) or attend classes and write additional tests/ assignments on work not covered during the student's time of study.

BACHELOR OF SCIENCE IN COMPLEMENTARY HEALTH SCIENCES IN CHINESE MEDICINE AND ACUPUNCTURE (8106)

(not offered to new students)

J.101 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Science in Complementary Health Sciences in Chinese Medicine and Acupuncture Degree: BSc (Complementary Health Sciences) (Chinese Medicine and Acupuncture)**:

J.101.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 27 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home or First Additional Language), and
 - Level 3 (40-49%) in another Language (Home or First Additional Language), and
 - Level 3 (40-49%) in Mathematics or Level 6 (70-79%) in Mathematical Literacy, and
 - Level 4 (50-59%) in Life Sciences, and
 - Level 3 (40-49%) in Physical Sciences
- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) and (b) above.

J.101.2 Minimum admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the following subject requirements:
- HG (40%, E symbol) English or SG (50%, D symbol) English and
 - HG (40%, E symbol) Mathematics or SG (50%, D symbol) Mathematics and
 - HG (40%, E symbol) Biology or SG (50%, D symbol) Biology and
 - HG (40%, E symbol) Physical Science or SG (50%, D symbol) Physical Science

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.101.3 Alternative admission

J.101.3.1 Alternative admission requirements for applicants who passed Grade 12 from 2008

- (a) The National Senior Certificate for Diploma Study with a score of no fewer than 23 points calculated according to the University's approved points system.

OR

- (b) A qualification or Level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.101.3.2 Alternative admission requirements for applicants who passed Grade 12 before 2008

- (a) An applicant without a Matriculation Exemption may be allowed into the programme at Senate's discretion and may be required to write the National Benchmark Test (NBT).

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above

J.101.3.3 Alternative admission requirements for applicants in terms of Recognition of Prior Learning (RPL)

An applicant who completed the NSC in 2008 or thereafter, but has not obtained an endorsement, shall be considered for alternative admission after the age of 23. Such an applicant shall be required to complete an RPL portfolio development course and submit to a process where relevant learning and/or experience shall be assessed.

An applicant who is 23 years or older and does not have a matriculation certificate or NSC, but who may have obtained other qualifications or experience that may be deemed to be equivalent to admission criteria for the particular study programmes shall also be required to complete an RPL portfolio development course or an RPL portfolio process as agreed upon, and to submit to a process where such learning, qualification, and/or experience shall be assessed.

J.102 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.103 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over three years full-time.

J.105 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.106 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.106.1 Level 1

A student shall be promoted to Level 2 of study on obtaining 100 credits of the Level 1 modules including all modules in Group 1, and provided that the pre-requisites are met and there are no timetable clashes.

J.106.2 Level 2

A student shall be promoted to Level 3 of study on obtaining 255 credits (including 140 Level 2 credits) including all modules in Group 1, and provided that the pre-requisites are met and there are no timetable clashes.

J.106.3 Level 3

A student shall complete the degree once 420 credits are obtained and all the requirements for the degree are met.

J.107 ADVANCE REGISTRATION

J.107.1 Level 1

If a student does not promote to Level 2 of study, the student may be allowed to register for Level 2 modules, provided that they have completed at least 80 credits and should not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, and provided that the pre-requisites are met and there are no timetable clashes.

J.107.2 Level 2

If a student does not promote to Level 3 of study, the student may be allowed to register for Level 3 modules, provided that they have completed at least 240 credits and should not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, and provided that the pre-requisites are met and there are no timetable clashes.

J.108 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.109 SPECIAL REQUIREMENTS FOR THE PROGRAMME

J.109.1 A student must, in accordance with the requirements of the Allied Health Professions Council of South Africa (AHPCSA), register as a School of Natural Medicine student within two months after admission to the programme.

J.109.2 Thereafter the student must ensure that they register for each year while within the programme.

J.109.3 Where a student has interrupted their studies for more than one academic year, and where the curriculum or module content has changed, they shall be expected to register for the additional module(s) or attend classes and write additional tests/ assignments on work not covered during the student's time of study.

BACHELOR OF SOCIAL WORK (8411)

J.110 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Social Work Degree – B (Social Work)**:

J.110.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 34 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home Language) or Level 5 (60-69%) in English (First Additional Language)
 - Level 4 (50-59%) in another Language (Home or First Additional Language), and
 - Level 3 (40-49%) in Mathematics or Level 4 (50-59%) in Mathematical Literacy

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.110.2 Minimum admission requirements for applicants who matriculated before 2008

- (a) A Matriculation Exemption with the minimum of a D aggregate and the minimum of a D aggregate symbol for English.

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.110.3 Alternative admission

J.110.3.1 Alternative admission requirements for applicants who passed Grade 12 from 2008

- (a) The National Senior Certificate for Diploma Study with a score of no fewer than 30 points calculated according to the University's approved points system.

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.110.3.2 Alternative admission requirements for applicants who passed Grade 12 before 2008

- (a) An applicant without a matriculation exemption may be allowed into the programme at Senate's discretion.

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.110.3.3 Alternative admission requirements for applicants in terms of Recognition of Prior Learning (RPL)

An applicant who completed the NSC in 2008 or thereafter, but has not obtained an endorsement, shall be considered for alternative admission after the age of 23. Such an applicant may be required to complete an RPL portfolio development course and submit to a process where relevant learning and/or experience shall be assessed.

An applicant who is 23 years or older and does not have a matriculation certificate or NSC, but who may have obtained other qualifications or experience that may be deemed to be equivalent to admission criteria for the particular study programmes may also be required to complete an RPL portfolio development course or an RPL portfolio process as agreed upon, and to submit to a process where such learning, qualification, and/or experience shall be assessed.

J.111 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty and depending on space available within the programme. Only a limited number of students can be admitted to the programme.

J.112 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over four years full-time.

J.114 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.115 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.115.1 Level 1

A student shall be promoted to Level 2 of study on passing all compulsory modules in Group 1 and 15 credits in Groups 2, 3 and 4 respectively.

J.115.2 Level 2

A student shall be promoted to Level 3 of study after completing all Level 1 modules and having passed all compulsory modules in Groups 1 and 2, and a minimum of 40 credits from Group 3, on Level 2, and on meeting all pre-requisites for the Level 3 modules.

J.115.3 Level 3

A student shall be promoted to Level 4 of study only if the student has successfully completed all the relevant course units and modules for Level 3. The exception is in the case of a student obtaining associate status for one Level 3 service module into Level 4.

J.115.4 Level 4

A student shall complete the degree once 530 credits are obtained and all the requirements for the degree are met.

J.116 ADVANCE REGISTRATION

J.116.1 A student may only register for modules in advance at the next level if they do not have more than 45 credits outstanding to promote, excluding social work modules.

J.116.2 A repeating student who has not promoted shall not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, excluding social work modules and provided the pre-requisites are met and there are no timetable clashes.

J.117 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.118 SPECIAL REQUIREMENTS FOR THE PROGRAMME

There are no special requirements for this programme.

BACHELOR OF SOCIAL WORK (EXTENDED CURRICULUM PROGRAMME - 8560)

J.119 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Social Work Degree – B (Social Work)**:

J.119.1 Minimum admission requirements for applicants who matriculated from 2008

- (a) The National Senior Certificate for Bachelor's Degree study with a score of no fewer than 30 points calculated according to the University's approved points system, as well as the following specific subject requirements:
- Level 4 (50-59%) in English (Home Language) or Level 5 (60-69%) in English (First Additional Language) and
 - Level 4 (40-49%) in another Language (Home or First Additional Language), and
 - Level 3 (40-49%) in Mathematics or Level 4 (50-59%) in Mathematical Literacy

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.119.2 Minimum Admission requirements for applicants who matriculated before 2008

- (a) The National Senior Certificate for Diploma study with a score of no fewer than 27 points calculated according to the University's approved points system.

OR

- (b) A qualification or level of competence which the Senate of the University has deemed to be equivalent to the requirements stipulated in (a) above.

J.119.3 Alternative admission requirements for applicants in terms of Recognition of Prior Learning (RPL)

An applicant who completed the NSC in 2008 or thereafter, but has not obtained an endorsement, shall be considered for alternative admission after the age of 23. Such an applicant may be required to complete an RPL portfolio development course and submit to a process where relevant learning and/or experience shall be assessed.

An applicant who is 23 years or older and does not have a matriculation certificate or NSC, but who may have obtained other qualifications or experience that may be deemed to be equivalent to admission criteria for the particular study programmes may also be required to complete an RPL portfolio development course or an RPL portfolio process as agreed upon, and to submit to a process where such learning, qualification, and/or experience shall be assessed.

J.120 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty, and depending on space available within the programme. Only a limited number of students can be admitted to the programme.

J.121 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over five years full-time.

Module Name	Module Code	Credits
Compulsory		
Group 1 (Social Work)		
Interdisciplinary Health Promotion 211	IHP211	10
The Social Work Process at Macro Level 214	SCW214	10
The Social Work Process at Mezzo Level 213	SCW213	10
The Social Work Process at Micro Level 212	SCW212	10
Basic Fieldwork Education 201	SCW201	30
Social Work Values and Ethics 224	SCW224	10
Group 2 (Social Sciences)		
Anthropology 222	ANT222	10
Research Methods and Statistics 221	PSY221	10

Electives:

* A student who selects Social Sciences as a major must select Social Sciences modules to the value of **40** credits and Psychology module/s to the value of **10** credits.

** A student who selects Psychology as a major must select Psychology modules to the value of **30** credits and a Social Sciences module to the value of at least **20** credits.

Group 3 (Social Sciences / Psychology)***Sub-group: Social Sciences**

Anthropology 232	ANT232	20
Sociology 234: Social Inequalities, Crime and Violence	SOC234	20

****Sub-group: Psychology**

Study of Human Development 211	PSY211	10
Introduction to Psychological Interventions 214	PSY214	10
Introduction to Psychopathology 213	PSY213	10
Community Psychology 223	PSY223	5
Health Psychology 224	PSY224	5
Sub-total		150

J.122.4 Level 4

Module Name	Module Code	Credits
Compulsory		
Intermediate Fieldwork Education 301	SCW301	40
Intermediate Research in Social Work 307	SCW307	20
Child and Youth Well-being 312	SCW312	10
Intervention: Family Well-being 313	SCW313	10
Intervention: Health and Well-being 314	SCW314	10
Intervention: Community Well-being 315	SCW315	10
Welfare Law 321	WEL321	10
	Sub-total	110

Electives (Social Sciences / Psychology)

* A student must select either the Social Sciences modules to the value of **20** credits or Psychology modules to the value of **20** credits.

*Sub-group: Social Sciences

Anthropology 331	ANT331	20
Anthropology 332	ANT332	20

*Sub-group: Psychology

Introduction to Personality Theories 312	PSY312	10
Social Psychology 322	PSY322	10

J.122.5 Level 5

Module Name - Compulsory	Module Code	Credits
Advanced Fieldwork Education 401	SCW401	60
Advanced Social Work Research 407	SCW407	15
Advanced Social Work Supervision 408	SCW408	10
Advanced Social Work Ethics 412	SCW412	10
Advanced Social Policy and Planning 413	SCW413	10
Advanced Social Work Intervention 415	SCW415	15
	Sub-total	120
	FINAL TOTAL	570

J.123 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.124 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.124.1 Level 1

In order to promote to Level 2 of study, a student must pass all social work modules and obtain at least 55 credits.

J.124.2 Level 2

A student shall be promoted to Level 3 of study on obtaining 140 credits (65 credits from Level 1 and 75 credits from Level 2, i.e. 25 credits from Group 1 and 20 credits from Group 3, and 30 credits from Psychology in Group 2 or 30 credits from Anthropology/Sociology in Group 4).

J.124.3 Level 3

A student shall be promoted to Level 4 of study after completing Levels 1 and 2 modules, and passed all compulsory modules in Groups 1 and 2, and a minimum of 40 credits from Group 3 on Level 3, and on meeting all pre-requisites for Level 4 modules.

J.124.4 Level 4

A student shall be promoted to Level 5 of study only if the student has successfully completed all relevant course units and modules for Level 4. The exception is in the case of a student obtaining associate status for one Level 4 service module into Level 5.

J.124.5 Level 5

A student shall complete the degree once 570 credits are obtained and all the requirements for the degree are met.

J.125 ADVANCE REGISTRATION

J.125.1 A student may only register for modules in advance at the next level if they do not have more than 45 credits outstanding to promote, excluding social work modules.

J.125.2 A repeating student who has not promoted shall not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, excluding social work modules and provided the pre-requisites are met and there are no timetable clashes.

J.126 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.127 SPECIAL REQUIREMENTS FOR THE PROGRAMME

There are no special requirements for this programme.

BACHELOR OF ARTS HONOURS IN BIOKINETICS (8021)

J.128 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Arts Honours in Biokinetics Degree - BAHons (Biokinetics)**:

J.128.1 an applicant must be in possession of a Bachelor of Arts Degree (Sport, Recreation and Exercise Science) or the equivalent thereof from an accredited higher education institution, with a minimum average of 60% for all Sport, Recreation and Exercise Science modules at Level 3.

J.128.2 an applicant may apply directly to the Sport, Recreation and Exercise Science (SRES) Department if they are not in possession of an appropriate degree subject to Rule A.2.1.4

J.129 SELECTION

J.129.1 The Professional Board determines the number of applicants that can be admitted each year.

J.129.2 Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.129.3 Preference shall be given to an applicant with a science background.

J.130 DURATION

Unless Senate decides otherwise, the duration of the curriculum shall extend over one year full-time only.

J.131 CURRICULUM

Module Name	Module Code	Credits
Compulsory		
Exercise Physiology 717	SRE717	10
Motor Control and Learning 718	SRE718	10
Biokinetics 730	SRE730	10
Physical Evaluation 731	SRE731	10
Physical Evaluation 732	SRE732	10
Exercise Testing and Prescription 733	SRE733	10
Chronic Disease and Disability 735	SRE735	10
Anatomy and Kinanthropometry 736	SRE736	10
Biokinetics Practice 737	SRE737	5
Biokinetics Practice 738	SRE738	5
Applied Research Methods 739	SRE739	30
Applied Statistics 501	STA501	15
	FINAL TOTAL	135

An extensive practical component (of 500 hours) forms a compulsory part of the Biokinetics programme.

J.132 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.133 PROGRESSION RULES

Unless Senate decides otherwise, a full-time student shall complete the programme in one year.

J.133.1 Full-time

Unless Senate decides otherwise, a full-time student shall complete the programme in one year. A student who has passed at least 60 credits may proceed with their studies to complete the programme in the following year.

J.134 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.135 SPECIAL REQUIREMENTS FOR THE PROGRAMME

J.135.1 A student must in accordance with the requirements of the Health Professions Council of South Africa (HPCSA), register as a biokinetics student within two months after admission to the programme. Full particulars are available from the Course Coordinator in the Department.

J.135.2 First Aid (Level 3) certification (or equivalent) is required for admission into the degree. A First Aid (Level 3) course is offered in the department prior to the commencement of the academic year.

BACHELOR OF ARTS HONOURS IN PSYCHOLOGY (Full-time - 8753)/

(Part-time - 8751)

(part-time not offered in 2026)

J.136 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Arts Honours in Psychology Degree - BAHons (Psychology)**:

Subject to the general authority of Senate to refuse an applicant admission to the programme, an applicant shall have obtained a Bachelor's degree approved by Senate for the purpose, and unless Senate on the recommendation of the HoD decides otherwise, such an applicant shall have obtained, before admission to the programme, a minimum average of at least 65% in the final Psychology 3 examinations.

J. 137 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.138 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over one year full-time or two years part-time study.

J.139 CURRICULUM

Module Name	Module Code	Credits
Compulsory		
Advanced Research Project 701	PSY701	30
Psychopathology 702	PSY702	20
Psychological Interventions 703	PSY703	20
*Advanced Research Methods 704 (*pre-requisite for MA in Psychology)	PSY704	20
Psychological Assessment 709	PSY709	20

	FINAL TOTAL	130

J.140 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.141 PROGRESSION RULES

J.141.1 Full-time

Unless Senate decides otherwise, a full-time student shall complete the programme in one year. A student who has passed at least 60 credits may proceed with their studies to complete the programme in the following year.

J.141.2 Part-time

Unless Senate decides otherwise, a part-time student shall complete the programme in two consecutive years and accumulate at least 60 credits per annum to proceed with their studies. A student who has accumulated 90 credits within two years may be allowed to proceed to the following year to complete the programme.

J.142 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.143 SPECIAL REQUIREMENTS FOR THE PROGRAMME

A student who does not obtain the minimum admission requirement of 60% shall only be allowed one attempt to improve their marks for admission to the programme.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

BACHELOR OF SCIENCE HONOURS IN BIOKINETICS (8024)

J.152 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Science Honours in Biokinetics Degree - BScHons (Biokinetics)**:

- J.152.1** an applicant must be in possession of a Bachelor of Science Degree (Sport, Recreation and Exercise Science) or the equivalent thereof from an accredited higher education institution, with an average of at least 60% for all Sport, Recreation and Exercise Science modules at Level 3.
- J.152.2** an applicant may apply directly to the SRES Department if they are not in possession of an appropriate degree subject to Rule A.2.1.4.

J.153 SELECTION

- J.153.1** The Professional Board determines the number of applicants that can be admitted each year.
- J.153.2** Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.
- J.153.3** Preference shall be given to an applicant with a science background.

J.154 DURATION

Unless Senate decides otherwise, the duration of the curriculum shall extend over one year full-time only.

J.155 CURRICULUM

Module Name	Module Code	Credits
Compulsory		
Exercise Physiology 717	SRE717	10
Motor Control and Learning 718	SRE718	10
Biokinetics 730	SRE730	10
Physical Evaluation 731	SRE731	10
Physical Evaluation 732	SRE732	10
Exercise Testing and Prescription 733	SRE733	10
Chronic Disease and Disability 735	SRE735	10
Anatomy and Kinanthropometry 736	SRE736	10
Biokinetics Practice 737	SRE737	5
Biokinetics Practice 738	SRE738	5
Applied Research Methods 739	SRE739	30
Applied Statistics 501	STA501	15
FINAL TOTAL		135

An extensive practical component (of 500 hours) forms a compulsory part of the Biokinetics programme.

J.156 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.157 PROGRESSION RULES

Unless Senate decides otherwise, a full-time student shall complete the programme in one year.

J.157.1 Full-time

Unless Senate decides otherwise, a full-time student shall complete the programme in one year. A student who has passed at least 60 credits may proceed with their studies to complete the programme in the following year.

J.158 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.159 SPECIAL REQUIREMENTS FOR THE PROGRAMME

J.159.1 A student must in accordance with the requirements of the Health Professions Council of South Africa (HPCSA), register as a biokinetics student within two months after admission to the programme. Full particulars are available from the Course Coordinator in the Department.

J.159.2 First Aid (Level 3) certification (or equivalent) is required for admission into the degree. A First Aid (Level 3) course is offered in the department prior to the commencement of the academic year.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR); Semester Module (S); Prerequisites and Co-requisites; Service Module (SM).

BACHELOR OF COMPLEMENTARY MEDICINE IN CHINESE MEDICINE AND ACUPUNCTURE (8344)

(not offered to new students)

J.160 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Bachelor of Complementary Medicine in Chinese Medicine and Acupuncture Degree - B (Complementary Medicine) (Chinese Medicine and Acupuncture)**:

- J.160.1** an applicant must be in possession of a Bachelor of Science Degree (Complementary Health Sciences) or a clinical diagnostic qualification such as MBChB or the equivalent thereof.
- J.160.2** If in the opinion of the selection committee, the relevant degree is deficient, additional modules may be prescribed.
- J.160.3** Students need to be registered with the Allied Health Professions Council of South Africa (AHPCSA).

J.161 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.162 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over two years full-time.

J.163 CURRICULUM

J.163.1 Level 1

Module Name	Module Code	Credits
Compulsory Modules		
Group 1		
General Medicine 401	BCM401	30
Clinical Diagnosis 402	BCM402	20
Chinese Medicine Theory 401	CMA401	20
Chinese Medicine Theory 402	CMA402	20
Clinical Practice 404	CMA404	20
Group 2		
Ethics, Jurisprudence and Practice Management 501	BCM501	10
Tuina (Taichi) 405	CMA405	20
Introduction to Research Methodology 502	RMT502	10

	Sub-total	110
	FINAL TOTAL	260

J.164 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.165 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.165.1 Level 1

A student shall be promoted to Level 2 of study on obtaining 130 credits of the Level 1 modules including all modules in Group 1, and provided that the pre-requisites are met and there are no timetable clashes.

J.165.2 Level 2

A student shall complete the degree once 260 credits are obtained and all the requirements for the degree are met.

J.166 ADVANCE REGISTRATION

If a student does not promote to Level 2 of study, they may be allowed to register for Level 2 modules, provided that they have completed at least 115 credits and should not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, and provided that the pre-requisites are met and there are no timetable clashes.

J.167 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.168 SPECIAL REQUIREMENTS FOR THE PROGRAMME

- J.168.1** A student must, in accordance with the requirements of the Allied Health Professions Council of South Africa (AHPCSA), register as a School of Natural Medicine student within two months after admission to the programme.
- J.168.2** Thereafter the student must ensure that they register for each year while within the programme.
- J.168.3** Where a student has interrupted their studies for more than one academic year, and where the curriculum or module content has changed, they shall be expected to register for the additional module(s) or attend classes and write additional tests/ assignments on work not covered during the student's time of study.
- J.168.4** After successful completion of the course, a student may be required to complete a Board exam in order to be registered with the AHPCSA. Professional graduates may enter private practice following AHPCSA registration.

J.191 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.192 PROMOTION RULES

Unless Senate decides otherwise and subject to Rule A.3.2.3 or as provided for in the Faculty rules:

J.192.1 Level 1

A student shall be promoted to Level 2 of study on obtaining 140 credits of the Level 1 modules including all modules in Group 1, and provided that all the pre-requisites are met and there are no timetable clashes.

J.192.2 Level 2

A student shall complete the degree once 270 credits are obtained and all the requirements for the degree are met.

J.193 ADVANCE REGISTRATION

If a student does not promote to Level 2 of study, they may be allowed to register for Level 2 modules, provided that they have completed at least 105 credits and should not take more than 90 credits in total, consisting of repeating credits plus anticipated credits, and provided that the pre-requisites are met and there are no timetable clashes.

J.194 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.3.2.3, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.195 SPECIAL REQUIREMENTS FOR THE PROGRAMME

- J.195.1** A student must, in accordance with the requirements of the Allied Health Professions Council of South Africa (AHPCSA), register as a School of Natural Medicine student within two months after admission to the programme.
- J.195.2** Thereafter the student must ensure that they register for each year while within the programme.
- J.195.3** Where a student has interrupted their studies for more than one academic year, and where the curriculum or module content has changed, they shall be expected to register for the additional module(s) or attend classes and write additional tests/ assignments on work not covered during the student's time of study.
- J.195.4** After successful completion of the course, a student may be required to complete a Board exam in order to be registered with the AHPCSA. Professional graduates may enter private practice following AHPCSA registration. All professional programmes lead to registration with the Allied Health Professions Council of South Africa (AHPCSA) after successful completion of the course. Professional graduates may enter private practice or work within the Health Care system of South Africa when the situation has changed.

POSTGRADUATE DIPLOMA IN CHILD AND FAMILY STUDIES (8849)

J.196 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Postgraduate Diploma in Child and Family Studies - PGDip (Child and Family Studies)**:

J.196.1 An applicant must be in possession of a three year Bachelor's degree or equivalent, preferably in the Social Sciences, Arts, Law, Education or Humanities and have obtained an average mark of 60% and above for their overall previous degree.

J.196.2 Alternative Admission

J.196.2.1 An applicant who completed the NSC in 2008 or thereafter, but has not obtained an endorsement, shall be considered for alternative admission after the age of 23. Such an applicant shall be required to complete an RPL portfolio development course and submit to a process where relevant learning and/or experience shall be assessed.

J.196.2.2 An applicant who is 23 years or older and does not have a matriculation certificate or NSC, but who may have obtained other qualifications or experience that may be deemed to be equivalent to admission criteria for the particular study programmes shall also be required to complete an RPL portfolio development course or an RPL portfolio process as agreed upon, and to submit to a process where such learning, qualification, and/or experience shall be assessed.

J.197 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.198 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over one year full-time study.

POSTGRADUATE DIPLOMA IN PRIMARY CARE NURSING (Full-time - 8305) / (Part-time - 8306)

J.236 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Postgraduate Diploma in Primary Care Nursing - PGDip (Primary Care Nursing)**:

- J.236.1** An applicant must be in possession of a Bachelor's degree in Nursing and Midwifery or equivalent Nursing programme at 480 credits; or
- J.236.2** Advanced Diploma in Midwifery NQF level 7; or
- J.236.3** A 2-year Diploma (Bridging course) leading to registration as General or Psychiatric Nurse offered under Regulation 683 of 14 April 1989 as amended, followed by a 1-year Diploma in Midwifery offered under Regulation 254 of 14 February 1975 as amended; or
- J.236.4** A 4-year Diploma in Nursing and Midwifery offered under Regulation 425 of 22 February 1985 as amended; and two (2) years experience as a Professional Nurse and Midwife, which includes the prescribed period of community service where appropriate; or two (2) years experience as a General Nurse and Midwife.

J.237 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.238 DURATION

Unless Senate decides otherwise the duration of the programme shall extend over one year full-time or two years part-time.

J.239 CURRICULUM

*A full-time student must select all modules

J.239.1 Level 1

Module Name	Module Code	Credits
Paradigms in Primary Care Nursing 712	PCN712	16
Adult Primary Care Nursing 713	PCN713	20
Advanced Practice in Primary Care 715	PCN715	20
	Sub-total	56

J.239.2 Level 2

Module Name	Module Code	Credits
Evidence Based Practice and Dynamics 711	EBH711	24
Primary Care Emergency Nursing 711	PCN711	20
Child Primary Care Nursing 714	PCN714	20
	Sub-total	64
	FINAL TOTAL	120

J.240 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.241 PROGRESSION RULES

J.241.1 Full-time

Unless Senate decides otherwise, a student shall complete the programme in one year. A student shall complete the programme on obtaining 120 credits.

J.241.2 Part-time

Unless Senate decides otherwise, a part-time student shall complete the programme in two consecutive years.

In order to proceed to Level 2 of study, a student must obtain a minimum of 36 credits at Level 1. Notwithstanding the above, a student may only carry Adult Primary Care Nursing 713 (PCN713).

J.242 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the Faculty rules.

J.243 SPECIAL REQUIREMENTS FOR THE PROGRAMME

There are no special requirements for this programme

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

ASSESSMENT TYPE:

Continuous Assessment (CA) or Final Assessment (FA) or Continuous Assessment and Final Assessment (CFA)

MASTER OF ARTS IN BIOKINETICS (THESIS – 8777)

J.260 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Arts in Biokinetics Degree - MA (Biokinetics)**:

- J.260.1** An applicant must be in possession of a Bachelor of Arts Honours Biokinetics Degree, and subject to Rule A.2.4.2.
- J.260.2** An applicant may apply directly to the SRES Department if they are not in possession of an appropriate degree subject to Rule A.2.1.4.
- J.260.3** If, in the opinion of the HoD, the relevant Honours degree is deficient, additional work may be required.

J.261 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.262 DURATION

Unless Senate decides otherwise, the maximum period of study shall extend over three years. Subject to Rule A.4.

J.263 CURRICULUM

Module Name	Module Code	Credits
1st Enrolment Code Biokinetics Master's Thesis 801	BKT801	180
2nd Enrolment Code Biokinetics Master's Thesis 802	BKT802	
	FINAL TOTAL	180

J.264 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.265 PROGRESSION RULES

Registration for the following year of study shall be recommended by the supervisor if in their opinion adequate progress has been made during the current year.

J.266 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.267 SPECIAL REQUIREMENTS FOR THE PROGRAMME

J.267.1 An oral examination may be required.

J.267.2 Additional modules in Sport, Recreation and Exercise Science, or related modules may be required.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

BKT802	Biokinetics Master's Thesis 802	C	1		9	2	YR	None	None	FA

MASTER OF ARTS IN CHILD AND FAMILY STUDIES (Thesis - 8851)

J.268 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Arts in Child and Family Studies Degree - MA (Child and Family Studies)**:

J.268.1 The programme is open to applicants in possession of an Honours degree, preferably in the Social Sciences, Arts, Law, Education or Humanities or another (second) approved degree or equivalent, a Postgraduate Diploma in Child and Family Studies, or a four year degree approved by Senate, or meet the requirements of general Rule A.2.1.4. In the case of the four year degree, a prospective applicant should have 60% and above in their research module or 60% and above for their overall previous degree.

J.268.2 An applicant should have a working title for their Research project/full thesis.

J.269 SELECTION

J.269.1 Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.269.2 Prospective applicants shall be required to make themselves available for a selection process.

J.270 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over two years full-time or three years part-time study.

J.271 CURRICULUM

Module Name	Module Code	Credits
1st Enrolment Code		
Child and Family Studies - Thesis 801	CFS801	
2nd Enrolment Code		180
Child and Family Studies - Thesis 802	CFS802	
	FINAL TOTAL	180

J.272 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.273 PROGRESSION RULES

J.273.1 Registration for the following year of study shall be recommended by the supervisor if in their opinion adequate progress has been made during the current year.

J.273.2 A student must complete at least 180 credits by the end of year two.

J.273.3 A student must register a thesis title before the second year of registration.

J.274 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.275 SPECIAL REQUIREMENTS FOR THE PROGRAMME

A student must be available for lectures with regards to their modules as prescribed by the department and must meet with their supervisors according to the memorandum of understanding.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

ASSESSMENT TYPE:

Continuous Assessment (CA) or Final Assessment (FA) or Continuous Assessment and Final Assessment (CFA)

MASTER OF SCIENCE IN BIOKINETICS (Thesis - 8778)

J.308 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Science in Biokinetics Degree - MSc (Biokinetics)**:

- J.308.1** An applicant must be in possession of a Bachelor of Science Honours Biokinetics degree and subject to Rule A.2.4.2.
- J.308.2** An applicant may apply directly to the SRES Department if they are is not in possession of an appropriate degree subject to Rule A.2.1.4.
- J.308.3** If, in the opinion of the HoD, the relevant Honours degree is deficient, additional work may be required.

J.309 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.310 DURATION

Unless Senate decides otherwise, the maximum period of study shall extend over three years.

J.311 CURRICULUM

Module Name	Module Code	Credits
1st Enrolment Code		
Biokinetics Thesis 801	BKT801	
2nd Enrolment Code		
Biokinetics Thesis 802	BKT802	180
	FINAL TOTAL	180

J.312 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.313 PROGRESSION RULES

Registration for the following year of study shall be recommended by the supervisor if in their opinion adequate progress has been made during the current year.

J.314 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.315 SPECIAL REQUIREMENTS FOR THE PROGRAMME

- J.315.1** An oral examination may be required.

J.315.2 Additional modules in Sport, Recreation and Exercise Science, or related modules may be required.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (**C**), Electives (**E**), Year Module (**YR**), Semester Module (**S**), Pre-requisites and Co-requisites, Service Module (**SM**)

ASSESSMENT TYPE:

Continuous Assessment (**CA**) or Final Assessment (**FA**) or Continuous Assessment and Final Assessment (**CFA**)

Module Code	Module Name	Compulsory	Level	Credits	NQF Level	Enrolment Year	Duration	Pre-Requisite	Co-Requisite	Assessment Type
BKT801	Biokinetics Thesis 801	C	1	180	9	1	YR	None	None	FA
BKT802	Biokinetics Thesis 802	C	1		9	2	YR	None	None	FA

MASTER OF SCIENCE IN NUTRITION (Thesis - 8784)

J.316 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Science in Nutrition Degree - MSc (Nutrition)**:

J.316.1 A four-year integrated Bachelor of Science degree in Dietetics or Nutrition, or

J.316.2 Bachelor of Science Honours degree in Dietetics or Nutrition, or

J.316.3 Any other equivalent qualification approved by Senate and the Department of Dietetics and Nutrition.

All the aforementioned degrees must have been passed with a minimum aggregate of 60%.

J.317 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.318 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over two years full-time or three years part-time.

J.319 CURRICULUM

Module Name	Module Code	Credits
1st Enrolment Code		
Nutrition Thesis 801	NUT801	
2nd Enrolment Code		
Nutrition Thesis 802	NUT802	180
	FINAL TOTAL	180

J.320 ASSESSMENT

The research will be written up as a full thesis. A student shall have to prepare a manuscript of an article for a named peer reviewed journal. The manuscript must meet all the requirements set out in the Instructions for Authors of that journal, including word count and referencing style (the journal must allow at least 3 000 words). The instructions to Authors must be appended. Supervisors will assist a student to identify an appropriate journal. In a multi-author project, a student would be expected to be the first author.

J.321 PROGRESSION RULES

J.321.1 To complete the qualification, a student must complete the full thesis (180 credits) by the end of their second year (full-time) or third year (part-time).

J.321.2 A student who does not comply with the requirements for completion of the MSc Nutrition in the maximum time must obtain permission from Senate for extension or readmission to the programme.

J.321.3 A student must submit and register a thesis title during their first year of registration.

J.322 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.323 SPECIAL REQUIREMENTS FOR THE PROGRAMME

There are no special requirements for this programme.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

ASSESSMENT TYPE:

Continuous Assessment (CA) or Final Assessment (FA) or Continuous Assessment and Final Assessment (CFA)

Module Code	Module Name	Compulsory	Level	Credits	NQF Level	Enrolment Year	Duration	Pre-Requisite	Co-Requisite	Assessment Type
NUT801	Nutrition Thesis 801	C	1	180	9	1	YR	None	None	FA
NUT802	Nutrition Thesis 802	C	1		9	2	YR	None	None	FA

MASTER OF PUBLIC HEALTH IN NUTRITION (8789)

J.324 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Public Health in Nutrition Degree - MPH (Nutrition)**:

J.324.1 A four year integrated Bachelor of Science degree in Dietetics or Nutrition, or

J.324.2 Bachelor of Science Honours Degree in Dietetics or Nutrition with a Diploma in Hospital Dietetics, or

J.324.3 Any other equivalent qualification approved by Senate and the Department of Dietetics and Nutrition.

All the aforementioned degrees must have been passed with a minimum aggregate of 60%.

J.325 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.326 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over two years full-time or three years part-time.

J.327 CURRICULUM

Module Name

Group 1 (select all modules)

	Module Code	Credits
Management Strategies 857	SPH857	15
Population Health and Development 855	SPH855	15
Measuring of Health and Disease 856	SPH856	15
Public Health Nutrition: Policy and Programming 870	SPH870	15
	Sub-total	60

Group 2 (select two modules)

Health Promotion for Public Health 859	SPH859	15
Qualitative Research Methods 860	SPH860	15
Quantitative Research Methods 861	SPH861	15
Micronutrient malnutrition 864	SPH864	15
Monitoring and Evaluation in Health and Development Programming 866	SPH866	15
Epidemiology of Non-Community Disease 867	SPH867	15
	Sub-total	30

1st Enrolment Code

Nutrition Mini-Thesis 803	NUT803	
		90

2nd Enrolment Code

Nutrition Mini-Thesis 804	NUT804	
	Sub-total	90

FINAL TOTAL 180

J.328 ASSESSMENT

Formative assessment takes place through self-assessment practice tasks embedded in the modules, as well as through tutoring and continuous assessment tasks. Summative assessment is achieved through a final assignment in each module which integrates core competences. The mini-thesis will be based upon an internship of six months in a particular community or setting during which the student will plan, implement and evaluate a nutrition intervention. The evaluation of the intervention will be written up as the mini-thesis.

J.329 PROGRESSION RULES

J.329.1 To complete the qualification, a student must complete all prescribed modules and obtain a total of 180 credits.

J.329.2 A student who does not comply with the requirements for completion of MPH in the maximum time must obtain permission from Senate for extension of studies or readmission to the programme.

J.329.3 In order to progress:

- A student must complete at least 45 credits by the end of Year 1 (3 Modules).
- A student must complete at least 90 credits by the end of Year 2 (6 Modules).
- Registration for the following year of study, Year 3, shall be recommended by the supervisor if in their opinion adequate progress has been made with the mini-thesis during the second year.

J.329.4 Where the rules governing a curriculum are amended and Senate does not decide otherwise, a student who registered under the old rules, elect to proceed with their studies either in terms of the old rules or in terms of the new rules, provided that:

- (a) they may not elect to proceed partially in terms of the old and partially in terms of the new rules;
- (b) they shall be bound by their choice; and
- (c) their right to proceed in terms of the old rules, should they so have elected, shall lapse should they fail to gain sufficient credits to proceed to the following Level of study (Ref A1.1.3).

J.330 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.331 SPECIAL REQUIREMENTS FOR THE PROGRAMME

There are no special requirements for this programme.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

MASTER OF SCIENCE IN OCCUPATIONAL THERAPY (Thesis - 8118)

J.332 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Science in Occupational Therapy Degree - MSc (Occupational Therapy)**:

- J.332.1** To be admitted to the course, a four-year Bachelor's degree in Occupational Therapy, or equivalent approved by Senate, is required.
- J.332.2** At the discretion of the department an applicant should have a minimum of three years work experience as an Occupational Therapist.
- J.332.3** An applicant with two years work experience shall be considered on the basis of their research idea(s).
- J.332.4** An applicant without any work experience shall be considered on academic merit.

J.333 SELECTION

Final selection shall be based on applicant meeting the criteria as determined by the Faculty.

J.334 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over a minimum of one year full-time or two years part-time subject to Rule A.4.2.

J.335 CURRICULUM

Module Name	Module Code	Credits
1st Enrolment Code		
Occupational Therapy Thesis 801	OCT801	
2nd Enrolment Code		
Occupational Therapy Thesis 802	OCT802	180
	FINAL TOTAL	180

J.336 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.337 PROGRESSION RULES

Registration for the following year of study shall be recommended by the supervisor if in their opinion adequate progress has been made during the current year.

J.338 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.339 SPECIAL REQUIREMENTS FOR THE PROGRAMME

There are no special requirements for this programme.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

ASSESSMENT TYPE:

Continuous Assessment (CA) or Final Assessment (FA) or Continuous Assessment and Final Assessment (CFA)

OCT802	Occupational Therapy Thesis 802	C	1		9	2	YR	None	None	FA

MASTER OF SCIENCE IN PHYSIOTHERAPY (Thesis - 8218)

J.340 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Science in Physiotherapy Degree - MSc (Physiotherapy)**:

- J.340.1** An applicant in possession of a Bachelor of Science Honours Degree in Physiotherapy may apply for admission to the programme. In certain circumstances, admission is open to applicants who are in possession of a degree in Physiotherapy (or equivalent professional qualification) and who have had suitable clinical experience, see Rule A.2.1.4.
- J.340.2** An applicant should be eligible for registration as a Physiotherapist with the Health Professions Council of South Africa (HPCSA).

J.341 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.342 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over a minimum of one year full-time or two years part-time subject to Rule A.4.2.

J.343 CURRICULUM

Module Name	Module Code	Credits
1st Enrolment Code		
Physiotherapy Thesis 801	PTH801	
2nd Enrolment Code		180
Physiotherapy Thesis 802	PTH802	
	FINAL TOTAL	180

J.344 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.345 PROGRESSION RULES

Registration for the following year of study shall be recommended by the supervisor if in their opinion adequate progress has been made during the current year.

J.346 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.347 SPECIAL REQUIREMENTS FOR THE PROGRAMME

- J.347.1** A student may be required to do an oral examination.
- J.347.2** Additional modules in Physiotherapy or a related subject may be prescribed.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

ASSESSMENT TYPE:

Continuous Assessment (CA) or Final Assessment (FA) or Continuous Assessment and Final Assessment (CFA)

MASTER OF NURSING (Structured - 8863)

(not offered from 2021)

J.348 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Nursing Degree - MNurs (as indicated in J.351)**:

J.348.1 Current registration as a professional nurse.

J.348.2 Current registration with South African Nursing Council (SANC) as a professional nurse.

J.348.3 Additional basic qualifications are needed for discipline specific qualification in Midwifery, Psychiatry and Community Health is required for the specific electives.

J.349 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.350 DURATION

Unless Senate decides, otherwise the duration of the programme shall extend over one year full-time study and two years part-time study.

J.351 CURRICULUM

The Master of Nursing programme is offered in the following specialisation areas:

- Master of Nursing in Advanced Psychiatry
- Master of Nursing in Family Nurse Practitioner
- Master of Nursing in Midwifery and Neonatology
- Master of Nursing in Nursing Education

J.351.1 Master of Nursing in Advanced Psychiatry

Module Name	Module Code	Credits
Compulsory		
1st Enrolment Code		
Nursing Mini-Thesis 803	NUR803	
2nd Enrolment Code		90
Nursing Mini-Thesis 804	NUR804	
	Sub-total	90
Child and Adolescent Mental Health 814	NAP814	10

	Sub-total	90
	FINAL TOTAL	180

J.352 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.353 PROGRESSION RULES

Registration for the following year of study shall be recommended by the supervisor if in their opinion adequate progress has been made during the current year.

J.354 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.355 SPECIAL REQUIREMENTS FOR THE PROGRAMME

Please Note:

Students who registered for the MCur programme prior to 2009 should refer to the 2009/2010 Faculty of Community and Health Sciences Calendar for curriculum and rules pertaining to this programme.

MASTER OF NURSING (Thesis - 8868)

J.356 ADMISSION

Unless Senate decides otherwise, a student shall will be required to meet the following criteria to be enrolled for the **Master of Nursing Degree – MNurs**:

J.356.1 A four-year Bachelor of Nursing Degree or equivalent.

J.356.2 Current registration as a professional nurse.

J.357 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.358 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over one year subject to Rule A.4.2.

J.359 CURRICULUM

Module Name	Module Code	Credits
1st Enrolment Code		
Nursing Master's Thesis 801	NUR801	
2nd Enrolment Code		
Nursing Master's Thesis 802	NUR802	180
	FINAL TOTAL	180

J.360 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.361 PROGRESSION RULES

Registration for the following year of study shall be recommended by the supervisor if in their opinion adequate progress has been made during the current year.

J.362 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.363 SPECIAL REQUIREMENTS FOR THE PROGRAMME

Students are expected to present to the department regularly for supervision/guidance and to attend the recommended additional modules, skills development and seminars as relevant to the students' needs, or determined by the department.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

ASSESSMENT TYPE:

Continuous Assessment (CA) or Final Assessment (FA) or Continuous Assessment and Final Assessment (CFA)

Module Code	Module Name	Compulsory	Level	Credits	NQF Level	Enrolment Year	Duration	Pre-Requisite	Co-Requisite	Assessment Type
NUR801	Nursing Master's Thesis 801	C	1	180	9	1	YR	None	None	FA
NUR802	Nursing Master's Thesis 802	C	1		9	2	YR	None	None	FA

MASTER OF PUBLIC HEALTH (Structured - 8801) / (Thesis – 8802)

(Master of Public Health (Thesis – 8802) - not offered to new students in 2026)

MODE 1: Coursework and Mini-Thesis (8801)

J.364 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Public Health Degree - M (Public Health)**:

- J.364.1** An applicant must be in possession of an Honours degree, Postgraduate Diploma in Public Health or equivalent in any relevant discipline.
- J.364.2** A minimum of three years working experience in the health or welfare sector is required.
- J.364.3** An applicant who does not have credit for a tertiary level module in disease pathogenesis, disease measurement or disease control must take the module, Introducing Public Health: Its Basis and Scope (SPH730) from the PG Diploma in Public Health, and passes an assessment before or during their first semester.
- J.364.4** With due regard to Rule A.2.1.4, personnel in the health and welfare sector with a minimum of five years relevant experience in implementing health and welfare policy or planning and managing health and welfare services, may be admitted to the course after assessment of prior learning and experience.
- J.364.5** Additional supporting documents may be required by the University from time to time.

J.365 SELECTION

- J.365.1** Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.
- J.365.2** Preference shall be given to applicants employed in the health and welfare sector with a minimum of three years relevant experience.

J.366 DURATION

Unless Senate decides otherwise the duration of the programme shall extend over a maximum of three years full-time or part-time. Students must apply to the Senate in order to enrol for a fourth year.

J.367 CURRICULUM

Module Name	Module Code	Credits
Compulsory		
Group 1		
Population Health and Development:		
A Primary Health Care Approach 855	SPH855	15
Measuring Health and Disease – Intermediate Epidemiology 856	SPH856	15
Management Strategies 857	SPH857	15

Health Promotion for Public Health 859	SPH859	15

	Sub-total	30
Public Health Mini-Thesis 803	SPH803	60
Public Health Mini-Thesis 804	SPH804	60
	Sub-total	60
	FINAL TOTAL	180

**Consult with the SoPH which electives will be offered each year.*

J.368 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.369 PROGRESSION RULES

- J.369.1** A student must complete 45 credits by the end of Year 1 (3 Modules).
- J.369.2** A student must complete 75 credits by the end of Year 2 (5 Modules).
- J.369.3** A student must have successfully completed the Measuring Health and Disease (SPH856) module before commencing with the Public Health Research (SPH862) module.
- J.369.4** A student must have successfully completed the Public Health Research module (SPH862) before commencing the Qualitative Research Methods (SPH860) or Quantitative Research Methods (SPH861) modules.
- J.369.5** Registration for the following year of study shall be recommended by the supervisor if in their opinion adequate progress has been made with the mini-thesis during the current year.
- J.369.6** A student must have successfully completed all prescribed modules and obtained a total of 180 credits to complete the degree.
- J.369.7** Where the rules governing a curriculum are amended and Senate does not decide otherwise, a student who registered under the old rules, elect to proceed with their studies either in terms of the old rules or in terms of the new rules, provided that:
 - (a) they may not elect to proceed partially in terms of the old and partially in terms of the new rules;
 - (b) they shall be bound by their choice; and

- (c) their right to proceed in terms of the old rules, should they so have elected, shall lapse should they fail to gain sufficient credits to proceed to the following level of study (Rule A.1.1.3).

J.370 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.371 SPECIAL REQUIREMENTS FOR THE PROGRAMME

There are no special requirements for this programme.

MODE 2: Thesis (8802) (not offered in 2026)

J.372 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Public Health Degree: M (Public Health): (as indicated in J.375 below)**

- J.372.1** an Honours degree, Postgraduate Diploma in Public Health or equivalent in any relevant discipline or completion within the preceding five years of Master's level coursework covering the competencies of the core modules of the UWC MPH degree.
- J.372.2** a minimum of three years relevant experience in the health or welfare sector with significant research or monitoring and evaluation experience.
- J.372.3** a tertiary level module in disease pathogenesis, disease measurement or disease control, if the applicant does not have the credit then they have to take the module, Introducing Public Health: Its Basis and Scope (SPH730) from the PG Diploma in Public Health, and passes an assessment before or during their first semester.
- J.372.4** a minimum of five years in the health and welfare sector with relevant experience in implementing health and welfare policy or planning and managing health and welfare services
- J.372.5** Supporting documents as evidence of eligibility.
- J.372.6** An applicant who fits the above criteria may be requested to attend an interview.

J.373 SELECTION

- J.373.1** Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.
- J.373.2** Preference shall be given to applicants employed in the health and welfare sector with a minimum of three years relevant experience.

J.374 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over a minimum of two years and a maximum of three years. Students must apply to the Senate in order to enrol for a fourth year.

J.375 CURRICULUM

A student must select a topic and design and complete a research project that is situated within the scope of topics and approaches covered in the Areas of Specialisation (listed in Table 1) offered at the school. A student may choose to enrol for these modules for non-degree purposes in order to strengthen their own personal development. With permission from SOPH, a student may apply the content and approach of other disciplines to their thesis project, provided these are deemed of direct relevance to Public Health.

Module Name	Module Code	Credits
1st Enrolment Code		
MPH Full Thesis 805	SPH805	
2nd Enrolment Code		
MPH Full Thesis 806	SPH806	180
	FINAL TOTAL	180

Table 1:

Areas of Specialisation within the School of Public Health

1. Population Health and Development: A Primary Health Care Approach
2. Measuring Health and Disease - Intermediate Epidemiology
3. Management Strategies for the Public Health Services
4. Health Promotion for Public Health
5. Qualitative Research Methods
6. Quantitative Research Methods
7. Public Health Research

Health Promotion

8. Alcohol Problems: A Health Promotion Approach

Health Research

9. Monitoring and Evaluation in Health and Development Programmes

Health Information

10. Using Information for Effective Management I

Nutrition

11. Public Health Nutrition: Policy and Programming
12. Epidemiology of Non-Communicable Diseases

Pharmaceutical Public Health

13. Medicine Supply Management
14. Rational Medicine Use

Other electives

15. Globalisation and Health

16. Understanding and Analysing Health Policy

J.376 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.377 PROGRESSION RULES

J.377.1 A student must have submitted an approved research proposal to Senate Higher Degrees by the end of Year 1.

J.377.2 A student must complete data collection by the end of Year 2.

J.377.3 Registration for the following year of study shall be recommended by the supervisor if in their opinion adequate progress has been made with the thesis during the current year.

J.377.4 A student must have successfully completed the thesis to complete the degree.

J.378 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.379 SPECIAL REQUIREMENTS FOR THE PROGRAMME

There are no special requirements for this programme.

MASTER OF SOCIAL WORK (Thesis – 8828)

J.380 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Social Work Degree - M (Social Work)**:

- J.380.1** The general rule on admission A.2.4.2 shall apply with a minimum of 65% pass mark in the research module or research background with evidence required.
- J.380.2** Additional research modules may be prescribed to the applicant to augment their research knowledge.

J.381 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.382 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over three years.

J.383 CURRICULUM

Module Name	Module Code	Credits
1st Enrolment Code		
Social Work Master Thesis 801	SCW801	
2nd Enrolment Code		
Social Work Master Thesis 802	SCW802	180
	FINAL TOTAL	180

J.384 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.385 PROGRESSION RULES

Registration for the following year of study shall be recommended by the supervisor if in their opinion adequate progress has been made during the current year.

J.386 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.387 SPECIAL REQUIREMENTS FOR THE PROGRAMME

- J.387.1** A student must be available for lectures or seminars prescribed by the department in support of successfully completing the MA Thesis.

J.387.2 A student shall be required to present their proposal on a prescribed date determined by the department before handing in the final proposal to the Faculty Higher Degrees and Senate Higher Degrees Committees.

J.387.3 A student must meet with their supervisor(s) according to the memorandum of understanding dually signed by both parties.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

ASSESSMENT TYPE:

Continuous Assessment (CA) or Final Assessment (FA) or Continuous Assessment and Final Assessment (CFA)

MASTER OF PHILOSOPHY IN SPORT FOR DEVELOPMENT (8651)

(not offered to new student in 2026)

J.388 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Philosophy in Sport for Development Degree - MPhil (Sport for Development)**:

J.388.1 A relevant four year degree, an Honours qualification or equivalent professional qualification in a cognate field of study.

J.389 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty. Applicants will be interviewed by a panel and they should demonstrate a basic knowledge of the field of sport, development and conflict transformation. Current work experience in these areas will be an added advantage.

J.390 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over three years.

J.391 CURRICULUM

Module Name	Module Code	Credits
Compulsory		
1st Enrolment Code		
Mini-Thesis 803	SRD803	60
2nd Enrolment Code		
Mini-Thesis 804	SRD804	
	Sub-total	60
Concepts and Trends in Sports for Development 811	SRD811	20
Applied Research Methods 812	SRD812	20
	Sub-total	40
Electives (select four modules)		
Gender in Sport 820	SRD820	20
Sport, Peace and Social Transformation 823	SRD823	20
Socio-Economic Development 824	SRD824	20
Sport and Community Development 825	SRD825	20
Sport Ethics 826 (not offered in 2026)	SRD826	20
	Sub-total	80
	FINAL TOTAL	180

J.392 ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

J.393 PROGRESSION RULES

A full-time student must complete 80 credits by the end of year 1 (4 modules) which includes the 40 credits from the two core modules (excluding thesis). A student must complete at least 120 credits by the end of year 2 (6 modules).

Should a student not complete within the minimum prescribed period, registration for the following year is dependent on recommendation by the supervisor and HoD.

J.394 RENEWAL OF REGISTRATION

Renewal of registration shall be governed by Rule A.4, as stipulated in the University Calendar: General Information Part 1 or as provided for in the faculty rules as contained in this Calendar.

J.395 SPECIAL REQUIREMENTS FOR THE PROGRAMME

J.395.1 A student must be available for lectures or seminars prescribed by the department in support of successfully completing the MPhil Thesis.

J.395.2 A student shall be required to present their proposal on a prescribed date determined by the department before handing in the final proposal to the Faculty Higher Degrees and Senate Higher Degrees Committees.

J.395.3 A student must meet with their supervisor(s) according to the memorandum of understanding dually signed by both parties.

MODULE LIST PER YEAR LEVEL:

MODULE TYPE:

Compulsory (C), Electives (E), Year Module (YR), Semester Module (S), Pre-requisites and Co-requisites, Service Module (SM)

MASTER OF HEALTH DATA ANALYTICS (8787)

J.396 ADMISSION

Unless Senate decides otherwise, a student shall be required to meet the following criteria to be enrolled for the **Master of Health Data Analytics - M (Health Data Analytics)**:

- J.396.1** An applicant must have a qualification at NQF level 8 or equivalent in any cognate discipline (Health Sciences, Computer Science, Statistics and Psychology).
- J.396.2** An applicant may be admitted in line with prior learning and relevant experience according to Rule A.2.1.4 and Senate approval.
- J.396.3** Applicants who have completed modules in Bio-Statistics and Bio-informatics as part of a completed qualification other than the qualifications listed above could be considered.
- J.396.4** Applicants should be able to work remotely.

J.397 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.398 DURATION

Unless Senate decides otherwise, the duration of the programme shall extend over two years full-time.

J.399 CURRICULUM

J.399.1 Level 1

Module Name	Module Code	Credits
Compulsory		
Research Methods 811	HDA811	20
Data Analytics in Health Systems and Policies 812	HDA812	20

DOCTOR OF PHILOSOPHY (8950)

J.404 ADMISSION

Unless Senate decides otherwise, a candidate shall be required to meet the following criteria to be enrolled for the **Doctor of Philosophy Degree - PhD (as indicated in J.407)**:

J.404.1 A candidate shall have obtained a Master's degree or equivalent qualification in the subject they wish to study and submit proof thereof, and

J.404.2 Satisfied Senate as to their proficiency in the subject.

J.405 SELECTION

Final selection shall be based on an applicant meeting the criteria as determined by the Faculty.

J.406 DURATION

Unless Senate decides otherwise, the duration of the degree is subject to Rule A.4.4 in the University Calendar Part 1.

J.407 CURRICULUM

The PhD programme is offered in the following specialisation areas:

- Child and Family Studies
- Nursing
- Occupational Therapy
- Physiotherapy
- Psychology
- Public Health
- Social Work
- Sport, Recreation and Exercise Science

Module Name (select one discipline)	Module Code	Credits
J.407.1 Child and Family Studies		
Module Name	Module Code	Credits
Compulsory		
1st Enrolment		
Child and Family Studies Doctoral Thesis 901	CFS901	
2nd Enrolment

UNDERGRADUATE MODULE DESCRIPTORS

Faculty	Community and Health Sciences		Home Department			School of Natural Medicine (SoNM)	
Module Name	General Medicine 301		Module Code			BCM301	
Module Type	Core	NQF Level	7	Year Level	3	NQF Credit	30
Programmes in which the module will be offered		BSc (Complementary Health Sciences) (8104, 8106)			Total Learning Time		300 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: - Define and critically discuss the art, science and principles used in the diagnostic method as applied in clinical medicine. - Analyse and interpret signs, symptoms, biochemical tests and special investigations in the evaluation of patients. - Discuss causes, risk factors, epidemiology, pathology, clinical and laboratory presentations, diagnostic criteria, prognosis and management of specific disease processes using appropriate scientific terminology. - Critically discuss evidence based medicine. - Integrate basic science and pathological terminology and concepts in the diagnostic process. - Demonstrate an understanding that the body can't be separated into individual systems.						
Main Content	- Introduction to the principles of medical diagnostics - The comprehensive health history and general examination - Biochemical, laboratory and special investigations - Evidence based medicine - External features of disease - Dermatology - Haematology - Cardiology and vascular disease - Pulmonology - Urology						
Pre-requisite	NAT311, MBS231, MBS232, MBS251, MBS252		Prohibited module Combination		None		
Co-requisite	NAT321						
Timetable Requirement per week			4	Lectures p.w.			
			0	Practicals p.w.			
			0	Tutorials p.w.			
Other teaching modes that does not require time-table							
Assessment Module Type	Continuous and Final Assessment (CFA)		Method of Student Assessment		CA	60%	
					FA	40%

Module Name	Tuina (Taichi) 405			Module Code			CMA405	
Module Type	Core	NQF Level	8	Year Level	1	NQF Credit	20	
Programme in which the module will be offered		B (Complementary Medicine) (Chinese Medicine and Acupuncture) (8344)				Total Learning Time	200 hours	
Duration	Year			Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Apply the various techniques of Tuina application to adults, children and infants. • Use the commonly used and most effective points, body areas and complex manipulations in terms of TCM therapeutic principles and Tuina methods. • Formulate a treatment plan using pediatric Tuina methods to address common pediatric illnesses. • Effectively teach the parents/guardians simple techniques to do at home for the patient. • Conduct the therapy with confidence and a professional demeanor with regard for the patients comfort while ensuring techniques are done appropriately.							

	Competency in performing basic Taichi Yang-style movements in an attempt to improve the practitioners' strength and health for better practice.			
Main Content	- This module covers the basic theory of Tuina (Chinese therapeutic massage) therapy. Theory and Hands on Practical sessions with special focus on Pediatrics Tuina. Students learn how to treat common childhood illnesses applying this particular modality as an adjunct to the other modalities used in their professional practice. Classes are predominantly practical in nature with repetition of techniques and methods until proficiency is attained. Thereafter learned techniques are applied to simulated real-life conditions commonly presenting in pediatrics. Students also learn the place of Tuina in pediatric and how and when it is used most appropriately. Reference is made to Internal Medicine and diseases. - Basic training in the theory and practice of Yang-style Taichi, focusing on movement, breathing, strength and execution of the techniques.

Programme in which the module will be offered		BNurs (8311)				Total Learning Time	300 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate competence in the prevention of the spread of communicable diseases. • Demonstrate competence in application of epidemiological principles in planning and monitoring population-based health. • Demonstrate an understanding of spirometric screening in an occupational health setting. • Demonstrate competence in identification and utilization of trends in the health status of individuals at primary Level of care. • Relevant assessment and management of individuals and families in a community setting throughout the lifespan (school-aged child, adult, older adult).						
Main Content	• Communicable and non-communicable disease • Occupational health screening • Population based health promotion • Epidemiological principles						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	CUR325						

Timetable Requirement per week	4	Lectures p.w.		
	24	Practicals p.w.		
	0	Tutorials p.w.		
Other teaching modes that does not require time-table				
Assessment Module Type	Continuous and Final Assessment (CFA)	Method of Student Assessment	CA	60%
			FA	40%

Faculty	Community and Health Sciences		Home Department			School of Nursing (SoN)	
Module Name	Community Health Nursing 325		Module Code			CUR325	
Module Type	Elective	NQF Level	7	Year Level	3/4	NQF Credit	15
Programme in which the module will be offered		BNurs (8311)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate competence in carrying out physical assessment of an individual at primary care Level. • Demonstrate ability to identify trends in health status of individuals at primary Level of care using appropriate demographic health behaviors. • Demonstrate competence in diagnosing common conditions presenting at primary Level of care. • Demonstrate ability to select the most appropriate, safe, cost effective and suitable treatment for a variety of common conditions presenting at primary Level of care. • Demonstrate a sound knowledge of Anti Retro Viral Treatment protocols in the provision of care to individuals at primary care Level.						
Main Content	• Integrated assessment, diagnostic and management skills with regards to endemic conditions related to all body systems. • Provincial Health Plan 2010 and the role of the primary health care nurse in context of the National Health Act.						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	None						
Timetable Requirement per week			2	Lectures p.w.

Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Manage a food service operation • Plan, implement and control a budget • Manage human resources • Plan, implement, adapt and cost menus						
Main Content	• Types of foodservice operations • Foodservice functions - food safety, HACCP • The menu • Purchasing • Receiving, storage and inventory • Production • Service • Cleaning, sanitation and safety • Environmental management • Facilities planning and design • Equipment and furnishing • Organizational Design • Human Resource Management • Performance Improvement • Accounting Procedures						
Pre-requisite	DIE313, DIE323		Prohibited module Combination			None	
Co-requisite	None						
Timetable Requirement per week			0	Lectures p.w.			
			0	Practicals p.w.			
			0	Tutorials p.w.			
Other teaching modes that does not require time-table							
Internship 368 hours							
Assessment Module Type	Continuous and Final Assessment (CFA)		Method of Student Assessment			CA	60%
						FA	40%

Faculty	Community and Health Sciences		Home Department		Dietetics and Nutrition		
Module Name	Dietetics Research Project 404		Module Code		DIE404		
Module Type	Core	NQF Level	8	Year Level	4	NQF Credit	15
Programme in which the module will be offered	BSc (Dietetics) (8231)				Total Learning Time	150 hours	

Duration	Year	Proposed Semester		Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: Demonstrate understanding and skills in: - the research process - data analysis - interpretation and discussion of results - presentation of research results in oral and written format				
Main Content	Research Project				
Pre-requisite	DIE317, NUT344	Prohibited module Combination		None	
Co-requisite	STA501				
Timetable Requirement per week		0	Lectures p.w.		
		0	Practicals p.w.		
		0	Tutorials p.w.		
Other teaching modes that does not require time-table					
Internship (Research Project)					
Assessment Module Type	Continuous and Final Assessment (CFA)	Method of Student Assessment		CA	60%
				FA	40%

Faculty	Community and Health Sciences		Home Department			Dietetics and Nutrition	
Module Name	Dietetics 414		Module Code			DIE414	
Module Type	Core	NQF Level	8	Year Level	4	NQF Credit	5
Programme in which the module will be offered		BSc (Dietetics) (8231)				Total Learning Time	50 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Apply the principles of behavioural sciences to the professional practice by dietitians (in assessment, counselling, education, patient management)						
Main Content	Introduction to psychological theories, abnormal psychology, health psychology, and application to the field of practice of dietitians						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	None						
Timetable Requirement per week			2	Lectures p.w.			
			0	Practicals p.w.			
			0	Tutorials p.w.			
Other teaching modes that does not require time-table							
Assessment Module Type	Continuous Assessment (CA)		Method of Student Assessment			CA	100%

Faculty	Community and Health Sciences		Home Department		Dietetics and Nutrition		
Module Name	Ethics and Practice Management for Dietetics 425		Module Code		DIE425		
Module Type	Core	NQF Level	8	Year Level	4	NQF Credit	10
Programme in which the module will be offered	BSc (Dietetics) (8231)				Total Learning Time	100 hours	

Duration	Semester	Proposed Semester	Second Semester		
Main Learning Outcomes	On completion of this module, students should be able to:				
	• Outline the essential elements of ethics and human rights in the conduct of nutrition and dietary research.				
	• Outline the essential elements of ethics and human rights in the conduct of nutrition and dietetics practice.				
	• Write a business plan for an independent practice.				
	• Outline the basic management principles related to an independent practice.				
Main Content	• Outline the essential legislative principles related to nutrition and dietary research as well as independent practice.				
	Ethics in practice and research. Basic principles of starting and managing a private practice. Legislative principles related to the Dietetics and Nutrition professions.				
	Pre-requisite	None	Prohibited module Combination	None	
	Co-requisite	None

		3	Lectures p.w.		
		0	Practicals p.w.		
		0	Tutorials p.w.		
Other teaching modes that does not require time-table					
Assessment Module Type	Continuous Assessment (CA)	Method of Student Assessment	CA	100%	

Faculty	Community and Health Sciences		Home Department			Interprofessional Education Unit	
Module Name	Health, Development and Primary Health Care 111		Module Code			HDP111	
Module Type	Core	NQF Level	5	Year Level	1	NQF Credit	5
Programmes in which the module will be offered		B (Oral Health) (5211), BDS (5101)				Total Learning Time	50 hours
Duration	Term		Proposed Semester			Second Term	
Main Learning Outcomes	On completion of this module, students should be able to: • Discuss the concepts of health, development and primary health care. • Explain the links between health, development and primary health care. • Describe the origins and main features of comprehensive primary health care. • Discuss the primary health care approach, the value of interdisciplinary and team work and the importance of community service. • Demonstrate the basic rules and customs of academic study, academic language, and academic argument.						
Main Content	• Definition of Health. • Communication and Multilingualism. • Introduction to 'development'. • Introduction to Primary Health Care. • The link between Health, Development and PHC.						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	None						

Timetable Requirement per week		0	Lectures p.w.				
		0	Practicals p.w.				
		0	Tutorials p.w.				
Other teaching modes that does not require time-table							
Assessment Module Type	Continuous and Final Assessment (CFA)		Method of Student Assessment		CA	60%	
					FA	40%	
Faculty	Community and Health Sciences		Home Department		School of Nursing (SoN)		
Module Name	Health, Development and Primary Health Care 116		Module Code		HDP116		
Module Type	Core	NQF Level	5	Year Level	1	NQF Credit	5
Programme in which the module will be offered		BNurs (8313)				Total Learning Time	50 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate an understanding of the concepts of health and the social determinants of health. • Analyze the impact of social inequality, poverty and underdevelopment in a local community context. • Describe the origins and main features of the Primary Health Care Approach and analyses its implementation in a community context. • Analyze the factors influencing the health of a specific community and make recommendations to improve health using the Primary Health Care Approach. • Reflect and report on the value of working in interdisciplinary teams. • Demonstrate skills and professional conduct such as punctuality, participation and attendance when working in groups. • Academic literacy skills integrated into the above content: academic reading, writing and presenting academic arguments.						
Main Content	• Demonstrate an understanding of the concepts of health and the social determinants of health. • Understanding concepts related to working in communities: community entry, community development. • Community profiling • Analyse the impact of social inequality, poverty and development on health. • Describe the origins and main features of the Primary Health Care Approach and analyse its implementation in a community context. • Analyse the factors influencing the health of a specific community and make recommendations to improve health using the Primary Health Care Approach. • Reflect and report on the value of working in teams. • Academic reading, writing and presenting academic arguments.						
Pre-requisite	None		Prohibited module Combination		None		
Co-requisite	None

Assessment Module Type	Continuous and Final Assessment (CFA)		Method of Student Assessment			CA	60%
						FA	40%
Faculty	Community and Health Sciences		Home Department			Inter-professional Teaching and Learning Unit	
Module Name	Primary Health Care 122		Module Code			HDP122	
Module Type	Core	NQF Level	5	Year Level	1	NQF Credit	10
Programmes in which the module will be offered		BSc (Occupational Therapy) (8111), BSc (Dietetics) (8231), BSc (Physiotherapy) (8211), B (Social Work) (8560, 8411), BSc (Complementary Health Sciences) (8104), BNurs (8311, 8312, 8313), BA (Sport, Recreation and Exercise Science) (8061, 8013), B (Oral Health) (5211), BPharm (3305)				Total Learning Time	100 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Understand and describe 'care' as a social practice and in the larger social constructs, and the impact of policy on these constructs. • Apply basic moral concepts, ethics and human rights relevant to service providing and an awareness of the ethical responsibilities of health care workers in South Africa. • Identify and apply the skills needed when dealing with moral dilemmas in day to day caring practices. • Apply skills needed for professional conduct such as punctuality, participation and attendance when working in interdisciplinary groups. • Demonstrate an understanding of the concepts of health and the social determinants of health. • Describe the impact of social inequality, poverty and underdevelopment in a local community context. • Describe the origins and main features of the Primary Health Care Approach and analyses its implementation in a community context. • Describe the factors influencing the health of a specific community and make recommendations to improve health using the Primary Health Care Approach. • Reflect and report on the value of working in interdisciplinary teams.						
Main Content	• Introduction to Morality and Ethics: What are they and why do they matter? • Principle ethics and the ethic of care approach • The elements of the ethic of care: attentiveness, responsibility, competence and responsiveness. • Health and human rights and professional codes of ethics • Solving moral dilemmas • Concepts of health and the social determinants of health • Concepts of community development						

	• The impact of social inequality, poverty and development on health • Origins and main features of the Primary Health Care approach • The value of working in interdisciplinary teams within a Primary Health Care approach.

Faculty	Community and Health Sciences		Home Department		School of Natural Medicine (SoNM)	
Module Name	Pathology 311		Module Code		NAT311	
Module Type	Core	NQF Level	7	Year Level	3	NQF Credit 15
Programmes in which the module will be offered	BSc (Complimentary Health Sciences) (8104, 8106)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester		First Semester	

Main Learning Outcomes	On completion of this module, students should be able to:			
	• Demonstrate an understanding that pathology is a language on its own via the ability to present and communicate complex information reliably and coherently using academic and professional terminology. • Apply knowledge describing the disease process as a dynamic evolution that progresses with time. • Compare and contrast the mechanisms of disease with mechanisms that regulate homeostasis. • Explain and discuss how the basis of all disease begins and progresses at the biochemical and cellular Level, resulting in morphological changes in tissues, leading to dysfunction, signs and symptoms. • Define, discuss and describe the various principles and mechanisms by which disease may occur in the human body. • Integrate knowledge from anatomy, histology, physiology, biochemistry and microbiology in the understanding of various pathological principles, concepts and disease.			
Main Content	• Introduction to pathology • Normal cells, injury and cell death • Amyloid, calcification, pigmentation • Jaundice, fluid, oedema • Hyperaemia and congestion • Haemorrhage, shock • Acute, chronic inflammation • Healing and repair • Infection • Disorders of growth, tumours, malignancy			
Pre-requisite	MBS231, MBS232, MBS251, MBS252	Prohibited module Combination		None

Module Name	Herbal Pharmacognosy 323		Module Code			NAT323	
Module Type	Core	NQF Level	7	Year Level	3	NQF Credit	20
Programme in which the module will be offered		BSc (Complimentary Health Sciences) (8104)				Total Learning Time	200 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: - Identify plants with medicinal value, visually and with laboratory tests and name their family and botanical name. - Explain the basic metabolic pathways and origins of secondary metabolites in plants. - Explain the principles related to the commercial production, quality and standardization of natural drugs. - Test herbal material for quality by using specified laboratory tests. - Explain the pharmacodynamics of the archetypal plant constituents: carbohydrates, glycosides and saponins. - Identify plants with medicinal value, visually and with laboratory tests. - Explain the biosynthesis of secondary metabolites: alkaloids, essential oils, tannins, fixed oils. Name the common, family and botanical name, uses and symptoms produced in the body. - Explain the pharmacodynamics of the archetypal plant constituents: alkaloids, essential oils, tannins, fixed oils mucilages and gums.						

Main Content	• An introduction to botany, including taxonomy and morphology. • Principles related to the commercial production, quality and standardization of natural products. • Quality control, standards applicable to crude drugs and techniques for detection of contamination. • General methods associated with the phytochemical investigation of herbal products. • Basic metabolic pathways and the origin of secondary metabolites. • The chemical and physical structure, chemical and physical constants, extraction, identification reactions, properties and functions of the following main classes of secondary plant chemicals: carbohydrates, glycosides, saponins. • Quality control standards applicable to crude drugs • The geographical sources, collection and preparation, chemical tests for identification, adulterants and substitutes and uses for the plants containing alkaloids, tannins, essential oils. • Basic metabolic pathways and the origin of secondary metabolites. • General methods associated with the phytochemical investigation of herbal products

Module Name	Phytotherapy for Naturopathy 402			Module Code			NAT402		
Module Type	Core	NQF Level	8	Year Level	2	NQF Credit		10	
Programme in which the module will be offered		B (Complementary Medicine) (Naturopathy) (8334)				Total Learning Time		100 hours	
Duration	Year			Proposed Semester			Both Semesters		
Main Learning Outcomes	On completion of this module, students should be able to: • Apply appropriate Phytotherapy terminology and definitions within the context of Naturopathy. • Critically discuss the cultivation, harvesting, viability, environmental impact and sustainability of relevant medicinal plants. • Describe the botanical classification, nomenclature and morphological description of the relevant medicinal plants for Naturopathy. • Critically evaluate the action of relevant medicinal herbs for naturopathic practice: medicinal properties, constituents, preparation, application and contraindications. • Discuss relevant ethics and safety appropriate to Naturopathic application of Phytotherapy. • Contextualise and apply the appropriate principles and application of Phytotherapy within the context of Naturopathic treatment philosophy.								

	Identify and discuss herb-drug complications and relevant contradictions for medicinal plants.				
Main Content	- An introduction to the history, philosophy and botanical terms used in Phytotherapy. - Cultivation, harvesting and sustainability of relevant medicinal plants for Naturopathy. - Botanical classification, nomenclature and morphological description of the relevant medicinal plants for Naturopathy. - The chemical constituents and relevant pharmacology of the relevant medicinal plants for Naturopathy. - Taste and temperament of individual medicinal plants and their impact in healing. - Appropriate Phytotherapy application of relevant medicinal herbs to various body systems. - Dosage and routes of medicinal administration of the relevant medicinal plants for Naturopathy. - Herb-drug interactions and contraindications of the relevant medicinal plants for Naturopathy.

Faculty	Community and Health Sciences		Home Department				School of Natural Medicine (SoNM)	
Module Name	Naturopathic Therapeutics 422		Module Code				NAT422	
Module Type	Core	NQF Level	8	Year Level	1	NQF Credit	10	
Programme in which the module will be offered	B (Complementary Medicine) (Naturopathy) (8334)					Total Learning Time	100 hours	
Duration	Semester		Proposed Semester			Second Semester		

Main Learning Outcomes	On completion of this module, students should be able to:					
	• Critically discuss the philosophy and principles underpinning aromatherapy. • Demonstrate the ability to appropriately prescribe essential oils for common conditions seen in practice. • Demonstrate the awareness of the safety aspects of essential oil usage: the interactions, contra-indications and side effects. • Critically discuss the philosophy and principles underpinning the 12 homoeopathic Tissue Salts. • Demonstrate the ability to arrive at a diagnosis and prescription for the appropriate Tissue salt remedy for a specific patient. • Critically discuss the philosophy and principles underpinning the 38 Bach Flower remedies. • Demonstrate the ability to arrive at a diagnosis and prescription for the appropriate Bach Flower remedy for a specific patient.					
	Main Content	• The philosophy and manufacture of essential oils for Naturopathic practice • The botanical names, constituents and therapeutic actions of specified essential oils for naturopathic practice • The philosophy and manufacture of tissue salts for naturopathic practice • The remedy picture and clinical application of the 12 homoeopathic tissue salts • The philosophy and manufacture of the Bach Flower remedies for naturopathic practice • The mental-emotional picture and clinical application of the 38 Bach Flower remedies.

Module Name	Physical Therapies for Naturopathy 423		Module Code			NAT423	
Module Type	Core	NQF Level	8	Year Level	1	NQF Credit	20
Programme in which the module will be offered		B (Complementary Medicine) (Naturopathy) (8334)			Total Learning Time		200 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to:						
	• Demonstrate the ability to conduct an organs-systems diagnosis. • Critically discuss the principles, practice and application of physical medicine. • Apply the various physical therapies appropriately and competently.						

	Integrate the physical therapies into an appropriate treatment protocol based on Naturopathic principles.			
Main Content	- Organs system diagnosis - Safety aspects: Interactions, contra-indications and side-effects of the various physical therapies. - Massage therapy - Hydrotherapy - Vibrational therapy - Light therapy - Thermal therapy - Reflex therapy - Iridology - Electrotherapy			
Pre-requisite	NAT412	Prohibited module Combination		None

Clinical placement as per placement plan									
Assessment Module Type		Continuous and Final Assessment (CFA)							
Method of Student Assessment		Continuous Assessment (CA)					50%		
		Theory: Tests, assignments, case studies and group presentations							
		Clinical: Clinical skills assessments							
		In order to qualify for entry to the final assessment the student must obtain a subminimum of 40% in EACH component and at least 80% of the prescribed clinical hours							
		Final Assessment (FA)					50%		
		Theory: Examination							

Faculty	Community and Health Sciences		Home Department			School of Nursing	
Module Name	Child Health 324		Module Code			NRS324	
Module Type	Elective	NQF Level	7	Year Level	3/4	NQF Credit	15
Programmes in which the module will be offered		BNurs (8310, 8311)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate competence in growth and development monitoring of a child. • Demonstrate competence in establishing a child- and adolescent friendly environment in a health care setting. • Demonstrate competence in management of childhood illnesses in an integrated manner.						
Main Content	• Growth monitoring • Integrate Management of Childhood Illnesses • Extended Programme of Immunization (EPI)						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	None						
Timetable Requirement per week			2	Lectures p.w.

Module Type	Core	NQF Level	5	Year Level	1	NQF Credit	15
Programme in which the module will be offered		BSc (Physiotherapy) (8211)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			First Semester	

Main Learning Outcomes	On completion of this module, students should be able to:									
	• Define scientific concepts, terminology and kinematic description of movement. • Describe normal development of the spinal curves in relation to posture and identify anatomical structures and landmarks on the human body. • Assess and describe normal and abnormal posture and derived positions. • Analyse selected normal functional activities. • Perform techniques related to transfers and adaptive mobility.									
	Main Content									
						• Introduction to scientific concepts, terminology and kinematic description of movement used in physiotherapy. • Introduction to the normal development of the spinal curves in relation to posture. • Identification of anatomical structures and landmarks on the human body. • Optimal standing posture of the young adult, analysis of and biomechanical factors relating to standing, identification of fundamental and derived positions used in physiotherapy. • Analysis of selected functional activities. • Ergonomics of working postures and seating, kinetic handling. • Techniques of transferring and adaptive mobility.				
Pre-requisite	None		Prohibited module Combination		None

Faculty	Community and Health Sciences		Home Department			Physiotherapy	
Module Name	Applied Physiotherapy 403		Module Code			PHT403	
Module Type	Core	NQF Level	8	Year Level	4	NQF Credit	30
Programme in which the module will be offered		BSc (Physiotherapy) (8211)				Total Learning Time	300 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Discuss relevant complex pathologies that result in disease, impairment and disability of special groups such as the critically ill patient or athlete. • Apply the principles of multi- and/or interdisciplinary management of the patient with various complex pathologies identified.						
Main Content	Adult and paediatric ICU • Basic principles of mechanical ventilation and assessment of arterial blood gases and hemodynamic stability. • Principles of assessment and treatment of the critically ill adult patient with various pathologies. • Use of evidence based physiotherapeutic management algorithms and outcome measures related to ICU patients. • Principles of assessment and treatment of the critically ill paediatric patient with various pathologies. Sports Rehabilitation • Principles of sports rehabilitation. • The management of common sporting injuries.						

	• Traveling with a team. • The role of physiotherapy in the medical sports team. Pharmacology • Indications for medication relating to conditions commonly treated by physiotherapists. • Dosage and contra-indications of medication relating to conditions treated by physiotherapists. • Understanding drug prescription.				
Pre-requisite	PHT303, PHT310, PHT311, PHT313, PHT316, PHT317		Prohibited module Combination	None

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Introduction to Psychology 111		Module Code			PSY111	
Module Type	Elective	NQF Level	5	Year Level	1/2	NQF Credit	7.5
Programmes in which the module will be offered		BA (2101, 2612), BTH (2013), B (Library and Information Studies) (2201), B (Social Work) (8411, 8560), BA (Sport, Recreation and Exercise Science) (8061), BSc (Occupational Therapy) (8111), BSc (Physiotherapy) (8211), LLB (7162, 7172), BA (Law) (7221)				Total Learning Time	75 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate and apply an informed understanding of and the ability to articulate the key psychological theories and concepts and their relevance to contemporary social issues, both globally and locally.						

	- Identify, examine and critically assess how psychology as a multifaceted discipline could inform real-life issues by identifying the psychological effects caused by social challenges such as poverty, ethnicity, and group dynamics. - Select and apply psychological theories to understand and analyse human behaviour in various contexts. - Critically evaluate the influence of social factors such as poverty and ethnicity on psychological processes, applying key psychological theories to propose interventions for improving mental well-being in South African communities.			
Main Content	- The history of psychology and its evolution into a modern discipline. - The major schools of thought in psychology (e.g., psychoanalytic, behavioural, cognitive, humanistic, sociocultural, and biopsychological perspectives). - The various types of psychology and registration categories - The key psychological processes, including emotion, motivation, personality, and social behaviour. - Social Psychology: Psychology's relevance to real-world issues in South Africa, including the impact of poverty, ethnicity, and social groups on psychological processes. - Foster inquiry, critical thinking, and ethical awareness as part of the graduate attributes aligned with the UWC ethos of diversity, equity, and inclusion (DEI).

Module Name	Brain and Behavior 112		Module Code			PSY112	
Module Type	Core/ Elective	NQF Level	5	Year Level	1/2	NQF Credit	7.5
Programmes in which the module will be offered		BA (2101, 2612), BTH (2013), B (Library and Information Studies) (2201), B (Social Work) (8411, 8560), BA (Sport, Recreation and Exercise Science) (8061), BNurs (8312, 8313), BSc (Occupational Therapy) (8111), BSc (Physiotherapy) (8211), LLB (7162, 7172), BA (Law) (7221)				Total Learning Time	75 hours
Duration	Semester		Proposed Semester			First Semester	

Main Learning Outcomes	On completion of this module, students should be able to:				
	• Demonstrate an informed understanding of the structure and function of the brain, nervous and endocrine system, and sensation and perception, and be able to identify and apply key concepts to understand human behaviour in various contexts. • Demonstrate an informed understanding of the theories of thinking, memory and language and be able to identify and apply key concepts to explain human behaviour in contexts of diversity. • Access, process and manage information related to neuropsychology practice and assessment tools and identify and evaluate local and global trends within the discipline of psychology. • Develop independent learning skills by actively engaging with course materials through responsible, accountable and ethical conduct within the learning process.				
Main Content	• The structure, function and the brain • Theories of brain development • Brain circuits and the nervous system: The structure and function of the nervous system and endocrine system • Neural transmission • Types and functions of neurotransmitters • Neuropsychology as a discipline of ethical and professional practice • Sensation and Perception • Memory and Thinking

Module Name	Psychology and Child Development 121		Module Code			PSY121	
Module Type	Core/ Elective	NQF Level	5	Year Level	1/2	NQF Credit	7.5
Programmes in which the module will be offered		BA (2101, 2612), BTH (2013), B (Library and Information Studies) (2201), B (Social Work) (8411, 8560), BA (Sport, Recreation and Exercise Science) (8061), BNurs (8312, 8313), BSc (Occupational Therapy) (8111), LLB (7162, 7172), BA (Law) (7221)				Total Learning Time	75 hours
Duration	Semester		Proposed Semester			Second Semester	

Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate and apply fundamental knowledge and an informed understanding of developmental stages (prenatal, infancy, early and middle childhood) and related psychological theories (e.g., psychodynamic, behavioural, cognitive, and social perspectives) to case studies. • Critically assess developmental psychology challenges within specific contexts, particularly those faced by children in South Africa. • Identify, select and apply developmental psychological theories in real-world contexts. • Assess psychological developmental issues within South Africa and propose culturally relevant interventions. • Communicate and articulate key development psychology concepts and their application reliably, accurately and coherently, using conventions appropriate to both academic and practical contexts. • Analyse how biological and socioeconomic factors in South Africa influence child development, using basic developmental theories to suggest appropriate and ethical ways to support children in their communities.					
Main Content	• Key developmental psychology concepts and theories (psychodynamic, biological, cognitive, behavioural, and social perspectives). • Child development stages from prenatal, infancy, early to middle childhood • Distinctive challenges to optimal child development in South Africa, focusing on the role of the environment as well as psychologists.

Duration	Semester		Proposed Semester			Second Semester	

Main Learning Outcomes	On completion of this module, students should be able to:					
	• Demonstrate an informed understanding of the scientific, transformative and indigenous approaches and concepts in qualitative and quantitative research in psychology. • Demonstrate an awareness of datasets and how knowledge evolves by organising, describing, generating findings and analyzing and interpreting descriptive data and the implications of generating findings in psychological contexts. • Formulate research questions and hypotheses and propose appropriate research designs in response. • Discuss and apply ethical principles and practices in qualitative and quantitative methods					
	Main Content					
	• Introduction to the field of social science research • The scientific approach and transformative approaches to research in psychology • Qualitative and quantitative research designs • Descriptive/correlation research • Grouped and ungrouped frequency distributions • Measures of central tendency • Measures of variability • Measure of position

Programmes in which the module will be offered		BA (2101, 2612), BTH (2013), B (Library and Information Studies) (2201), B (Social Work) (8411, 8560), BA (Sport, Recreation and Exercise Science) (8061), BSc (Occupational Therapy) (8111), BSc (Physiotherapy) (8211), LLB (7162, 7172), BA (Law) (7221)				Total Learning Time	100 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate and apply detailed knowledge of the different domains of human development (physical, cognitive, personality, and social).						

	• Demonstrate and apply clear understanding of various theories, concepts, and principles, as well as relevant research in developmental psychology that explain the trajectory of human development from adolescence to old age. • Critically evaluate differences and similarities in theories of human development and their relevance to the South African context. • Analyse and explain how key theories (for e.g. Piaget, Erikson, Vygotsky etc) account for developmental stages, individual differences, and socio-cultural influences. • Synthesise recent empirical literature on human development, evaluating gaps and biases in global theories relative to African perspectives.			
Main Content	• Physical Development • Cognitive Development • Personality Development • Social Development • Mental Health and Ageing • Death and Grief			
Pre-requisite	PSY111, PSY121	Prohibited module Combination		None

Module Name	Introduction to Psychopathology 213		Module Code			PSY213	
Module Type	Elective	NQF Level	6	Year Level	2/3	NQF Credit	10
Programmes in which the module will be offered		BA (2101, 2612), BTH (2013), B (Library and Information Studies) (2201), B (Social Work) (8411, 8560), BA (Sport, Recreation and Exercise Science) (8061), BA (Law) (7221)				Total Learning Time	100 hours
Duration	Semester	Proposed Semester			Second Semester		
Main Learning Outcomes	On completion of this module, students should be able to: • Explain and critique psychopathology as it relates to and is informed by broader contextual topics such as culture and gender. • Discuss and apply psychological assessment and psychodiagnostics to explain possible causal factors in the development of psychopathology. • Identify and evaluate ethical problems in psychopathological assessments • Critique various theoretical approaches to psychopathology.						

	• Explain and analyse possible causal factors in the development of psychopathology in diverse cultural contexts. • Examine contextual understandings of psychopathology through a mental wellness perspective • Describe how DSM classification systems are used in psychopathology and identify potential ethical concerns.			
Main Content	• The origins and causes of psychopathology as determined by biological, psychological, social and cultural perspectives. • With a grounding in various perspectives, psychopathology is described, classified and critiqued according to various global classification systems. • Psychopathology assessment and its ethical use are debated including issues of assessment practices and development • Psychopathology is reconsidered from a mental wellness perspective through a reconsideration of mental illness and treatment.			
Pre-requisite	PSY111, PSY112	Prohibited module Combination		None

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Introduction to Psychological Interventions 214		Module Code			PSY214	
Module Type	Core/ Elective	NQF Level	6	Year Level	2/3	NQF Credit	10
Programmes in which the module will be offered		BA (2101, 2612), BTH (2013), B (Library and Information Studies) (2201), B (Social Work) (8411, 8560), BA (Sport, Recreation and Exercise Science) (8061), BSc (Occupational Therapy) (8111), BA (Law) (7221)			Total Learning Time		100 hours
Duration	Semester	Proposed Semester			First Semester		
Main Learning Outcomes	On completion of this module, students should be able to: - Explain the core theories and models of psychological intervention (e.g., CBT, humanistic, African-centred approaches) and describe their role in facilitating change. (Knowledge/Comprehension) - Demonstrate knowledge of and apply basic intervention strategies to case studies (e.g., active listening, psychoeducation) to case examples, demonstrating awareness of ethical practice and multicultural sensitivity. (Application/Skills)						

	• Compare how different therapeutic approaches address psychological distress, with attention to lowincome and South African contexts. (Analysis/Contextualisation) • Discuss the principles of African Psychology and decolonial thought, illustrating their relevance to counselling in South Africa. (Cultural Competence) • Identify the core values of an effective counsellor (e.g., empathy, non-judgment) and reflect on their personal development in this role. (Self-awareness/Professionalism)			
Main Content	• Core theories and models of psychological intervention (Cognitive-Behavioural Therapy, Humanistic, African-Centred approaches) • Basic intervention strategies and ethical practice • Comparing therapeutic approaches in the South African context • African psychology and decolonial approaches in counselling • Counsellor core values and selfreflection

Module Name	Research Methods and Statistics 221		Module Code			PSY221	
Module Type	Elective	NQF Level	6	Year Level	2/3	NQF Credit	10
Programmes in which the module will be offered		BA (2101, 2612), BTH (2013), B (Library and Information Studies) (2201), B (Social Work) (8411, 8560), BA (Sport, Recreation and Exercise Science) (8061), BA (Law) (7221)				Total Learning Time	100 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: - Identify, explain and apply the fundamental paradigms of qualitative and quantitative research and their relevance in the context of social sciences and psychology. - Describe different research designs (e.g., phenomenological, experimental, correlational) and apply them to psychological research problems, proposing basic methodological solutions Define, apply and interpret basic inferential statistics concepts, including hypothesis testing, confidence intervals, and basic significance testing (e.g., t- tests, chi-square tests) of statistical outputs and visual representations of data.						

	• Present research findings (in written and oral formats) using appropriate qualitative and statistical terminology and clear communication techniques, • Contextualise research findings within broader psychological theories and social contexts and indicate their implications for practice. • Critically evaluate research studies, identifying strengths and weaknesses in qualitative and quantitative methodology and statistical analysis, and assess their appropriateness for different research contexts. • Apply ethical principles and practices to the design and conduct of research and the required guidelines in the research process.			
Main Content	Qualitative methods • Introduction to qualitative research • The three paradigms in social sciences research • The process of conducting qualitative research Quantitative methods • Introduction to quantitative research methodology. • Basic quantitative concepts and their use in research studies – normality, variance, standard error of measurement, probability • Correlational designs – Pearson correlation and regression			
Pre-requisite	PSY123	Prohibited module Combination		PSY123

Module Name	Community Psychology 223		Module Code			PSY223	
Module Type	Core/ Elective	NQF Level	6	Year Level	2/3	NQF Credit	5
Programmes in which the module will be offered		B (Social Work) (8411, 8560), BSc (Physiotherapy) (8211)			Total Learning Time		50 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Explain the core principles, historical roots, and values of Community Psychology, illustrating how they differ from traditional psychological approaches. • Compare key theoretical models in Community Psychology (e.g., empowerment, ecological systems) and select appropriate approaches for specific community issues. • Apply the ecological model to analyse psychosocial problems in communities, proposing contextrelevant intervention strategies. • Design basic community-based intervention plans, demonstrating awareness of cultural, economic, and systemic factors.						

	• Evaluate real-world case studies of community psychology in action, reflecting on challenges and ethical considerations in diverse settings.			
Main Content	• Introduction to Community Psychology in South Africa ◦ Defining Community Psychology, focus on prevention, social justice and collective well-being ◦ Values and goals of Community Psychology: Ubuntu, empowerment and decolonisation ◦ Intervention strategies/programmes/models • Theoretical Approaches ◦ Systems Theory (also known as Social Ecological Model) ◦ Levels of community interaction ◦ Mental Health Model – interaction with social forces ◦ Social support as a community resource ◦ Social Action Model • Intervention planning with cultural sensitivity • Scientific and Technological Applications in Community Psychology • Social Responsibility and Cultural Sensitivity

Module Type	Core/ Elective	NQF Level	6	Year Level	2/3	NQF Credit	5
Programmes in which the module will be offered		B (Social Work) (8411, 8560), BSc (Physiotherapy) (8211), BSc (Complementary Health Sciences (8104)				Total Learning Time	50 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Define the core principles and scope of health psychology, illustrating their relevance to physical and mental health outcomes. (Foundational Knowledge • Explain the bidirectional relationship between stress, illness, and coping mechanisms, applying this understanding to substance use effects on health. • Analyse the role of nutrition in chronic illness management across developmental stages, proposing psychosocially informed strategies to address challenges • Assess how social and environmental factors shape health-risk behaviours, reflecting on their implications for health decision-making in diverse context						

	• Compare psychological models of health and illness, designing culturally appropriate interventions for substance use disorder • Adapt health psychology principles to culturally sensitive contexts (e.g., tuberculosis, parasitic infections, HIV/Aids), demonstrating respect for diverse healthcare perspectives.			
Main Content	• Introduction to Health Psychology • Health-Risk Behaviours • Stress, Illness, and Coping Behaviours • Substance Abuse and Psychopharmacology • Nutrition and HIV/AIDS • TB and Parasites			
Pre-requisite	PSY223	Prohibited module Combination		None
Co-requisite	None

Module Name	Psychopathology 311		Module Code			PSY311	
Module Type	Elective	NQF Level	7	Year Level	3/4	NQF Credit	10
Programmes in which the module will be offered		BA (2101, 2612), BTH (2013), B (Library and Information Studies) (2201), BA (Sport, Recreation and Exercise Science) (8061), BA (Law) (7221)			Total Learning Time		100 hours
Duration	Semester	Proposed Semester			First Semester		
Main Learning Outcomes	On completion of this module, students should be able to: • Critically analyse the sociocultural, historical, and contextual frameworks that shape conceptions of typical and atypical behaviour in diverse South African settings, with attention to power dynamics in diagnostic systems. • Synthesise advanced knowledge of psychological distress by evaluating the interplay between diagnostic classifications (e.g., DSM-5/ICD-11), lived experiences, and multi-level causal factors (biological, psychological, sociopolitical) in South African contexts. • Critically compare and contrast dominant models of psychological distress (e.g., biomedical, psychosocial, decolonial), analysing their epistemological assumptions and applicability to marginalized South African communities. • Critically examine Western diagnostic frameworks' cultural validity, examining tensions with African ontologies of wellbeing (e.g., Ubuntu, ancestral spirituality) and their implications for culturally responsive practice. • Execute original case study analyses that apply decolonized research methodologies to interrogate how local and global paradigms of distress						

	manifest in specific SA communities (e.g., urban townships, rural traditional societies)				
Main Content	• Behavioural norms: Classification of mental disorders using the DSM and ICD classification systems • Integrated knowledge of mental distress: Symptoms of disorders identified by the DSM classification system • Mainstream approaches/ models of psychopathology • Critique of western Models in African context: Pathology in the context of South Africa • Practical application of knowledge through engagement with case studies.

Programmes in which the module will be offered		BA (2101, 2612), BTH (2013), B (Library and Information Studies) (2201), B (Social Work) (8411, 8560), BA (Sport, Recreation and Exercise Science) (8061), BA (Law) (7221)				Total Learning Time	100 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Critically compare foundational and contemporary personality theories, analysing their historical development, core assumptions, and cross-cultural applicability. • Integrate personality theories with concepts of motivation, psychopathology, and optimal functioning to explain individual and collective behaviour. • Design culturally informed strategies for applying personality theory in psychological practice (e.g., assessment, intervention), addressing ethical and diversity considerations.						
Main Content	• Introduction and comparison of the following theories: Classical psychoanalysis, Ego psychology, Object Relations, Humanism, Existentialism, Learning Theories, alternative perspectives on the study of Self and personality. • Integrate with motivation and psychopathology						

	- Western or Eurocentric vs non-Western or indigenous model used in South Africa - Culturally informed practice strategies

Programmes in which the module will be offered		BA (2101, 2612), BTH (2013), B (Library and Information Studies) (2201), BA (Sport, Recreation and Exercise Science) (8061), BA (Law) (7221)				Total Learning Time	100 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Critically evaluate and synthesize philosophical foundations of scientific inquiry, research paradigms, and methodological designs, demonstrating advanced application to contextually relevant African and South African research scenarios. • Critically assess the validity, reliability, and ethics of various qualitative and quantitative research methods and statistical approaches used in a range of research studies in psychology. • Interrogate research projects utilising advanced statistical techniques, interpreting results in the context of the appropriate research designs and existing literature. • Develop a concept note for peer review where the philosophical/theoretical approach is aligned with the research question and design for both qualitative and quantitative research. • Demonstrate a critical and logical understanding of correlational and differential statistical techniques (e.g., correlation, regression analysis, chi-square, two-sample t-test, Mann Whitney) and apply them appropriately. • Critically reflect on ethical considerations throughout the research process, and the psychologist's (clinical, counselling and research) commitment to integrity and social responsibility. • Evaluate scholarly publications where social, cultural, and ethical contexts impact on research design and interpretation, indicating how these factors shape findings.						
Main Content	Qualitative methods						

	• Qualitative Research Designs • Methods and methodologies in qualitative research • Data collection and Analysis in qualitative research • Rigour and ethics in qualitative research - Quantitative methods • Correlational designs – Pearson correlation, Regression and Chi square analysis • Differential designs - Independent samples t-test and Mann Whitney U-test

Faculty	Community and Health Sciences		Home Department		Social Work		
Module Name	Advanced Social Work Research 407		Module Code		SCW407		
Module Type	Core	NQF Level	8	Year Level	4/5	NQF Credit	15

Programmes in which the module will be offered		B (Social Work) (8411, 8560)		Total Learning Time		150 hours
Duration	Year	Proposed Semester		Both Semesters		
Main Learning Outcomes	On completion of this module, students should be able to:					
	• Submit a feasible topic for research in the area of Social Work.					
	• Conduct a literature review of the selected area of research in Social Work.					
	• Design a research project.					
	• Utilize the appropriate research methods and techniques to gather the relevant information.					
Main Content	• Utilize the appropriate ethical considerations when conducting research.					
	• Submit a research project.					
	• Research philosophies and paradigms					
	• Qualitative research approaches and designs					
	• Data collection strategies					
	• Literature reviews and searches					
	• Researching, writing and structuring a research proposal.					
	• Conducting a qualitative social work research study					
	• Data collection and analysis					
	• Trustworthiness and rigor					
Pre-requisite	SCW315, SCW314, SCW312, SCW313, SCW301, SCW307		Prohibited module Combination		None

						FA	40%

Faculty	Community and Health Sciences			Home Department		Sport, Recreation and Exercise Science (SRES)		
Module Name	Advanced Exercise Physiology 318			Module Code		SRE318		
Module Type	Core	NQF Level	7	Year Level		3	NQF Credit	10
Programme in which the module will be offered		BA (Sport, Recreation and Exercise Science) (8061), BSc (Sport and Exercise Science) (8051)				Total Learning Time		100 hours
Duration	Semester		Proposed Semester			Second Semester		
Main Learning Outcomes	On completion of this module, students should be able to: • Determine the human physiological responses to chronic exercise, training and conditioning • Apply physiological concepts to sport performance, training and conditioning • Examine the effects of exercise and training under various environmental conditions • Assess physiological responses to chronic exercise, training and conditioning • Utilize sport science research in relation to exercise and training evaluation							
Main Content	• Physiological changes which occur as a result of training (endurance, speed, strength): - At rest - During exercise - In recovery • Effects of ergogenic aids on performance • Physiological changes which occur as a result of various environmental stressors, including: - Hot and cold conditions - Altitude • Describe the chronic physiological adaptations to training • Understand the impact of research and future trends in exercise							
Pre-requisite	SRE113			Prohibited module Combination		None		
Co-requisite	None							
Timetable Requirement per week				1	Lectures p.w.

Faculty	Community and Health Sciences			Home Department			Sport, Recreation and Exercise Science (SRES)	
Module Name	Management Internship 330			Module Code			SRE330	
Module Type	Core	NQF Level	7	Year Level	3	NQF Credit	10	
Programme in which the module will be offered		BA (Sport, Recreation and Exercise Science) (8061)				Total Learning Time	100 hours	
Duration	Semester		Proposed Semester			Second Semester		
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate an ability to work in the sport and recreation industry. • Demonstrate an understanding of the various responsibilities which sport and recreation managers have conduct a simple research interview.							
Main Content	This is an internship module, therefore, no theoretical content is covered. Learners are exposed to Human Resources, Facilities management and Office Management in their practical experiences.							

	Students are required to: 1. Observe and submit a journal on the internship experience; 2. Assist with the execution of any task or duties as deemed appropriate by your organisation; 3. Conduct an interview with the manager of the organisation; 4. Collect evidence that portrays the actual activities of the organisation.

Faculty	Community and Health Sciences			Home Department			School of Natural Medicine (SoNM)	
Module Name	Pathology and Diagnosis of Unani Tibb 411			Module Code			TIB411	
Module Type	Core	NQF Level	8	Year Level	1	NQF Credit		10
Programme in which the module will be offered		B (Complementary Medicine) (Unani Tibb) (8354)				Total Learning Time		100 hours
Duration	Semester		Proposed Semester			First Semester		
Main Learning Outcomes	On completion of this module, students should be able to:							
	• Define 'health' according to Unani Tibb. • Define 'disease' according to Unani Tibb. • Define 'pathology' according to Unani Tibb. • Describe the material form of each humour and list its functions.							

	- Analyse the most important role of the humours. - Understand the differences between Unani Tibb and allopathic medicine regarding the interpretation of pathology. - Describe the Unani Tibb approach to pathology – what is the starting point. - Describe the two pathways of the pathological process. - Demonstrate understanding of the difference between a temperamental (qualitative) imbalance and a humoural imbalance. - Comprehend which of the above is mostly associated with acute conditions. - Describe the relationship between humours and pathology. - Describe the link between pathology and temperament using the natural cycle as the basis of your explanation. - Discuss vulnerability to illnesses in relation to temperament.				
Main Content	- Health according to Unani Tibb Medicine - Disease' according to Unani Tibb. - Imbalance and a humoural imbalance - The link between pathology and temperament using the natural cycle. - Relation between organ/tissue, temperature and - Discuss illnesses. - Temperament structure with function. - The two pathways of the pathological process. - The most important role of the humours. - The differences between Unani Tibb and allopathic medicine regarding the interpretation of pathology.

Programme in which the module will be offered		B (Complementary Medicine) (Unani Tibb) (8354)				Total Learning Time	100 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Apply the principles of Unani Tibb learnt in Modules 1-6, to the various common illnesses covered in this series of modules. • Describe the rationale behind the causes and pathological pathways of the illnesses covered. • Demonstrate an understanding when choosing different therapeutic options to suit the needs of individual patients. • Evaluate the benefits (if any) of integrating Unani Tibb into an allopathic/other medical practice with respect to clinical outcomes and cost effectiveness. • Give the rationale behind the causes and pathological pathways of the illnesses covered. • Apply effective, comprehensive and appropriate treatment to the illnesses covered in each module, which will address the causes of illnesses as well as the symptoms. • Explain why it is important to choose different therapeutic options to suit the needs of individual patients.						
Main Content	• Review: anatomy and physiology of the systems with respect to temperament structure and function. • Common causes of disorders of the systems • Rationale of pathology linked to the systems • Common disorders of the systems						
Pre-requisite	TIB412, TIB411, TIB414, TIB413, TIB415		Prohibited module Combination			None	
Co-requisite	None						
Timetable Requirement per week			2	Lectures p.w.			
			0	Practicals p.w.			
			0	Tutorials p.w.

POSTGRADUATE MODULE DESCRIPTORS

Faculty	Community and Health Sciences		Home Department			School of Nursing	
Module Name	Evidence Based Practice and Dynamics 711		Module Code			EBH711	
Module Type	Core	NQF Level	8	Year Level	1/2	NQF Credit	24
Programmes in which the module will be offered		PGDip (Nursing Education) (8070), PGDip (Health Services Management) (8301, 8302), PGDip (Midwifery) (8303), PGDip (Primary Care Nursing) (8305, 8306)				Total Learning Time	240 hours
Duration	Year	Proposed Semester			Both Semesters		
Main Learning Outcomes	On completion of this module, students should be able to: • Function effectively as a nurse specialist with other members of the health team within the healthcare system • Analyse a range of research methods and approaches about their appropriateness for investigating particular research problems in specialised nursing and midwifery. • Manage and evaluate specialised nursing services at district, provincial and national level within the constraints of national health policy and international guidelines and in different settings. • Apply research methods in investigating complex and/or ill- defined problems in nursing and midwifery education, management, and practice.						
Main Content	• Evidence Based Practice • Critical review of literature • Basic Qualitative and Quantitative research approaches and methodologies • Ethics in conducting research, principles, and procedures. • Implementing evidence in practice • Utilises, manages, and communicates data to support decision making and research • Ethical and legal governance • Inter-professional practice • Professional excellence and competence • Life-long learning • Self-leadership • Advocacy • Introduction to health and education system within context • Introduction to management and leadership principles • Management skills • Change management						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	None						
Timetable Requirement per week			5	Lectures p.w.			
			11	Practicals p.w.

Module Type	Core	NQF Level	8	Year Level	1	NQF Credit	20
Programme in which the module will be offered		PGDip (Nursing Education) (8070)				Total Learning Time	200 hours
Duration	Year	Proposed Semester			Both Semesters		
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate a comprehensive understanding of professional, legislative and policy frameworks for curriculum development, accreditation and review • Apply theoretical and philosophical underpinning of curriculum design and development						

	• Lead curriculum change and transformation in the education of nurses and midwives based on critical analysis of the education philosophy, national and global policies and discourses • Develop a micro curriculum				
Main Content	• Curriculum development frameworks and theories • Theoretical and philosophical underpinning of curriculum design and development • Education and professional legislative and policy framework for curriculum development e.g. Higher Education Act, SAQA Act and Nursing Strategies. Other papers such as Decolonisation, Indigenous knowledge system etc. • Nursing policies and related issues e.g. RPL, NQF, Articulation etc. impacting on nursing and midwifery education • Programme evaluation • Situational analysis of curriculum determinants for curriculum development • Stakeholder involvement in developing a coherent and relevant curriculum for a nursing programme • Curriculum accreditation process and the accrediting bodies • Principles for designing learning outcomes • Compile a module guide with learning outcomes				
Pre-requisite	None	Prohibited module Combination		None

Faculty		Community and Health Sciences		Home Department			School of Nursing	
Module Name		Advanced Midwifery 716		Module Code			NMW716	
Module Type		Core	NQF Level	8	Year Level	1/2	NQF Credit	35
Programme in which the module will be offered			PGDip (Midwifery) (8303)				Total Learning Time	350 hours
Duration		Year		Proposed Semester			Both Semesters	
Main Learning Outcomes		On completion of this module, students should be able to: - Analyse and apply evidence-based principles and theories in the coordination and provision of clientcentred specialist midwifery care and obstetric emergencies. - Utilise a broad scientific knowledge base in biomedical and social sciences, including pharmacology to ensure the provision of safe, scientific and evidence- based midwifery care on a specialist level, within ethical-legal parameters - Utilise specialist midwife/accoucheur skills to manage specialised maternal health issues and obstetric emergencies. - Lead inter-professional teams within the health care system to manage maternal health issues and obstetric emergencies for the prevention of maternal mortality and morbidity.						
Main Content		- Health Assessment - Specialized antenatal investigations and advanced antenatal conditions - Advanced Intrapartum conditions - Advanced postpartum conditions - Pharmacology - Advanced clinical competencies during the peripartum period - Evidence-based maternal clinical practice standards - Leadership policies and guidelines - Legislative Frameworks - Provincial, national and global issues relating to maternal morbidity and mortality - Maternal resuscitation - Sepsis and shock - Eclampsia and pre-eclampsia - Haemorrhage - Assisted delivery - Obstructed labour - Emergency obstetric monitoring - Obstetric complications

Faculty	Community and Health Sciences		Home Department			School of Public Health (SOPH)	
Module Name	Descriptive Epidemiology 731		Module Code			SPH731	
Module Type	Core	NQF Level	8	Year Level	1	NQF Credit	20
Programme in which the module will be offered		PGDip (Public Health) (8846)				Total Learning Time	200 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Understand basic concepts of descriptive epidemiology. • Use appropriate indicators to measure health and disease. • Describe population health by using and interpreting simple bio-statistics. • Use simple graphical representation techniques. • Interpret epidemiological data. • Report epidemiological events. • Apply concepts and principles learned to Public Health practice.						
Main Content	Topics covered will include: • Definition, scope, uses and application of descriptive epidemiology. • Historical overview of the development of epidemiology. • Sources and quality of health and population data. • Introduction to measuring health and disease. • Descriptive biostatistics.						

	• Interpretation of population health data. • Presentation of population health information. • Reporting epidemiological events.

Faculty	Community and Health Sciences		Home Department			School of Public Health (SOPH)	
Module Name	Population Health and Development 732		Module Code			SPH732	
Module Type	Core/ Elective	NQF Level	8	Year Level	1	NQF Credit	20
Programmes in which the module will be offered		PGDip (Public Health) (8846), PGDip (Interprofessional Education in Health) (8030)				Total Learning Time	200 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Conduct a situational analysis in a local environment. • Analyze the burden and distribution of ill-health in selected contexts. • Discuss how physical, social, political, economic and environmental factors affect health in a local setting (i.e. social determinants of health). • Apply this knowledge to analyzing factors which affect Public Health practice in your local environment. • Identify Public Health problems, explore their contexts, analyze their immediate, underlying and root (IUR) causes and risk factors, and rank their priority using selected models. • Discuss how the legacy of colonial health systems have impacted on Africa • Explore how development can impact on the health status of the population. • Describe the origins, evolution and main features of PHC (and particular Comprehensive Primary Health Care). • Discuss key current debates in relation to PHC. • Plan how to apply a Comprehensive Primary Health Care Approach to address a local health problem.						
Main Content	This module introduces: • The inter-relationship of health, development and Primary Health Care. • The burden, distribution and pattern of ill-health in the world. • The political, social and economic context of health and disease. • The Primary Health Care approach.

Module Name	Health Promotion for Public Health 733		Module Code			SPH733	
Module Type	Core/ Elective	NQF Level	8	Year Level	1	NQF Credit	20
Programme in which the module will be offered		PGDip (Public Health) (8846)			Total Learning Time		200 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to:						
	• Define Health Promotion.						
	• Describe how perceptions of health and the determinants of health influence approaches to Health Promotion.						
	• Outline the development of the Health Promotion movement.						
	• Describe the Ottawa Charter action areas and strategies and application in local Health Promotion projects.						
	• Discuss selected approaches to Health promotion.						
	• Discuss and classify the range of Health Promotion activities in your own context.						
	• Apply selected Models of Change to a Health Promotion problem.						
	• Distinguish appropriate methods for Health Promotion communication.						
	Plan a Health Promotion programme including an appropriate evaluation strategy.						
Main Content	This module introduces:						
	• Health Promotion.						
	• The determinants of health.						
	• The development of Health Promotion.						
	• The significance of the Ottawa Charter.						
	• The Settings Approach to Health Promotion.						
	• Models of change in Health Promotion.						
	• Programme development and planning in Health Promotion.						
	• Communication strategies for Health Promotion.						
	• Evaluation strategies.

Programme in which the module will be offered		PGDip (Public Health) (8846)				Total Learning Time	200 hours	
Duration	Semester		Proposed Semester			First Semester		
Main Learning Outcomes	On completion of this module, students should be able to:							
	• Describe the District Health System and the rationale underpinning it. • Identify management roles and describe the manager's role in leading a team through its stages of development. • Apply conflict management concepts and models to a work situation. • Analyze factors which influence people's motivation in the workplace.							

	• Evaluate leadership approaches in different scenarios • Discuss the rationale for planning. • Define key planning terms and describe the stages of the Planning Cycle • Apply a planning tool to develop a plan for a small scale project. • Apply the concepts of standardization and quality assurance to different systems. • Demonstrate a basic understanding of how to interpret budgets. • Develop a budget				
Main Content	• The module content includes: • The District Health System • Management and Leadership • Managing people • Managing conflict • Motivation • The Planning Cycle • Use of information for planning and management • Evaluating systems • Developing and interpreting budgets

Programmes in which the module will be offered		BAHons (Biokinetics) (8021), BScHons (Biokinetics) (8024), BAHons Sport and Exercise Science (8013)			Total Learning Time		100 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Explain the effect of exercise on clients with chronic diseases and disabilities.						

	• Develop appropriate exercise programming to optimize functional capacity in persons with chronic diseases and/or disabilities. • Develop an integrated model of care in which exercise prescription is emphasized as one of the therapeutic modalities of comprehensive health care. • Explain the effects of pharmacological drugs on exercise capacity in persons with chronic diseases and/or disabilities. • Develop a problem-oriented approach towards exercise management of persons with chronic disease and disability.			
Main Content	• Pathophysiology of common chronic diseases and disabilities that limit functional capacity • Exercise response and adaptation in persons with chronic diseases and/or disabilities • Effects of commonly used medicines • Exercise testing and programming of individuals with chronic diseases and/or disabilities • Integrated model of comprehensive health-care

Duration	Year	Proposed Semester			Both Semesters		
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate an understanding of the research process.						

	• Demonstrate a basic understanding of the processes involved in conducting research. • Formulate a research question, aims/objectives and hypotheses and a rationale for a research project. • Analyse, interpret research findings in the literature and write a review of literature. • Demonstrate an understanding of the various design and methodologies of both quantitative and qualitative research. • Apply appropriate methodologies and sampling procedures for data collection. • Collect data • Evaluate their own research findings and discuss the results, conclude and make appropriate recommendations. • Compile a research report			
Main Content	The Nature of Research - Introduction to research in Sport, Recreation and Exercise Science - Formulating an idea - Ethical issues in research and scholarship Problem formulation and Literature Review - Developing the Problem - Aims and objectives - Literature review Research Paradigms and Designs - Research paradigms and research designs in quantitative research - Research paradigms and research designs in qualitative research Research Methods - Quantitative research instruments - Ensuring scientific rigour - Reliability and validity - Qualitative research methodologies - Ensuring trustworthiness - Reflexivity - Subject selection/Sampling - Research ethics Writing the Research Report - Proposal and Research Report Structure - Writing an abstract - Referencing

Research Methods section (10Cr) will be either online or block teaching in January:				
Assessment Module Type	Continuous Assessment (CA)	Method of Student Assessment	CA	100%

Faculty	Community and Health Sciences		Home Department			Sport, Recreation and Exercise Science (SRES)	
Module Name	Sport Technology 740		Module Code			SRE740	
Module Type	Elective	NQF Level	8	Year Level	1	NQF Credit	10
Programme in which the module will be offered		BAHons (Sport and Exercise Science) (8013)				Total Learning Time	100 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Show a critical understanding of Sport Technology. • Demonstrate an expertise in using Video Analysis Software. • Identify and analyse the new technologies in sport. • Analyze, report and give feedback from sport technology.						
Main Content	• Video analysis of sport movement • Sport technology to assess fitness levels • Sport technology to assess and enhance technical skills. • Roles of sport technology in coaching • Current trends in sport technology						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	None						
Timetable Requirement per week			2	Lectures p.w.			
			0	Practicals p.w.			
			0	Tutorials p.w.			
Other teaching modes that does not require time-table							
Assessment Module Type	Continuous and Final Assessment (CFA)		Method of Student Assessment		CA		60%
					FA		40%

Faculty	Community and Health Sciences		Home Department			Sport, Recreation and Exercise Science (SRES)	
Module Name	Conditioning for Sport and Exercise 741			Module Code		SRE741	
Module Type	Elective	NQF Level	8	Year Level	1	NQF Credit	20
Programme in which the module will be offered		BAHons (Sport and Exercise Science) (8013)			Total Learning Time		200 hours
Duration	Year	Proposed Semester			Both Semesters		
Main Learning Outcomes	On completion of this module, students should be able to: • Apply detailed knowledge of the science of sport conditioning in a sporting environment. • Apply detailed knowledge of performance testing in a sporting environment. • Apply detailed knowledge of programme prescription in a sporting environment. • Collect, analyses and interpret sport science information and apply it in conditioning programme prescription. • Produce and communicate sport conditioning information in well-formed arguments using appropriate academic discourse.						
Main Content	• Scientific principles of performance conditioning techniques. • Applying performance testing techniques.						

	• Training methods used to enhance performance. • Scientific support services. • Planning and administration of conditioning for sport and exercise.			
Pre-requisite	None	Prohibited module Combination		None
Co-requisite	None			
Timetable Requirement per week		2	Lectures p.w.

Module Name	Sports Nutrition 742		Module Code			SRE742	
Module Type	Elective	NQF Level	8	Year Level	1	NQF Credit	10
Programme in which the module will be offered		BAHons (Sport and Exercise Science) (8013)			Total Learning Time		100 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Discuss the role of macronutrients and micronutrients in metabolism and their relevance in sport and exercise. • Discuss how the daily nutritional requirements are altered by sport and exercise. • Explain the current dietary recommendations for sports persons. • Calculate individual energy expenditure and needs based on the Level of physical activity. • Explain appropriate body composition for various sports and appropriate methods for gaining or losing weight						
Main Content	Macronutrients: • Carbohydrate nutrition - sources, requirements and the importance of complex carbohydrates and dietary fibre. • Dietary fats - sources, requirements, the hazards of overconsumption and relevance of different types of fats. • Protein nutrition - amino acids, protein quality, requirements and food sources. Micronutrients: Role and importance of vitamins, minerals and water in sport and exercise. • Current nutritional recommendations prior to, during and after exercise. • Energy balance in sport and exercise • Nutritional aids for sport performance Problems associated with inadequate nutrition (malnutrition)

Module Name	Health Data Analytics Mini-Thesis 803/804		Module Code			HDA803/804	
Module Type	Core	NQF Level	9	Year Level	2/3	NQF Credit	60
Programmes in which the module will be offered		M (Health Data Analytics) (8787)				Total Learning Time	600 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, the students should be able to: • Demonstrate the ability to conduct independent research of a limited scope • Identify a specific focused topic to research • Compile a limited literature review on the topic selected • Apply basic research skills • Apply Basic knowledge & application of quantitative and/or qualitative methods						

	• Apply basic approaches, possibly mainly descriptive/empirical research, depending on the discipline. • Articulate a particular position within theoretical and methodological frameworks of the discipline. • Structure and organize research findings in a logical and coherent manner. • Produce a Mini thesis of between 15 000 and 25 000 words. (excluding Bibliography)				
Main Content	• Research Proposal • Literature review • Research methodology • Report research data/findings • Interpretation of research findings in the context of the extant literature • Structuring and organizing research findings in a logical and coherent manner • Prepare and submit a mini-thesis under supervision.				
Pre-requisite	None	Prohibited module Combination		None

Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20
Programmes in which the module will be offered		M (Health Data Analytics) (8787)				Total Learning Time	200 hours
Duration	Semester	Proposed Semester			First Semester		
Main Learning Outcomes	On completion of this module, the students should be able to:						
	• Demonstrate an integrated and contextual understanding of Health Systems and how these systems operate and function.						
	• Demonstrate the ability to analyze and develop health policies.						
	• Analyze trends in digital transformation in health systems from micro-to macro-levels.						
	• Apply health data analytics practices for the purpose of strengthening health systems and policies.						
Main Content	• Critically appraise the value of applying health data analytics in creating value-based health systems and policies.						
	• Apply legal and ethical principles governing the integration of health data analytics into health systems.						
	• Fundamentals of Health Systems						
	• Health Policy Planning, Monitoring & Evaluation						
	• Digital Transformation in Health						
Pre-requisite		None		Prohibited module Combination		None

Programmes in which the module will be offered		M (Health Data Analytics) (8787)				Total Learning Time	200 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, the students should be able to: • Design and critique use cases of health data analytics which are currently relevant in diagnostics, therapy, management and administrative processes. • Implement a solution using data analytics tools and techniques for typical use cases in health data analytics. • Investigate how emerging trends can improve on health data analytics solutions.						
Main Content	Students will be equipped with knowledge in terms of get to know explicit use cases of data analytics in the healthcare system. These use cases are categorized in three main areas: • Diagnostics and Therapy Use Cases and Trends • Administrative and Management Use Cases and Trends • Public Health Use Cases and Trends						
Pre-requisite	HDA812, HDA813, HDA814, HDA815		Prohibited module Combination			None

Module Name	Child and Adolescent Mental Health 814		Module Code			NAP814	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	10
Programme in which the module will be offered		MNurs (8863)				Total Learning Time	100 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Work as a specialist practitioner with other members of the health team within the health care system for the promotion of mental health and prevention of mental illness in children and adolescents. • Conduct clinical assessment of families based on an approved model. • Conduct clinical assessment and diagnose the most prevalent childhood and adolescent mental disorders based on international classification systems.						

	Practice childhood and adolescent mental health nursing safely in a variety of settings within legal and ethical frameworks.			
Main Content	- Theories of self-development - International classification of mental disorders - Assessment of risk factors for mental disorders or mental health problems as pertinent to child and adolescent. - Nursing diagnoses - Commonly used treatment modalities - Management of child and youth abuse			
Pre-requisite	None	Prohibited module	None

Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20
Programme in which the module will be offered		MNsurs (8863)				Total Learning Time	200 hours
Duration	Semester		Proposed Semester			First or Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Synthesize concepts of human anatomy and physiology at the cellular, tissue, organ, organ system, and organism Level. • Synthesize concepts of pathophysiology at the cellular, tissue, organ, organ system, and organism Level for conditions affecting individuals throughout the life span. • Analyze and interpret client history, including presenting symptoms, physical findings, and diagnostic information to develop appropriate differential diagnoses in all age groups. • Order and interpret common screening and diagnostic tests within the scope of practice. • Evaluate common screening and diagnostic tests based on current evidence.						
Main Content	• Client health history, including presenting symptoms, physical findings, and diagnostic information to develop appropriate differential diagnoses. • Current common screening and diagnostic tests based on evidence. Most common pathological conditions for each of the major body systems – Cardiovascular, Hematopoetic, Respiratory, Endocrine, Immune, Gastrointestinal, Neurological, Integumentary, Musculoskeletal, Reproductive, Renal, Genetics, and Genitourinary.

Module Name	Advanced Nursing Practice and Client Management 825		Module Code			NAP825	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20
Programme in which the module will be offered		MNurs (8863)				Total Learning Time	200 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Critically analyze and synthesize the philosophical basis of nursing, based on contemporary nursing theories/models and relevant to current socio-political context of nursing practice. • Analyze nursing and primary care nursing decisions and research imperatives, supported by a particular model or theory of nursing and take into consideration the legal and ethical frameworks of nursing practice. • Apply ethical decision making to common ethical problems. • Based on relevant research, provides health promotion, disease prevention, anticipatory guidance, and counseling to promote health, reduce risk factors, and prevent disease and disability. • Recognizes environmental health problems affecting clients/patients and provides health protection interventions that promote healthy environments for individuals, families, and communities, including international, national, regional and local environments. • Utilise the principles of health education to promote health and enable the individual, family, community to cope meaningfully with ill health and disease using current research as basis for practice. • Incorporate current technology in the delivery of care. • Evaluate implications of contemporary health policy on health care providers and consumers. • Monitor and ensure the quality of health care practice.						
Main Content	• Critical analysis of mid-range practice theories (e.g. theory of reasoned action, stress/adaptation, etc) • Conceptual analysis • Theory of health promotion, Health policy and regulation related to health promotion • Applied epidemiology • Environmental health • Global priorities and Health Plan for South Africa						

	• Legal aspects of clinical practice • Use of technology in health care; electronic health record, internet and others • Legislative and political structure; how to influence • Community resources; access for patient care • Methods of quality assurance				
Pre-requisite	None	Prohibited module Combination		None	
Co-requisite	None				
Timetable Requirement per week		1	Lectures p.w.

Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20
Programme in which the module will be offered		MNurs (8863)				Total Learning Time	200 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Prescribe medication based on efficacy, safety, and cost as legally authorized (Integrates knowledge of pharmacokinetic processes, correct doses, routes, frequencies, and how to minimize adverse drug interactions). • Base identify therapeutic options as per client conditions. • Select apply and monitor treatment modalities as appropriate.						
Main Content	• Pharmacokinetic processes. • Major classes of medication for common pathophysiology in each major body system - Cardiovascular, Hematopoetic, Respiratory, Endocrine, Immune, Gastrointestinal, Neurological (including pain and psychiatric), Integumentary, Musculoskeletal, Reproductive, Renal and Genitourinary. (e.g. Cardiovascular – betablockers, calcium-channel blockers, etc.; Immune – antibiotics, antiretrovirals, etc.) • Diagnostic reasoning for choosing one medication over another and one therapeutic approach over another. • For each medication – correct dosing (based on size, age, and other variables), route, frequency and how to minimize adverse drug interactions. • For each therapeutic approach, determine potential risks and measures to avoid or manage those.

Programme in which the module will be offered		MNurs (8863)				Total Learning Time	200 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module students should be able to: • Demonstrate a coherent and critical understanding of the principles, theories, emerging issues and debates in psychiatric mental health nursing. • Assess and diagnose mental ill health using specific, acceptable diagnostic systems. • Manage the mental health care user (MCHU) in a multidisciplinary context. • Evaluate the appropriateness of selected intervention and treatment modalities for clients within legal and ethical frameworks.						
Main Content	• Legislation • Assessment and Diagnosis of Mental Health Care Users • Treatment Modalities • Interactive therapies, psychopharmacology, adjunct and other biological therapies						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	None						
Timetable Requirement per week			4	Lectures p.w.			
			0	Practicals p.w.			
			0	Tutorials p.w.			
Other teaching modes that does not require time-table							
Assessment Module Type	Continuous and Final Assessment (CFA)		Method of Student Assessment			CA	40%
						FA	60%

Faculty	Community and Health Sciences		Home Department			School of Nursing (SoN)	
Module Name	Advanced Specializations in Midwifery and Neonatology 830		Module Code			NAP830	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	10
Programme in which the module will be offered		MNurs (8863)				Total Learning Time	100 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate competency to apply specialist knowledge and skills in the provision of Advanced maternal, neonatal and reproductive health care for individuals, groups and communities. • Develop, promote, implement and evaluate strategies to prevent maternal and neonatal illness related to the overall reproductive health of the community including morbidity and mortality. • Be able to substantiated a point of view regarding emerging issues and debates relevant to midwifery and neonatology such as termination of pregnancy and infertility. • Demonstrate cultural sensitivity in the assessment, process and documentation of maternal and neonatal health care by utilization and comparing the various cultural customs pertaining to the practice of midwifery and neonatology. • Apply quality assurance activities to enhance reproductive services.						
Main Content	• Critically analyze, assess and influence relevant policies, guidelines, legislation and ethical dilemmas. • Demonstrate the ability to complete advanced procedures of reproductive health in relation to STI Management • Papinicolou smears and any other specimen required. • Family planning including insertion of IUCD (the procedure of certificate in TOP is optional). • Prescribe and administer specific medication • Internal foetal monitoring • Amnioinfusion and amnioscopy • External cephalic version • Basic sonagraphy • Be able to successfully arrange seminars/ workshops to educate and train new midwives and mothers in the promotion of maternal care including MTCT, ante and post natal exercise, Better Birth Initiative, Safe Motherhood Initiative, Baby Friendly Hospital Initiative, Kangaroo care.						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	None						
Timetable Requirement per week			2	Lectures p.w.

Module Name	Advanced Qualitative Research Methods 825		Module Code			NUR825	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20
Programme in which the module will be offered		MNurs (8863)				Total Learning Time	200 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate an understanding of qualitative research design including the selection of participants, instrument selection and construction, analysis, and interpretation of the data. • Analyze a range of qualitative research methods and approaches with regard to their appropriateness for investigating particular research problems in nursing and midwifery. • Evaluate various philosophical underpinnings about qualitative research and how this impact on choice of design, instrument in conducting of nursing and midwifery related research.						
Main Content	• Factors leading to the emergence of interest in qualitative methods. • Philosophical orientations and assumptions of qualitative research. • Compare and contrast qualitative research with other research paradigms. • Diverse orientations to knowledge development. • Various approaches to collecting qualitative data. • Data collection, analysis, validation, and presentation techniques of selected methods. • Key ethical dilemmas in conducting qualitative inquiry.						

	• Approaches to analyzing and synthesizing qualitative data.

Module Name	Advanced Quantitative Research Methods 829		Module Code			NUR829		
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20	
Programme in which the module will be offered		MNurs (8863)				Total Learning Time	200 hours	
Duration	Semester		Proposed Semester			First Semester		
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate an evolving awareness of the importance of understanding quantitative research methods including experimental; quasi- experimental, non- experimental designs and ethics in research. • Synthesize concepts relevant to plan and execute a quantitative research project using the steps in the scientific research process. • Utilize knowledge and skills to initiate change and improve practice through capturing, analyzing, interpreting, presentation, publication and implementation of research findings. • Utilize a wide range of appropriate data bases (textual and electronic) to conduct an extensive and efficient literature search and to review, critique, interpret and summarize literature.							
Main Content	• Research methodology • Problem formulation • Identifying/ developing appropriate conceptual frameworks • Sampling methods and techniques • Instrument development • Validity and Reliability • Pilot testing the instrument • Data collection methods • Data analysis (Hypothesis testing; levels of measurement; interpretation) • Proposal writing and reporting of findings							
Pre-requisite	None		Prohibited module Combination			None

Module Name	Occupational Therapy 801/802		Module Code			OCT801/802	
Module Type	Core	NQF Level	9	Year Level	1/2	NQF Credit	180
Programme in which the module will be offered		MSc (Occupational Therapy) (8118)			Total Learning Time		1800 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to:						
	• Identify, analyze and deal with complex research issues drawing systematically and creatively on the theory, research methods and literature of occupational therapy and related fields;						
	• Master advanced information retrieval and processing skills, and undertake a literature review;						
	• Master the application of research design, methods, techniques and technologies;						
	• Undertake a research project and write up a research thesis						
Main Content	Research process						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	None

Programme in which the module will be offered		M (Psychology) (8815)				Total Learning Time	200 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Assess for appropriate psychometric test to be used with patients/clients. • Write comprehensive psychometric reports. • Administer psychometric tests.						
Main Content	• Cognitive and emotional assessment in children and adolescents • Intellectual Disability • Intellectual and personality assessment in Adults • Developmental and scholastic assessment • The use of clinical scales in psychological evaluation • Neuro-psychological Assessment • Ethics and psychological assessment						
Pre-requisite	None			Prohibited module Combination		None	
Co-requisite	PSY812, PSY815, PSY816						
Timetable Requirement per week			2	Lectures p.w.			
			2	Practicals p.w.			
			0	Tutorials p.w.			

Other teaching modes that does not require time-table				
Assessment Module Type	Continuous Assessment (CA)	Method of Student Assessment	CA	100%

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Clinical Interventions 815		Module Code			PSY815	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20
Programme in which the module will be offered		M (Psychology) (8815)				Total Learning Time	200 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate integrated knowledge and engagement with approaches to psychological intervention models. • Critically review and reflect on the body of knowledge regarding approaches to psychotherapy. • Evaluate efficacy and effectiveness of psychological interventions.						

	- Identify and critically evaluate the empirical basis of psychotherapeutic approaches - Apply and critique a range of psychological intervention models appropriate to differing age ranges. - Apply and critique a range of psychological intervention models appropriate to differential client groups individual, couple, family, groups. - Apply a range of specialised skills to develop treatment plans in the modalities covered and for different clinical groups - Apply and critique a range of psychological intervention models appropriate to client groups from different ethnic, socio –economic, social-cultural language contexts and differing age ranges. - Demonstrate mastery of assessment of suitability for psychotherapy - Present and communicate professional ideas about treatment planning and implementation, evaluation of progress, and prognosis to a range of audiences - Develop theoretical formulation of clinical presentations							
Main Content	- Approaches to psychological intervention - Empirical basis of psychotherapy - Manualised treatments (e.g. CBT, DBT) - Insight-oriented therapies (e.g. object relations, Family Group therapy) - Assessment of appropriateness for psychotherapy - Treatment contexts (inpatient, outpatient etc) - Clinical populations and treatment considerations - Treatment types (short, medium and long term) - Developing treatment plans - Developing theoretical formulations							
Pre-requisite	None			Prohibited module		PSY820

Schedule is determined by WIL site. Full-time: 40-hour p.w. WIL										
Assessment Module Type	Continuous Assessment (CA)				Method of Student Assessment			CA	100%	

Faculty	Community and Health Sciences				Home Department			Psychology		
Module Name	Programme Evaluation 832				Module Code			PSY832		
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	10			
Programme in which the module will be offered		MA (Psychology) (8813)				Total Learning Time	100 hours			
Duration	Semester		Proposed Semester			Second Semester				
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate critical thinking and evaluate program effectiveness through critical analysis, identifying strengths, weaknesses, and areas for improvement in programme evaluation. • Apply various methodologies and frameworks to assess program effectiveness, demonstrating understanding of different approaches to programme evaluation.									

	• Differentiate between formative and summative evaluation methods and apply them effectively in assessing program development and outcomes. • Demonstrate proficiency in utilising measurement techniques specific to program evaluation, ensuring accuracy and reliability in data collection and analysis. • Recognize and address ethical dilemmas inherent in program evaluation, adhering to ethical guidelines and principles throughout the evaluation process. Project Design and Implementation: Design and execute comprehensive program evaluation projects, including planning, data collection, analysis, and reporting, to provide actionable insights for program improvement.				
Main Content	1. Definition of key concepts and the purpose of evaluation • History and background • Why evaluate programmes? 2. Approaches to and principles of evaluation 3. Monitoring and evaluation • Measures and indicators • Who are the stakeholders? 4. Types of evaluation • Formative and summative evaluation • Clarificatory and hybrid evaluation types 5. Programme evaluation using qualitative research methods • Primary data collection methods and data analysis • Reporting findings 6. Programme evaluation using quantitative research methods • Primary data collection methods and data analysis • Reporting findings 7. Ethics in evaluation 8. Writing an Evaluation Report • Purpose and steps in writing an evaluation report 9. Programme evaluation project plans				
Pre-requisite	None	Prohibited module Combination		None	
Co-requisite	None				
Timetable Requirement per week		2	Lectures p.w.

		0	Tutorials p.w.		
Other teaching modes that does not require time-table					
Assessment Module Type	Continuous Assessment (CA)	Method of Student Assessment		CA	100%

Faculty	Community and Health Sciences		Home Department		Psychology		
Module Name	Advanced Qualitative Methodology 833		Module Code		PSY833		
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	10
Programme in which the module will be offered		MA (Psychology) (8813)			Total Learning Time	100 hours	

Duration	Semester	Proposed Semester	First Semester		
Main Learning Outcomes	On completion of this module, students should be able to:				
	• Demonstrate a critical understanding of the philosophical principles that underpin qualitative research, enabling critical reflection on research approaches and paradigms. • Identify, compare, and evaluate various qualitative research methodologies, selecting appropriate methods based on research objectives and contextual factors. • Apply systematic approaches and procedures in qualitative research methods, including data collection techniques and sampling strategies, to ensure rigor and reliability in research outcomes. • Proficiently analyze qualitative data using appropriate techniques and software tools, extracting meaningful insights and interpretations to address research questions effectively. • Demonstrate autonomy and ethical sensitivity in navigating ethical challenges inherent in qualitative research, making informed decisions that uphold research integrity and protect participants' rights and welfare.				
Main Content	1. Introduction to qualitative research, the philosophical underpinnings of qualitative research and the nature of qualitative inquiry.				
	2. Designs in qualitative research • Case studies and observation research • Grounded theory • Phenomenology • Ethnography • Participatory action research				
Main Content	3. Data collection methods in qualitative research • Interviews (individual and focus group interviews) • Visual methods (digital storytelling and photovoice) • Online research and using poetry in research				
	4. Data analysis in qualitative research • Thematic analysis; • Discourse analysis; • Phenomenological analysis • Narrative analysis				
Main Content	5. Rigour in qualitative research • Trustworthiness, reflexivity and ethics				
	6. Dissemination and Translation of knowledge				
Main Content	7. Practical skills (e.g. interviews, transcribing)				
Pre-requisite	None	Prohibited module Combination		None	
Co-requisite	None				
Timetable Requirement per week		2	Lectures p.w.		
		3	Practicals p.w.		
		0	Tutorials p.w.		
Other teaching modes that does not require time-table					
Assessment Module Type	Continuous Assessment (CA)	Method of Student Assessment		CA	100%

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Survey Research Methods 834		Module Code			PSY834	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	10
Programme in which the module will be offered		MA (Psychology) (8813)			Total Learning Time		100 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Collect, analyze and evaluate information, integrate quantitative research methods with Psychology, identify and solve problems. • Understand survey research methods.						
Main Content	• Introduction and overview of Positivism • Types of survey designs • Conceptualization and measurement • Questionnaire construction • Sampling • Overview of data analysis						
Pre-requisite	None		Prohibited module Combination			None	
Co-requisite	None						
Timetable Requirement per week			2	Lectures p.w.			
			0	Practicals p.w.			
			0	Tutorials p.w.			
Other teaching modes that does not require time-table							
Assessment Module Type	Continuous and Final Assessment (CFA)		Method of Student Assessment			CA	40%
						FA	60%

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Advanced Quantitative Techniques 835		Module Code			PSY835	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20
Programme in which the module will be offered		MA (Psychology) (8813)				Total Learning Time	200 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate comprehension of the quantitative research design process, including the ability to translate research inquiries into operationalized study designs effectively. • Evaluate and select suitable research designs for specific research inquiries, demonstrating the capacity to tailor designs to align with research objectives effectively. • Assess, select, and create appropriate measurement instruments for use in quantitative research studies, ensuring validity, reliability, and alignment with research objectives. • Develop comprehensive sampling plans that align with research objectives, considering appropriate sampling techniques and strategies to enhance the generalizability of research findings.						

	• Apply diverse data collection methods effectively, selecting and utilizing techniques that best suit the research context and objectives to ensure comprehensive data collection. • Statistical Analysis Competency: Choose, apply, and interpret statistical techniques proficiently, demonstrating the ability to analyze quantitative data accurately and derive meaningful conclusions in accordance with research aims. Ethical • Research Practice: Conduct research ethically and responsibly within and across diverse groups, demonstrating sensitivity to ethical considerations and adherence to ethical guidelines and standards throughout the research process.			
Main Content	• Quantitative research methodology • Ethics in research • Designs • Sampling • Instrument evaluation • Cross-cultural research • Data collection • Univariate and Multivariate statistics			
Pre-requisite	None	Prohibited module Combination	None	
Co-requisite	None			
Timetable Requirement per week		2	Lectures p.w.	
		4	Practicals p.w.	
		0	Tutorials p.w.	
Other teaching modes that does not require time-table				
Assessment Module Type	Continuous Assessment (CA)	Method of Student Assessment	CA	100%

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Cross-Cultural Psychometrics		Module Code			PSY853	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20
Programme in which the module will be offered		MA (Psychology) (8813)				Total Learning Time	200 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate autonomy in making ethical decisions related to test development and construction, applying ethical principles and guidelines to ensure the integrity and fairness of psychometric measures. • Critically engage in the development of ethical standards concerning measurement and design issues in psychometric measure development, contributing to the establishment of ethical frameworks and guidelines within the field • Exhibit the ability to design psychometric measures within the research psychologist's scope of practice, including the creation, translation, adaptation, and validation of measures that are reliable, valid, and culturally sensitive.						

	• Demonstrate the ability to select, administer, score and interpret appropriate psychometric tests to be used with clients
Main Content	Introduction • Tests, measurements, and assessment: issues of terminology • Measurement levels: relevance for test construction • Types of tests: - norm referenced versus criterion referenced - Test purposes, including admission, screening, diagnostic etc; high stakes versus low stakes testing. - cognitive, neuro, forensic, interests, aptitudes and personality in a range of settings. Test construction • The process of test construction • Frameworks and constructs • Item analysis • Scale construction The meaning of test scores • The meaning of raw scores • The transformation of scores • The setting of standards: brief overview • Norm scores - Percentiles - Age and grade scores - Standard and standardised scores - Normalised scores • Equating scores: what it is, why and when do/can we equate tests? Psychometric properties of tests • Validity: what it is, and how do we evaluate it? • Reliability: what it is, and how do we evaluate it? (choose one form of reliability for a practical example) • What are the implications of reliability for error of measurement and test score interpretation? • The relationship between validity and reliability. • The distinction between Item Response Theory and Classical Test • Theory and implications for test development and evaluation Ethics and standards in testing and test development • The history of testing in SA and internationally (focus on USA): relevance for ethics and legislation: • Code of conduct of psychologists: International and SA • Code of conduct for educational testing: International • APA Standards • Legislation in SA: Employment Equity Act; draft legislation on testing in schools Cross-cultural and cross-linguistic testing • What it is • APA Standards on fairness and bias; relevance for SA • The development of cross-cultural and cross-linguistic tests: 22 guidelines of the International Test Commission

	• Central concepts: group differences, fairness, equivalence and bias. • How do we evaluate it? Critical testing • What is “critical testing”? • Why is “critical testing” important for researchers? • How do we do “critical testing”? backwash, argumentation, consequences of testing and stakeholder involvement Psychological Assessment • Ethics of psychological assessment • The administration of tests and the performance of screening of psychological functions, including but not limited to cognitive, neuro, forensic, interests, aptitudes and personality in a range of settings. • The administration, scoring and interpretation of psychological tests in which they have been trained.			
Pre-requisite	None	Prohibited module Combination		None
Co-requisite	None

Assessment Module Type	Continuous Assessment (CA)	Method of Student Assessment	CA	100%

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Contextual and Community Psychology 839		Module Code			PSY839	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	10
Programme in which the module will be offered		MA (Psychology) (8813)				Total Learning Time	100 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate proficiency in problem-solving by utilizing a diverse range of specialized skills such as reflective practice, active listening, and effective communication to develop a social justice agenda for inquiry. • Apply these skills to address complex and challenging problems within research psychology, considering the consequences of solutions or insights generated within a specialized context. • Conduct a critical evaluation of mainstream approaches to psychology, analyzing their strengths, weaknesses, and implications for research and practice, fostering a deeper understanding of alternative perspectives within the field. • Develop a clear and comprehensive understanding of the political context and hierarchical relations within the political system, recognizing their influence on psychological well-being and social justice issues, and integrating this understanding into research and practice within psychology.						

	• Articulate and apply the role of research psychologists within community contexts, aligning practices with the scope of practice as guided by the Health Professions Council of South Africa (HPCSA). • Demonstrate an awareness of ethical considerations and professional responsibilities when engaging with communities in research and intervention initiatives.			
Main Content	• Introduction to Community Psychology • Research in Community Psychology • Theories and models of Community Psychology • Critical perspectives to Community Psychology (e.g. Marxism) • Prevention and Promotion			
Pre-requisite	None	Prohibited module Combination	None	
Co-requisite	None

Other teaching modes that does not require time-table				
Assessment Module Type	Continuous Assessment (CA)	Method of Student Assessment	CA	100%

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Health Psychology 840		Module Code			PSY840	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	10
Programme in which the module will be offered		MA (Psychology) (8813)				Total Learning Time	100 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Design, select, and apply innovative methods, techniques, processes, or technologies proficiently to investigate complex, practical, and theoretical problems within the discipline of health psychology. • Explore, analyze, and critically evaluate pertinent health concepts, theories, and models discussed in the course, demonstrating a comprehensive understanding of their application in various contexts. • Investigate and analyze the interconnections between lifestyle, wellness, and illness, and develop interventions at an appropriate level considering contextual factors and systemic influences within the health psychology domain. • Utilize a diverse array of specialized skills to identify determinants of behavioural change based on health beliefs, addressing complex and challenging problems within the discipline of health psychology effectively. • Identify, evaluate, and critically assess current processes of knowledge production surrounding health psychology research, demonstrating literacy in scholarly discourse and research methodologies within the field. • Understand the relevance and application of health psychology research within the South African context, proficiently accessing, processing, and managing information to generate specialist insights and contribute to the advancement of the discipline.						

Main Content	• Health Research Methods ◦ Correlational Designs ◦ Randomised Control Designs (RCT) ◦ Cross-Sectional Designs ◦ Quasi-Experimental Designs ◦ Longitudinal Designs • Health Promotion Theories and Models ◦ Health Belief Model (explains, - and predicts individuals' health-related behaviours) ◦ Protection Motivation Theory (explains how individuals make decisions about engaging in protective behaviours) ◦ Syndemic Theory (explains the interconnectedness of health issues, such as infectious diseases, mental health disorders, substance abuse, socioeconomic factors etc.) ◦ Individual, Family, Community (IFC) Model (highlights the interconnectedness of individual, family, and community factors in managing HIV/AIDS) • Lifestyle Factors, Health and Mental Wellbeing ◦ Substance dependence (use, misuse, abuse) ◦ Chronic illness ◦ Food (in-) security ◦ HIV/AIDS ◦ Gender based violence/Intimate partner violence (GBV/IPV)

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Research Skills Training 842		Module Code			PSY842	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20
Programme in which the module will be offered		MA (Psychology) (8813)				Total Learning Time	200 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate the ability to design, select, and apply innovative and appropriate research methods effectively to address complex social challenges from a research psychologist perspective. • Apply suitable data collection techniques, data analysis processes, or technologies to address contextually relevant social challenges, demonstrating proficiency in research methodology and analytical skills within the field of research psychology. • Develop a guided research project grounded within ethical principles and professional practice standards of research psychology, ensuring						

	integrity, validity, and relevance in addressing identified social challenges.			
	Communicate research findings, insights, and implications to relevant audiences, participants, and collaborators using an eportfolio format, demonstrating clarity, coherence, and professionalism in conveying information within the research context.			
Main Content	Main content includes - Review studies (Rapid, Scoping and Systematic reviews) - Mixed methods - Using various platforms for data management of review studies (open source and licensed software) - Analyze quantitative data using SPSS. - Interpreting descriptive and inferential statistics - Analyze qualitative data using ATLAS.ti - Ethics - Debriefing/Counseling

Co-requisite	None			
Timetable Requirement per week		2	Lectures p.w.	
		0	Practicals p.w.	
		0	Tutorials p.w.	
Other teaching modes that does not require time-table				
Assessment Module Type	Continuous Assessment (CA)	Method of Student Assessment	CA	100%

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Internship 848/849		Module Code			PSY848/849	
Module Type	Core	NQF Level	9	Year Level	1/2	NQF Credit	20
Programme in which the module will be offered	MPsych (Structured) (8813)					Total Learning Time	200 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Identify psychosocial issues requiring research in South Africa and to design innovative research methods for psychosocial research in South Africa. • Demonstrate applied competence in research methodology, inclusive of, amongst others different means of data collection, the use of Online platforms and both qualitative and quantitative data analysis. • Demonstrate the ability to design, manage and conduct research which contributes to the integration of psychological theory and practice, report on such research, and implement the findings of such research in policy and practice. • Conduct all aspects of psychological research and adhere to the scope of practice following guidelines for professional practice of the HPCSA and the Professional Board for Psychology, and to consider various aspects of psychological practice and research in a manner which is cognisant of and sensitive to socio-economic status, culture, race, gender, disability, sexual orientation, and other forms of diversity.						

	• Establish protocols and contracts with clients (individuals, groups, organizations, government departments) and to apply counseling skills to debrief and manage possible emotional reactions from participants during research studies. • Develop innovative psychological measures which are sensitive to the needs of the diverse South African population towards the design, manage, evaluate and implement a range of psychologically based programmes in diverse settings and organizations such as health, education and labour. • Demonstrate applied competence in information and records management, financial and human resource management, and entrepreneurship. • Consider relevant aspects of legislation; ability to perform psychological practice and research in contexts such as those related to criminal, civil and family matters. • Advise on the development of policy applicable to a variety of sectors and issues, based on various aspects of psychological theory and research. • Demonstrate thorough knowledge of the code of professional ethics of the HPCSA and the Professional Board for Psychology, as well as of research ethics as expressed in national and international guidelines.
Main Content	• Research and Project management. - Planning, management and coordination of research programmes, including learning about project management. • Understanding Project Terms of Reference (ToR) and the writing of a research proposal including the project budget. - Liaison with clients and understanding the deliverables of the project. - Compiling a research proposal that meets the technical specifications required of the ToR. Compiling a budget with timelines and deliverables. • Reviewing literature - Desktop review of relevant literature • Data gathering (design study; adapt and develop data gathering instruments; undertake pilot study; fieldwork). - Methods used to undertake the study, including sampling strategy. - Adapt and design survey questions, develop interview protocols, focus group questions etc. Measurement instruments and data collection strategy. Conduct interviews, focus groups, and surveys. • Data analysis and interpretation of results. - Data preparation and coding (use of software to capture qualitative and quantitative data). - Data analysis • Dissemination of results. - Compiling reports. - Presentation of results. Submission of paper for publication or presentation of paper at a conference. • Research ethics and ethics for psychological research. - Relevant legislation, Ethics and Professionalism • Administration - Maintaining a logbook of all activities and structured supervision events (includes minutes of meetings)

	- The timely formulation and submission of three quarterly reports and one final integrated report - Scheduling formalised and structured supervision sessions with the internal supervisor (40 hours) and the university-based supervisor (4 sessions) - Reflection on learning that occurred and the acquisition of research-related competencies - Reflection on personal growth - Reflection on areas of further development - Accounting for the ethical challenges inherent in all research activities				
Pre-requisite	Refer to progression rules J.305 PSY803, PSY831, PSY832, PSY833, PSY835, PSY836, PSY839, PSY840, PSY842	Prohibited module Combination		None	
Co-requisite	None				
Timetable Requirement per week		4	Lectures p.w.		
		0	Practicals p.w.		
		0	Tutorials p.w.

Supervision is scheduled outside of teaching timetable.					
Assessment Module Type	Final Assessment (FA)	Method of Student Assessment		FA	100%

Faculty	Community and Health Sciences		Home Department			Psychology	
Module Name	Community Mental Health and Wellbeing 850		Module Code			PSY850	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	20
Programme in which the module will be offered		M (Psychology) (8815)				Total Learning Time	200 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Apply a social justice perspective. • Evaluate the differences between mainstream and community psychology approaches. • Evaluate and apply research within the community psychological framework. • Apply theoretical knowledge to case studies. • Apply different research strategies within community psychology context. • Critique articles on community psychological research • Conceptualise link between lifestyle, wellness and illness. • Evaluate health belief determinants of behavior change. • Apply health psychology research. • Critique and debate research methodology. • Evaluate the relevance of health psychology in South Africa.						
Main Content	• Ecological Systems Theory and Application						

	• Critical Approaches in Community Psychology • Community psychology and research • African Cosmology, Psychology and Social Support and Community resources. • Prevention, Empowerment and Health promotion • Mental Health – Interaction with social forces • Interventions in the context of HIV/AIDS and TB in South Africa. • Substance Abuse • Crime and Violence • Sport Psychology theory and intervention			
Pre-requisite	None	Prohibited module Combination		PSY817, PSY851, PSY852
Co-requisite	None

Assessment Module Type	Final Assessment (FA)	Method of Student Assessment	FA	100%

Faculty	Community and Health Sciences		Home Department			School of Public Health (SOPH)	
Module Name	MPH Full-Thesis 805/806		Module Code			SPH805/SPH806	
Module Type	Core	NQF Level	9	Year Level	1/2	NQF Credit	180
Programme in which the module will be offered		M (Public Health) (8801)				Total Learning Time	1800 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: - Mastering the skill of research by developing a research question in the field of public health, designing, carrying out and reporting on research in the form of a thesis. - Demonstrate capacity to link research with policy and practice in Public Health. - Demonstrate understanding of the substantive elements of Public Health relevant to Africa including: Public Health and the Primary Health Care (PHC) approach, district health systems and their development, management and evaluation; Health Promotion. - Demonstrate leadership in applying research to the transformation of the health system in a developing country context from a predominantly curative hospital based service to a high quality comprehensive community-based, participatory and equitable system.						
Main Content	Primary tasks are to develop a research proposal towards a research question grounded in the public health context; conduct research, analyze and interpret data in relation to the field of public health and the needs of the health system; prepare the research thesis under the guidance of the supervisor(s) and submit the thesis for examination.						
Pre-requisite	None		Prohibited module Combination			None

Programme in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			First or Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate understanding of the varied and iterative nature of policy change processes to assess and review a programme. • Include, and demonstrate the role of, implementation in a policy change process. • Identify key components and factors facilitating and constraining policy and implementation processes. • Conduct comprehensive analyses of policy and implementation processes. • Apply theoretical frameworks and approaches in understanding policy and implementation processes and apply specific policy analysis tools.						

	• Use policy analysis for strategic planning.			
Main Content	• Key issues in policy analysis. • Theoretical frameworks and approaches used in health policy analysis. • Key health policy debates.			
Pre-requisite	None	Prohibited module Combination		None
Co-requisite	None			
Timetable Requirement per week		0	Lectures p.w.

Faculty	Community and Health Sciences			Home Department			School of Public Health (SOPH)	
Module Name	Population Health and Development 855			Module Code			SPH855	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	15	
Programme in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours	
Duration	Year		Proposed Semester			Both Semesters		
Main Learning Outcomes	On completion of this module, students should be able to: • Discuss how political, economic and social factors impact on the health of societies in Africa. • Critically discuss the implementation of Primary Health Care in developing countries over the past three decades and the factors facilitating and constraining its implementation. • Understand and apply the policy, resources, structures and tools required to operationalise Comprehensive Primary Health Care programmes. • Understand the challenges of applying the principles of Comprehensive Primary Health Care Approach within a district health context.							
Main Content	• The Determinants of Health in Africa. • Three Decades of PHC: A Review. • Systems that Support Comprehensive Primary Health Care.							
Pre-requisite	None		Prohibited module Combination			None		
Co-requisite	None							
Timetable Requirement per week			0	Lectures p.w.

Module Name	Intermediate Epidemiology 856		Module Code			SPH856	
Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	15
Programme in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Recognize prominent global and national trends in health and disease. • Critically review and interpret epidemiological information. • Interpret key epidemiological indicators of community health and illness. • Appraise epidemiology research findings. • Apply descriptive epidemiology concepts and principles to effective Public Health practice. • Formulate and test a hypothesis by applying analytical statistics. • Use a statistical software package, to analyse epidemiological data. • Write an epidemiological report.						
Main Content	• Concepts of epidemiological health information • The health transition • The natural history of disease • Risk, association and causation • Common epidemiological investigations (infectious diseases, outbreaks, screening and surveillance) • Study designs • Data management • The analysis and interpretation of data • Representation of health information and reporting on an epidemiological event • The role and structure of literature review • Critical appraisal of literature • The role of systematic reviews and meta-analyses in evidence-based Public Health						
Pre-requisite	None		Prohibited module Combination			None

Module Type	Core	NQF Level	9	Year Level	1	NQF Credit	15
Programmes in which the module will be offered		M (Public Health) (8801), MPH (Nutrition) (8789)				Total Learning Time	150 hours

Duration	Semester	Proposed Semester	Second Semester		
Main Learning Outcomes	On completion of this module, students should be able to:				
	• Understand approaches to the concepts of leadership and management.				
	• Evaluate their role and practice as leaders/managers in the context of the public health system.				
	• Critically apply conceptual tools for thinking about organisational change.				
	• Analyse every day management and service delivery problems, and plan improvements to address these problems.				
Main Content	• Understand the scope of human resource management and the systems and skills required for managing relationships with people - down, up and out – in their organisational environment.				
	• Appraise systems requirements for managing information, finances and other resources to achieve better health.				
	• Management as part of health systems				
	• The leadership ladder				
	• The everyday life of a manager				
Pre-requisite	• Understanding and managing change				
	• Managing people and teams				
	• Managing resources – financing, information, human resources, drugs and other supplies

Programme in which the module will be offered			M (Public Health) (8801)			Total Learning Time		150 hours
Duration		Year		Proposed Semester			Both Semesters	
Main Learning Outcomes		On completion of this module, students should be able to: • Demonstrate critical awareness of the current debates and dilemmas in Health Promotion. • Present a critical understanding of the main theoretical approaches used in Health Promotion, demonstrating awareness of their strengths and limitations in programme design. • Demonstrate the ability to plan, implement and evaluate a Health Promotion programme.						

	• Apply Health Promotion and planning knowledge to a comprehensive health programme. Present a critical understanding of the main theoretical approaches used in Health Promotion, demonstrating awareness of their strengths and limitations in programme design			
Main Content	• A context for Health Promotion. • Theoretical perspectives. • Planning in Health Promotion. • Practical approaches to implementation. • Evaluating Health Promotion programmes.			
Pre-requisite	None	Prohibited module Combination	None

Module Type	Core/ Elective	NQF Level	9	Year Level	1	NQF Credit	15
Programme in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Articulate an understanding of theoretical (philosophical) underpinnings of qualitative forms of research. • Clarify the characteristics, purpose and application of qualitative research methods. • Demonstrate awareness of the kinds of questions best addressed by qualitative research methods. • Analyze and discuss examples of selected qualitative approaches. • Demonstrate an understanding of principles underlying participative, collaborative and action-orientated forms of research. • Critique examples of qualitative research in terms of such issues as credibility, rigour, auditability and sampling. • Reflect critically on the process of data collection and analysis. • Describe and use ethical procedures in qualitative research.						
Main Content	• Historical and theoretical underpinnings of qualitative research. • Characteristics, purpose and application of qualitative research methods in Public Health. • Designing qualitative studies • Data collection, sampling and saturation. • Ethical procedures in qualitative research. • Data analysis • Selected approaches to qualitative research including						

	- Ethnography, Phenomenology, Grounded Theory and Action Research. - Rigour in qualitative research			
Pre-requisite	SPH862	Prohibited module Combination		None

Module Name	Quantitative Research Methods 861		Module Code			SPH861	
Module Type	Core/ Elective	NQF Level	9	Year Level	1	NQF Credit	15
Programme in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: • Demonstrate understanding of the ethical principles for conducting research with human subjects. • Distinguish between the designs of the most common types of quantitative research studies. • Define and identify association, causation, bias and confounding within the context of quantitative research. • Apply concepts of validity, reliability and precision within the context of quantitative research. • Apply basic data collection, data management, data handling and project management for quantitative research. • Analyse and interpret health data using basibiostatistics and statistical computing techniques. • Define and apply the basic elements of a research proposal and research report.						
Main Content	• Ethical concepts in research with human subjects, including informed consent. • Types and design of research studies. • Association, causation, bias and confounding in quantitative research. • Application of the concepts of validity, reliability and precision for quantitative study design. • Data collection and data management. • Basic Statistics, including measures of association, statistical testing, and sample size and power. • Presenting and communicating quantitative study results. • Review of research proposal writing and reporting with applications for programme management.						
Pre-requisite	SPH862		Prohibited module Combination			None

Module Type	Elective	NQF Level	9	Year Level	1	NQF Credit	15
Programme in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			First or Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Apply different models of alcohol use and approaches to dealing with problem drinking. • Develop a plan, in a real context, demonstrating an understanding of a comprehensive approach to drinking problems, including prevention, promotion and rehabilitation activities.						
Main Content	• Introduction to the burden of disease and social problems related to alcohol. • Complexity of causes and effects of alcohol misuse in society, and models of understanding the problem. • Community based programme planning and development using the Ottawa Charter as a framework. • Skills development in participatory methods for stimulating community action.						
Pre-requisite	None		Prohibited module Combination			None

Faculty	Community and Health Sciences		Home Department			School of Public Health (SOPH)	
Module Name	Micronutrient Malnutrition 864		Module Code			SPH864	
Module Type	Core/ Elective	NQF Level	9	Year Level	1	NQF Credit	15
Programmes in which the module will be offered		M (Public Health) (8801), MSc (Nutrition Management) (8778)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Describe the characteristics, biochemical and physiological roles and food sources of a range of micronutrients. • Apply detailed knowledge of key micronutrients, namely vitamin A, iodine, iron and zinc, to programme planning. • Describe the application and limitations of recommended micronutrient intakes (RIs), namely Dietary Reference Intakes (DRIs) and the WHO Recommendations.						

	• Apply the two different recommended intakes in programme planning. • Analyse the causes of micronutrient deficiencies using the UNICEF Conceptual Framework. • Critically analyse success factors in Public Health micronutrient interventions. • Plan policy Level interventions to address micronutrient deficiencies at Public Health Level. • Develop effective Public Health micronutrient programmes using three key intervention strategies, i.e. Micronutrient supplementation, food fortification and dietary diversification. • Describe monitoring and evaluation strategies for each micronutrient deficiency control strategy. • Select appropriate indicators for each micronutrient deficiency control strategy. • Summarise the impact of micronutrient deficiency control programmes on health, disease and development. Academic learning outcomes include reading academic texts; read and develop visual texts and demonstrate cognitive, conceptual and writing skills.				
Main Content	The module consists of three units. • Unit 1 provides a basic understanding of micronutrients-what they are and how they function and food sources and dietary recommendations. • In unit 2, a range of tools and competencies needed for the planning and development of micronutrient intervention programmes are introduced and some generic skills relating to programme design are explored, including advocacy, monitoring and evaluation. • In Unit 3, the three key strategies for addressing micronutrient deficiencies at the Public Health Level are introduced. These key strategies include micronutrient supplementation, food fortification and dietary diversification. A number of case studies demonstrating best practice in micronutrient interventions are provided.

Module Name	Epidemiology and Control of Non-communicable Diseases 867		Module Code			SPH867	
Module Type	Core/ Elective	NQF Level	9	Year Level	1	NQF Credit	15
Programme in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			First or Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Understand the basic epidemiological concepts related to chronic diseases. • Critically argue why chronic diseases are a concern globally. • Describe epidemiological transition incorporating social, behavioural, cultural and environmental factors. • Describe and analyse the modifiable and non-modifiable risk factors for chronic diseases. • Discuss global strategies for reducing chronic diseases. • Critically analyse barriers to the implementation of global strategies for the prevention and control of CNCDs in order to develop local preventive strategies. • Use a Public Health approach to plan interventions for primary prevention and management of chronic diseases in your area. • Analyse the resources and skills required at local Level in order to implement appropriate interventions.						

	• Discuss the Public Health approach to determinants of health. • Critically evaluate disease specific strategies. • Discuss barriers to the implementation of global strategies and be able to suggest measures to overcome these barriers. • Formulate monitoring and evaluation strategies for programmes.				
Main Content	• Overview of the epidemiology of chronic diseases- including concepts such as rates, risk, causation, prevalence • Epidemiologic Transition incorporating social, behavioral, cultural and environmental dynamics • Modifiable and non-Modifiable risk factors • Prevention and management of chronic diseases • An integrated Public Health approach to managing chronic diseases • Importance and approach to Surveillance and Monitoring

Module Type	Elective	NQF Level	9	Year Level	1	NQF Credit	15

Programmes in which the module will be offered		M (Public Health) (8801)		Total Learning Time		150 hours	
Duration	Semester		Proposed Semester		First or Second Semester		
Main Learning Outcomes	On completion of this module, students should be able to: - Analyse the key components and roles of health workforce development in the health sector within local and international contexts. - Critically engage with the rationale, benefits and pitfalls of major human resources development strategies. - Conduct a human resource study of an organization using relevant evidence. - Develop appropriate, evidence-based human resources strategies. - Evaluate and apply principles and tools of monitoring and evaluation of human resources for health (HRH).						
Main Content	This module provides an introduction to the scope and main functions of human resources development (HRD). It covers all major areas of HRD (planning, preparing and managing the health workforce), and places them in the context of health systems development and health sector transformation. It introduces students to the most important debates in the field today. Most topics will be picked up in greater detail in subsequent specialized modules.

Module Name	Rational Medicines Use 873		Module Code			SPH873	
Module Type	Elective	NQF Level	9	Year Level	1	NQF Credit	15
Programmes in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			First Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Advocate for rational medicine use and its importance within health systems; • Identify and analyse the application of quantitative methods to identify medicine use problems; • Evaluate qualitative methods and their application to investigate medicine use and prescribing behavior; • Identify and analyse the importance of determining efficacy, safety, effectiveness and cost effectiveness of medicines in decision making;						

	• Evaluate the importance of clinical evidence in decision making and formulary management; • Critically evaluate the principles of the anti-microbial resistance concept and the role of rational medicine use in its prevention • Critically review the role of Pharmaceutical and Therapeutics Committees (PTCs) in all of the above;			
Main Content	• Rational medicines use and problems associated with irrational medicine use; • Medicines use problems using several quantitative methods such as, prescribing indicator studies, application of defined daily dose (DDD) and ABC, VEN and therapeutic category analyses; • Qualitative methods to investigate prescribing behaviour and medicine use; • Promotion of rational medicine use including educational, managerial and regulatory interventions; • Medicines Use Evaluation (MUE) and its application to programmes such as tuberculosis programme; • Essential Medicines Concept and the development of Standard Treatment Guidelines (STGs) and Essential Medicines Lists (EMLs) using evidence-based decision making principles; • Infection Control and Antimicrobial Resistance (AMR) concepts with respect to global and local situations and multifaceted strategies required to contain AMR • Stewardship of Pharmaceutical Therapeutic Committees (PTCs). • Development of a plan for a defined medicine use problem to quantify, investigate, and intervene, with evaluation.

Programmes in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: - Critically evaluate a medicine supply chain and to identify potential bottlenecks at each Level (medicine registration, product selection, procurement, storage and distribution) that may impede medicine access. - Apply a set of tools, frameworks and policies for improving the performance of medicine supply chains.						

	• Process medicines logistics data with a view to generate insights from key indicators. • Identify a specific research problem in the supply of medicine in any geographical context, to develop a research proposal (method of enquiry), collect data from relevant sources and to generate insights for addressing this problem • To demonstrate the ability to integrate professional experiences and academic resources to communicate and defend Rational Medicines Use interventions in medicine supply management • Design a quality improvement plan for a medicines supply system			
Main Content	• Policy, Laws and Regulations applicable to medicines; • Product selection, forecasting/quantification and supply planning for medicines; • Procurement and quality assurance; • Storage and distribution of medicines; • Inventory Management Systems for managing medicines; • Logistics Management Information Systems for managing medicines; • Monitoring and Evaluation of managing medicines supply; • Financing mechanisms for managing medicines. • Quality improvement planning for medicine supply systems.

Module Type	Elective	NQF Level	9	Year Level	1	NQF Credit	15
Programmes in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			First or Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Identify the key role that pharmaceuticals play in health systems • Critically explore and analyse how access to and rational use of pharmaceuticals play a key function in health systems • Identify how the health and pharmaceutical policy process are linked together at different levels of the health system • Demonstrate how policies can be developed and incorporated into management systems to improve access and use of medicines • Analyse existing policy instruments that have been used to manage the delivery of pharmaceutical systems • Prepare a policy brief and critically review an existing policy document						

	• Develop an implementation plan for a new policy that would include monitoring and evaluation indicators. • Identify the importance of community involvement in policy development, health promotion and in the design and implementation of interventions. • Evaluate the particular pharmaceutical policy needs for medicines with particular characteristics such as vaccines or controlled substances • Analyse points in the pharmaceutical supply and use chain that are particularly vulnerable to corruption and suggest policy and managerial approaches to address these vulnerabilities.			
Main Content	• Health and pharmaceutical system models • Health Policy Analysis methods applicable to pharmaceutical policy issues • Access frameworks policies and indicators • Rational use frameworks policies and indicators • Pharmaceutical policy implementation planning, including defining objectives, activities, monitoring and evaluation • Policy Briefs - review and production • Health Promotion - pharmaceutical access and rational use • Pharmaceutical policy and management of particular medicines • Corruption in pharmaceutical systems - prevention and policy actions

Programmes in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Semester		Proposed Semester			First or Second Semester	
Main Learning Outcomes	On completion of this module, students should be able to: • Identify researchable health policy and systems issues, including those focused on action to strengthen health systems and the processes of policy change. • Formulate substantively relevant health policy or health systems research questions, by drawing on relevant empirical work, practice knowledge, and theoretical insights. • Identify the range of research purposes, questions and strategies used within health policy and systems research (HPSR).						

	- Identify appropriate research strategies and study designs for different HPSR issues, purposes and question types. - Show awareness of critical issues in, and approaches to, ensuring rigour in HPSR. - Analyse critical ethical issues for HPSR. - Source HPSR materials and critically appraise HPSR empirical papers. - Appreciate the value of multiple perspectives (positional and disciplinary) in conducting HPSR. - Identify how the complex and socially constructed nature of health policy and health systems is addressed in HPSR methodology. - Plan activities that support the use of research evidence for and in decision-making, through researcher–policy maker/practitioner engagement. - Recognise that personal skills, such as reflexivity, listening and facilitation, are critical to being a health policy and systems researcher.									
Main Content	- The focus and field of HPSR - HPSR questions and perspectives - Introduction to HPSR protocol and design - HPSR design: turning questions into projects - Rigour, trustworthiness and generalisable claims - Developing an HPSR protocol outline - Pitching the idea - Influencing health policy and practice

Module Type	Elective	NQF Level	9	Year Level	1	NQF Credit	15			
Programmes in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours			
Duration	Semester		Proposed Semester			First or Second Semester				
Main Learning Outcomes	On completion of this module, students should be able to: - Critically discuss the dynamic and complex nature of health systems by reflecting on and describing their value bases and functioning, their components and the central roles and behaviours of a range of agents. - Discuss health systems as social constructions, influenced by and influencing the agents within them, as well as influenced by broader political and economic forces, generating public value and contributing to societal development.									

	• Apply these understandings to the assessment of a health system and compare and contrast between health systems. • Apply relevant analytical skills and an understanding of complex systems in order to develop ideas about action to strengthen health systems. • Develop the personal communication, teamwork and leadership skills which are important for supporting health system change.				
Main Content	• What is a health system? • Frameworks for describing and analysing health systems • Understanding the Thai experience of health system development • Whole system change – PHC and UHC • Recognising agents in health systems • Exploring power, agency and mindsets • Managing change in health systems • Intervening in health systems • Health system complexity and change

	FA	60%
Students must pass both assessments with a minimum of 50% to pass the module. Students may resubmit the Formative Assessment (Assignment 1) once if they got a mark below 50%. A resubmission will not be awarded more than 50%.		

Faculty	Community and Health Sciences		Home Department			School of Public Health	
Module Name	Health Economic Evaluation 880		Module Code			SPH880	
Module Type	Elective	NQF Level	9	Year Level	1	NQF Credit	15
Programme in which the module will be offered		M (Public Health) (8801)				Total Learning Time	150 hours
Duration	Year		Proposed Semester			Both Semesters	
Main Learning Outcomes	On completion of this module, students should be able to: - Analyse budget allocations and health financing and their implications for community health systems - Discuss the strengths as well as limitations of how resources (e.g. financial and HR) for health are allocated in LMICs (efficiency gains and demonstrating value for money) - Apply the economic principles of community health systems for effective service utilisation - Apply the principles of the economic evaluation (cost-effectiveness analysis) of public health interventions in aiding decision making around resource allocation - Conduct a cost analysis or cost-effectiveness analysis or costutility analysis - Critique the health economics guidance on evaluating complex public health interventions - Assess the economic impact of health technology in the context of public health interventions - Apply the methodology and process of synthesizing evidence for economic evaluations of public health interventions						
Main Content	The module will specifically focus on; - Principles of economic evaluations (alongside RCTs and “natural experiments”) with a particular focus on cost-effectiveness analysis and cost-utility analysis. - Reporting and presenting cost-effectiveness results - Long term economic modelling of health outcomes - Financial sustainability of health service delivery at the community level. - This could cover areas such as; Human resources for health, Service use and costs, Health outcomes, Health technology assessments, financing, equity and inequalities and						

	Pharmaceutical markets (in particular the availability and cost of drugs) • Introduction to evaluation of complex interventions through a health economics lens • Evidence synthesis for economic evaluations of public health interventions
